December 4, 2006

To the Members and General Manager of
the West Virginia Parkways, Economic
Development and Tourism Authority

The comprehensive annual financial report of the West Virginia Parkways, Economic Development and Tourism Authority (the Authority) for the fiscal year ended June 30, 2006, is hereby submitted. Responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, including all disclosures, rests with the Authority. To the best of my knowledge and belief, the accompanying data is accurate in all material respects and is reported in a manner designed to present fairly the financial position, results of operations, and cash flows of the Authority. All disclosures necessary to enable the reader to gain an understanding of the Authority's financial activities have been included.

The Comprehensive Annual Financial Report (CAFR) is presented in three sections: introductory, financial, and statistical. The introductory section includes a list of Authority members, administrative staff, and professional consultants, the Authority's organization chart, letter of transmittal, history and general information, and the Achievement for Excellence in Financial Reporting awarded to the Authority for its June 30, 2005 CAFR by the Government Finance Officer's Association of the United States and Canada (GFOA). The financial section includes the financial statements, management's discussion and analysis (MD & A), as well as the independent auditors' report on the financial statements. The MD & A provides a narrative introduction, overview, and analysis to accompany the basic financial statements. This letter of transmittal is designed to complement the MD & A and should be read in conjunction with it. The notes provided in the financial section of this report are an integral and essential part of adequate disclosure and fair presentation of this CAFR. The statistical section includes selected financial and traffic information, generally presented on a ten-year basis.

The accompanying financial statements include only the accounts and transactions of the Authority. The Authority has no component units. However, the Authority is considered a component unit of the State of West Virginia and its financial statements are discretely presented in the comprehensive annual financial report of the State.

ORGANIZATION AND BACKGROUND

The Authority was created as successor-in-interest to the West Virginia Turnpike Commission (the Turnpike Commission) pursuant to Chapter 17, Article 16A of the Code of West Virginia, 1931, as amended (the Act). Under the Act, the Turnpike Commission was abolished and effective June 1, 1989 all the duties, powers, and functions of the Turnpike Commission were transferred to the Authority. The Authority assumed all assets, property, obligations, indebtedness, and other liabilities of the Turnpike Commission and Turnpike Commission personnel were transferred to the employment of the Authority. While the Authority has the power to enact and amend its own operating budget, it receives no appropriations from the State of West Virginia (the State) and is not subject to State statutory budget controls. The State imposes its will over the Authority through the Authority's seven-member board. The Governor or his designee serves as chairman of the Authority and the State's Secretary of Transportation serves as a board member. The other five members are appointed by the Governor with the approval of a majority of the Senate. They serve eight-year uncompensated terms and may be reappointed.

The Authority is empowered under the Act to continue the operation of the West Virginia Turnpike (the Turnpike) and the Act also directed the Authority to promote and enhance economic development and tourism within the State of West Virginia. To facilitate these objectives, the Authority is empowered to issue revenue bonds and revenue refunding bonds of the State of West Virginia, payable solely from project revenues. Bonds issued shall not be deemed to constitute a debt of the State or any subdivision thereof or a pledge of the faith and credit of the State or of any such political subdivision.

HISTORY OF THE WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT AND TOURISM AUTHORITY

The Turnpike Commission was created by the State Legislature in 1947. It was charged with the development of a four-lane highway that would stretch from Charleston to Princeton, and become part of a major highway from Cleveland, Ohio to North Carolina. The first Commission was appointed in 1949 and set about building a highway that would open the heart of the Mountain State to transportation and commerce from north, south, east, and west. Previously, this area had been shunned, and residents and area travelers reluctantly labored over inadequate roadways completely encompassed by unyielding terrain. In November 1951, a location was designated for the roadway. Varying only a few miles either way from a straight line between Charleston and Princeton, the route would cut only 22 miles from the original mileage between the two cities but have an estimated two hours driving time, one-half the previously existing time. The original traffic survey estimated the first year's traffic would be over two million vehicles.

Due to financial constraints, project plans were revised to build only two lanes, leaving two lanes for later expansion. The original cost estimate for this project was \$78 million. The Commission issued \$96 million of 3-3/4% revenue bonds in April 1952, and groundbreaking took place in August of that year. Due to the occurrence of large slides during construction that had to be corrected at additional expense, revenue bonds for an additional \$37 million were sold at 4-1/8%. The year 1953 kicked off a period of intense earthmoving that at its peak reached a million cubic yards a week and totaled 30 million cubic yards.

In September 1954, the southern 36 miles of the roadway between Princeton and Beckley were opened, followed in November by the opening of the last 52 miles between Charleston and Beckley. At the time, this represented the greatest road building project West Virginia had ever seen. The \$1.5 million cost per mile was only one of the staggering statistics used by journalists as far away as Michigan and New York to describe their “amazement at an engineering achievement of such heroic proportions.”

In 1958, the Turnpike, along with those of Ohio and Pennsylvania, was incorporated into the nationwide Interstate and Defense Highway System established two years earlier. A decade later, major legislative changes, beginning with the Federal Highway Act of 1966, which set interstate design standards to require at least four traffic lanes were instituted. The Federal Highway Act of 1968 included a provision permitting the State to use interstate funding for right-of-way acquisition and reconstruction of the Turnpike commencing in 1970. Thus, planning for the upgrading began, and over the ensuing 17 years, sufficient interstate funding was secured to ensure completion of the Turnpike upgrading 13 years before the turn-of-the-century date originally anticipated.

Tri-Party Agreement of 1988

In 1971, the Turnpike Commission, the Federal Highway Administration (FHWA), and the West Virginia Department of Transportation (the Department), adopted an agreement necessary for the Department to participate in the reconstruction and improvement of the highway. This document charged the Commission with the responsibility for all maintenance of the improved facility utilizing toll revenues collected. This agreement was superseded and replaced in 1988.

The 1988 agreement specifies (a) that tolls collected be used only on the Turnpike for construction and reconstruction costs, and for costs necessary for the operation, maintenance, payment and refinancing of debt service including resurfacing, reconstruction, rehabilitation and restoration; (b) that any bonds issued or any costs incurred will not cause tolls to be increased to an unreasonable amount, and that prior to issuing any bonds the Authority will notify the Department and FHWA of the total amount to be issued and the specific amounts and purposes for which proceeds of such bonds are to be used; and (c) that all records are subject to audit by the Department and/or FHWA.

On September 2, 1987, the upgrading to interstate standards was concluded resulting in a scenic, modern four-lane divided interstate highway. The last contract to be completed was symbolic of the massive reconstruction of the Turnpike that involved over one-third more earthmoving than the original construction and cost approximately \$741 million. Financing was accomplished through the use of federal highway funds on a 90% federal/10% state matching basis. The West Virginia Department of Highways (WVDOH) supplied the 10% matching funds. The Authority repaid the 10% matching funds to the WVDOH with the last payment made in June 1994. These funds, administered by the WVDOH, were used on highway and related projects within 75 miles of the Turnpike.

On July 15, 1988, the final segment of Interstate 64 was completed from a point of intersection with the Turnpike five miles south of Beckley extending to the Virginia border. The Turnpike thus became a veritable east-west highway, as well as a north-south route. In conjunction with

the upgrading of the Turnpike to interstate standards and the completion of connecting interstate highways, a dramatic traffic growth occurred during the 1980s resulting in traffic doubling every five years. A sharp traffic increase also occurred after November 8, 1989 when toll collection was discontinued at 12 local interchanges, leading to heavy usage by local residents.

Today the Turnpike is an 88-mile toll roadway located between Charleston and Princeton, West Virginia. The Turnpike carries the designation of Interstate 77 (I-77) for its entire length and Interstate 64 (I-64) from Charleston to just south of the City of Beckley. I-77 is a north-south interstate route connecting Cleveland, Ohio to Columbia, South Carolina while linking major cities in Michigan, Ohio, West Virginia, Virginia, North Carolina and South Carolina. I-64 is an east-west interstate route connecting St. Louis, Missouri to Virginia Beach, Virginia while serving other major cities in Illinois, Indiana, Kentucky, West Virginia and Virginia.

The Turnpike also receives traffic from Interstate 79 (I-79) which feeds traffic into I-77 approximately 10 miles north of the northern terminus of the Turnpike. The Turnpike intersects with U.S. Rte. 60 near its northern terminus in Charleston. At the southern terminus near Princeton, the Turnpike intersects with U.S. Rte. 460. Also, U.S. Rte. 19 (Corridor L) near Beckley is an important connection that serves both local residents and as a “short cut” for I-79 traffic wishing to bypass Charleston, West Virginia.

The Turnpike uses a toll barrier system with three mainline toll plazas strategically located between Charleston and Princeton. There are now a total of 18 entrance-exit ramps from the Turnpike serving local traffic. All ramps are toll-free except for the U.S. Rte. 19 interchange just north of Beckley which also maintains a toll barrier facility.

In January 1998, the Authority initiated the development of a new toll collection system that would ensure the integration of emerging technologies into a state-of-the-art system. Key components of the system include: a revised toll classification system; increased levels of customer service; reduced toll plaza congestion; and electronic toll collection (ETC) technology providing regional interoperability. Transponders which can be mounted inside a vehicle’s windshield are issued to frequent Turnpike travelers including commercial vehicles. These enable those vehicles to pass through the toll plazas without stopping. All mainline and Corridor “L” toll lanes are equipped to read the transponders and automatically identify and classify those vehicles. In addition, each mainline toll plaza has six and Corridor “L” has four toll lanes equipped with a video surveillance system that provides for dedicated ETC use. Cameras are installed at each toll plaza to monitor traffic and they have the capability to identify hazardous material placards and other safety concerns.

Toll Plaza “A” at Ghent was converted to the new toll system on December 17, 1999; Toll Plaza “B” at Pax on January 17, 2000; Toll plaza “C” at Chelyan on January 26, 2000; and the Corridor “L” (U.S. Route 19) Ramp Plaza at North Beckley on March 24, 2000. A ten-category toll classification system and rate structure based on number of axles and height of vehicle was adopted, which simplifies vehicle classification and maintains revenue neutrality. In addition, the Authority was accepted as an associate member of the E-ZPassSM Inter Agency Group (IAG), which develops guidelines for achieving compatibility between agencies. This permits commercial vehicles and commuters equipped with transponders to travel nonstop through toll facilities that use E-ZPassSM in eleven eastern and mid-western states including West Virginia. A Customer Service Center was added to the Parkways Authority’s Administrative Headquarters to manage accounts and house the back-office system for computer data and hardware.

Traffic Management and Safety

The Turnpike is patrolled by a 28-member troop (Troop 7) of the West Virginia State Police who are responsible for traffic safety management and drug interdiction. Troop 7 patrols the 88-mile toll road 24 hours a day, seven days a week making the Turnpike the most heavily patrolled section of highway within the State. State Police members assigned to the Turnpike are dedicated to making the road a safer highway for use by the motoring public by monitoring motorist compliance with posted speed limits, assisting disoriented and disabled motorists, detecting and apprehending drivers impaired by alcohol/drugs and apprehending drug traffickers. Traffic safety management is enhanced by the addition of Laser Speed Monitoring Devices and Speed Monitoring Awareness Radar Trailers. One canine drug detection unit is utilized as part of the drug interdiction efforts. Troop 7's efforts have been bolstered by a Public Service Commission (PSC) officer whose focus is inspection and enforcement of commercial vehicle safety and operating regulations.

The Authority also provides a "Courtesy Patrol" to assist Turnpike travelers with disabled vehicles. Each of the three roadway maintenance sections provides a minimum of one patrol, seven days per week, twenty-four hours per day. During regular work hours all Turnpike maintenance vehicles participate in this patrol. Additionally, snow removal remains a top priority and major concern of the maintenance department. The Authority's annual operating budget includes funds necessary to maintain appropriately safe highways during the winter storm seasons.

Other safety services provided include eleven variable message signs to warn motorists of potential delays due to accidents, weather conditions, constructions zones or heavy traffic. Speed monitoring awareness radar trailers are employed to remind motorists of their speed. Rumble strips and snaps and 8 inch edge lines are utilized to enhance the travel lane for the safety of motorists. Finally, Safety Officers and Review Boards are utilized to monitor and maintain the Turnpike's safety and awareness programs.

Tourist Information Centers

Three travel plazas on the Turnpike provide restaurant, fuel, and rest facilities. These modern facilities provide convenient service to Turnpike travelers and also serve as tourist information centers that foster a positive image of West Virginia. Improvements to two facilities, Morton and Bluestone, were completed in 1991. These facilities are accessible only by northbound travelers. Reconstruction of the Beckley facility, which can be accessed by both northbound and southbound motorists was completed in July 1993. In addition to these three full service facilities are two rest areas accessible to southbound motorists. The rest area at mile 69 provides restrooms, snacks and sandwiches, vending machines, picnic shelters, public telephones, lighting and extensive landscaping. The rest area at Mile 18 has no facilities, but provides a scenic view of the Bluestone River.

The Turnpike signed a ten-year food service contract with HMS Host to operate its food and restaurant concessions effective January 2000. All three plaza restaurants were renovated during fiscal year 2001 to provide new food concepts and greater services. Fuel services are under the management of Petroleum Marketers, Inc. (PMI).

Capital Improvements Program

The Parkways Authority is committed to a proactive rehabilitation plan to safeguard its existing assets. Management and the Authority's consulting engineer have developed a 30-year Parkways Authority Master Plan (the Plan) to provide the Authority with near-, mid-, and long-term maintenance, repair, construction, and capital improvement requirements. The Plan assists management and members of the Authority in their planning, programming and budgeting endeavors. Subplans include the Pavement and Bridge Rehabilitation Plan and the Building Facilities Plan. The Plan is updated frequently to reflect current conditions and future trends.

The Authority has established a "Reserve Revenue Fund" to pay for future pavement and bridge rehabilitation projects such as asphalt overlays, pavement restoration techniques, and bridge painting and retrofit work. In the past, the Authority has funded extraordinary maintenance, capital projects and other works from a combination of toll revenues and bond proceeds.

The Authority addresses minor substructure repairs and performs preventative maintenance work to extend the time between major rehabilitation projects. The Authority is continually reviewing its capital improvement program and is determining the exact priorities of projects to be undertaken. Each capital improvement project is subject to the Authority's approval after review of the costs and benefits and evaluation of the availability of resources.

Economic Development and Tourism

The Authority expanded its role to include the promotion and enhancement of economic development, tourism, agricultural and industrial development of West Virginia. Since its inception, the Authority has invested approximately \$4,700,000 in various economic development projects principally to spur light manufacturing and high technology concerns and to stimulate employment in the vicinity of the Turnpike.

The travel and tourism industry also presents significant opportunities for economic development and entrepreneurial efforts in West Virginia. The Authority is participating in those activities that provide technical assistance in tourism planning, destination development, and hospitality training. Specifically, the bolstering of West Virginia's chief cottage industry, arts and crafts, is achieved at the retail shops at the Beckley, Morton and Bluestone tourist information centers, as well as the West Virginia Tourist Information and Welcome Center located at Princeton. A major emphasis in the development of the travel plazas/tourist information centers is to enhance and promote the image of the State of West Virginia to motorists and visitors to the State. The arts and crafts gift shops have also heightened the awareness of the emerging arts and crafts industry within the State.

Cottage industries are important to West Virginia and the Parkways Authority provides a centralized system called *TAMARACK* that enables artists and craftsmen to focus their efforts on quality and production. *TAMARACK*, through its warehousing operation, provides a wholesale market for the individual artisan. As part of the Authority's focus on economic development and tourism, the Authority constructed a 59,000-square-foot arts and crafts center, named *TAMARACK-The Best of West Virginia*, on its 104-acre tract adjacent to the Beckley Service Plaza and opened this facility in May 1996. Subsequently, the Authority Board renamed the building "The Caperton Center" in honor of then Governor Gaston Caperton to recognize his visionary leadership in the expansion of this West Virginia industry.

Located at Exit 45 of the Turnpike, near Beckley, the Caperton Center's main purposes are to promote tourism, preserve West Virginia's culture and heritage, and stimulate economic growth for small producers of high quality arts, crafts, and food products. Accordingly, this facility features *TAMARACK-The Best of West Virginia*, which serves as a demonstration area and retail outlet for West Virginia arts, crafts and food products. In addition, it contains the 178-seat Governor Hulett C. Smith Theater for performing arts and various video presentations of West Virginia attractions and the David L. Dickirson Fine Arts Gallery which showcases paintings, photographs, sculptures and other fine art created by West Virginia artists. The Greenbrier, a four-star and five-diamond rated resort located in White Sulphur Springs, West Virginia, also operates a restaurant featuring "A Taste of West Virginia" within the Caperton Center. In addition to daily restaurant operations, the food court caters to bus tours, festivals, conferences and a dinner theater.

The Center's construction was partially financed through the issuance of \$9 million of Series 1994 commercial development revenue bonds. Construction was completed during April 1996 and the Caperton Center was opened to the public on May 13, 1996. In December 2001, the Authority issued bonds to partially finance a 22,000 square foot addition to the Caperton Center to provide an educational and conference center. The Tamarack Conference/Education Center opened June 20, 2003 and offers a wide range of flexibility to accommodate conferences, banquets, educational events, and expositions. The Center's design included expansion of food preparation facilities, the ability to subdivide the Center's meeting rooms, modern education and conference equipment, and the ability to host large exhibits and expositions in the main conference hall.

A new interchange with mainline upgrades was constructed to provide northbound and southbound access to the Beckley travel plaza, Caperton Center, and Raleigh County Route 11 (Dry Hill Road). This interchange also eliminated an objectionable traffic weave on the southbound roadway between the Beckley travel plaza and Harper Road interchange. The cost of this project, which opened to traffic on May 22, 1996 and was completed in November 1996, was funded by "Reserve Revenues" and toll revenues of the Authority.

Accounting Policies and Internal Controls

The Authority's accounting policies are briefly described in Note 1 of the financial statements.

Management of the Authority is responsible for establishing and maintaining internal controls designed to ensure that the assets of the Authority are protected from loss, theft, or misuse and to ensure that adequate accounting data are compiled to allow for the preparation of financial statements in conformity with accounting principles generally accepted in the United States of America. Internal control is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) the cost of a control should not exceed the benefits likely to be derived; and (2) the valuation of costs and benefits requires estimates and judgments by management. The Authority believes that the organization's internal controls adequately safeguard assets and provide reasonable assurance of proper recording of financial transactions.

Fiduciary Operations

The Authority's Trustee, United Bank, Inc. of West Virginia, works closely with financial management and staff to ensure that the Authority is in compliance with the terms and covenants of its Trust Agreements and that all financial and operational decisions are made in the best interest of the Authority's bondholders.

Debt Administration

As of June 30, 2006, the Authority's outstanding debt, net of unamortized premiums, discounts and issuance costs, was approximately \$96,448,000. The current portion of this debt totals \$3,239,000. Final maturity on this debt is scheduled for the year 2019.

In addition to its enabling legislation, the operations of the Authority are principally governed by the February 15, 1993 Trust Indenture as supplemented by the Series 2002 Bonds Supplemental Indenture dated as of February 1, 2002 and further supplemented by the Series 2003 Bond Supplemental Indenture dated February 18, 2003; The Tri-Party Agreement of 1988 entered into in connection with the issuance of \$143,000,000 in revenue bonds on November 7, 1989; and the December 1, 2001 Trust Indenture and related agreements applicable to the Caperton Center revenue bonds.

As demonstrated by the statements included in the financial section of this report, the Authority continues to meet its responsibility for compliance with the trust indentures and exhibits sound financial and operating management, which is essential as the Authority has relied and must continue to rely on toll revenues (relating to the 1993, 2002, and 2003 Series Bonds) and certain nontoll revenues (relating to the 2001A and 2001B Series Bonds), rather than tax dollars, for funding of debt service and operations.

Basis of Accounting

The operations of the Authority are accounted for as an enterprise fund on the accrual basis of accounting in order to recognize the flow of economic resources. Under this method of accounting, revenues are recognized in the period in which they are earned, expenses are recognized in the period in which they are incurred and depreciation of assets is recognized.

Cash Management

The trust indentures and the agreement with the insurer of the bonds (Financial Guaranty Insurance Company) restrict investments that can be made by the Authority. Cash, temporarily idle during the year, was invested primarily in United States Treasury and government agencies obligations, corporate bonds and notes, repurchase agreements and a United States Treasury mutual fund, as permitted by the trust indentures. All cash deposits were either insured by the federal depository or collateralized.

The Authority retains the services of an investment manager to assist with the fulfillment of its fiduciary responsibilities. On June 1, 2002, the investment management services were awarded to United Bank, Inc. of West Virginia. The Authority's investment portfolio is maintained under guidelines established by the Authority, which are in compliance with the trust indentures.

Risk Management

The Authority has established policies and procedures whose objectives, among other things, include minimizing the risks associated with operation of the Turnpike. The Authority has obtained coverage for job-related injuries of employees through its participation in the West Virginia State Workers' Compensation Fund and health coverage for its employees with the West Virginia Public Employees Insurance Agency. The Authority maintains property and general liability insurance with the West Virginia State Board of Risk and Insurance Management. The Authority maintains an additional umbrella liability policy which provides coverage of \$10,000,000 over and above the coverage provided by the West Virginia State Board of Risk and Insurance Management.

AWARDS AND ACKNOWLEDGEMENTS

Independent Audit

The trust indentures require an annual audit by independent certified public accountants. The accounting firm of Gibbons & Kawash was engaged by the Authority to perform the audits for the fiscal years ended June 30, 2006 and 2005.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Authority for its comprehensive annual financial report for each of the 16 years in the period ended June 30, 2005, including the first year of operations of the Authority. In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgments

The preparation of this comprehensive annual financial report on a timely basis was made possible with the assistance of the Authority's administrative and accounting staff, the consulting engineers, the independent auditors, and the leadership and support of the Members and the General Manager of the West Virginia Parkways, Economic Development and Tourism Authority. I express my sincere appreciation for the professional contributions made by these individuals in the preparation of this report.

Parrish T. French
Director of Finance

Certificate of Achievement for Excellence in Financial Reporting

Presented to

West Virginia Parkways,
Economic Development and
Tourism Authority

For its Comprehensive Annual
Financial Report
for the Fiscal Year Ended
June 30, 2005

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

Tourism Authority**

INDEPENDENT AUDITORS' REPORT

To the Members of the West Virginia Parkways, Economic
Development and Tourism Authority

We have audited the accompanying balance sheet of the West Virginia Parkways, Economic Development and Tourism Authority, a component unit of the State of West Virginia, as of June 30, 2006 and 2005, and the related statements of revenues, expenses, and changes in fund net assets and cash flows for the years then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Parkways, Economic Development and Tourism Authority as of June 30, 2006 and 2005, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis on pages 3 through 8 is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

The introductory and statistical sections listed in the table of contents are presented for the purpose of additional analysis and are not a required part of the financial statements of the West Virginia Parkways, Economic Development and Tourism Authority. Such additional information has not been subjected to the auditing procedures applied in our audit of the financial statements and accordingly, we express no opinion on it.

West Virginia Parkways, Economic Development and Tourism Authority
Management's Discussion and Analysis (Unaudited)
Years Ended June 30, 2006 and 2005

This section of the West Virginia Parkways, Economic Development and Tourism Authority's (the Authority) annual financial report presents management's discussion and analysis of the Authority's financial performance during the fiscal year that ended June 30, 2006. Please read it in conjunction with the Authority's financial statements, which immediately follow this section.

FINANCIAL HIGHLIGHTS

- Toll revenues for the fiscal year ended June 30, 2006 were \$61.9 million and were 6.6% higher than toll revenues in the previous fiscal year.
- Total operating expenses, exclusive of depreciation, were approximately \$40.2 million in the fiscal year ended June 30, 2006, an increase of 4.8%. Operating expenses were approximately 5.1% below the annual operating budget.
- Restaurant and service station concession revenues from four travel plazas totaled approximately \$2.5 million for fiscal year ended June 30, 2006, an increase of 3.3% over the prior year.
- Sales of *Tamarack-The Best of West Virginia* at the Caperton Center arts and crafts center were approximately \$7.7 million during the fiscal year ended June 30, 2006, an increase of 3.9% over the prior year.

In 2003, the Authority received reports from its traffic and consulting engineers indicating that traffic in and around Beckley, West Virginia was exceeding the design level of service during weekend peak traffic hours. To prevent unacceptable delays and congestion, it was recommended that the Authority resurface and widen an approximately eight mile section of the turnpike in the vicinity of Beckley.

In March 2004, legislation was enacted that increased the Authority's toll revenue bonding limit. This legislation included a requirement that the Authority adopt an irrevocable resolution to complete and fund a Shady Spring connector and interchange, also near Beckley, before any new bonds could be issued.

In April 2004, the Authority gave its engineers a notice to proceed for the preliminary studies, surveys, mapping and design needed for both projects. By November 2005, cost estimates for both projects had been increased and a backlog of other highway rehabilitation projects had been refined. In consultation with the Authority's financial advisor, and pursuant to appropriate trust indentures, the Authority supported a new toll rate schedule, as recommended and certified by the Authority's traffic engineers.

West Virginia Parkways, Economic Development and Tourism Authority
Management's Discussion and Analysis (Unaudited)
Years Ended June 30, 2006 and 2005

Effective January 1, 2006, the new toll schedule increased mainline rates by approximately 60%. The North Beckley Plaza tolls and the PACC program rates remained the same. The increase was the first rate increase on the West Virginia Turnpike since 1981. However, on January 3, 2006, the Authority became aware of a court challenge to the toll increase.

On February 13, 2006, a Kanawha County Circuit Judge issued a letter ruling that amounted to a preliminary injunction barring the toll rate increase. Steps were taken to immediately comply with the judge's ruling and the previous toll rate schedule was put back into effect on February 14, 2006. In March 2006, legislation was passed with numerous provisions relating to the Authority including removal of the Shady Spring requirement, elimination of the Authority's ability to issue new revenue bonds, additional requirements relating to public hearings and provisions for a new discount program.

The rollback of the recommended toll increase, together with mature traffic patterns, and rapidly increasing costs to repair, rehabilitate and reconstruct the Turnpike's aging roadways and facilities, have led the Authority to reschedule general maintenance and proposed upgrades and to prioritize projects considering patron safety, facility preservation, riding quality and aesthetics, in that order. While the Authority will continue to maintain sufficient liquidity levels and strong debt service ratios, its ability to maintain system assets and adequately fund capital needs will continually be evaluated by its consulting engineers. Initiated by Governor Manchin, the Authority has appointed the Public Resources Advisory Group, a nationally recognized investment and financial advisory firm, to complete a comprehensive review of the Authority. This report is expected by 2007.

OVERVIEW OF THE FINANCIAL STATEMENTS

The financial section of this annual report consists of management's discussion and analysis (this section), the basic financial statements, and the notes to the financial statements.

The financial statements provide both long-term and short-term information about the Authority's overall financial status. The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data.

The Authority's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units on an accrual basis. Under this basis, revenues are recognized in the period in which they are earned, expenses are recognized in the period in which they are incurred, and depreciation of assets is recognized in the Statements of Revenues, Expenses, and Changes in Fund Net Assets. All assets and liabilities associated with the operation of the Authority are included in the Balance Sheet.

	<u>\$ 582,633</u>	<u>\$ 592,538</u>	<u>\$ 603,600</u>	<u>(1.7)%</u>

ASSETS

Total current assets and long-term investments have increased \$5.8 million during fiscal year 2006. \$3.5 million of the increase is the result of the Authority increasing its reserves from funds related to the temporary toll increase. \$1.9 million of this increase results from the Authority's new program of financing new equipment purchases with tax-exempt capital leases. Capital assets decreased \$15.7 million as a result of \$29.9 million of depreciation expense offset by capital asset additions of \$14.2 million in highway improvement, facilities and equipment purchases. In 1993, the Authority adopted an ongoing 30-year strategic master plan for major capital improvements and highway maintenance projects. The Authority has adopted a pay-as-

West Virginia Parkways, Economic Development and Tourism Authority
Management's Discussion and Analysis (Unaudited)
Years Ended June 30, 2006 and 2005
(Continued)

you-go strategy and has not financed with bond issues any highway project since 1989. Major projects included \$3.3 million towards asphalt resurfacing between mileposts 21 and 24 northbound. Detailed information on capital assets is located in Note 5 of the financial statements.

LIABILITIES

Current liabilities and capital lease payable increased \$1.8 million due to financing equipment purchases with tax-exempt capital leases. The balance of long-term revenue bonds payable decreased \$5.6 million as a result of regularly scheduled principal payments and amortization of bond deferrals. As detailed in Note 6 of the financial statements, the Authority issued Series 2001 revenue bonds payable from concession, *Tamarack*, and other non-toll revenues to enhance the economic development mission of the Authority. The remaining outstanding Series 1993, 2002 and 2003 bonds are payable from toll revenues.

The West Virginia Parkways, Economic Development and Tourism Authority's credit ratings are among the best for similar facilities worldwide. The current agency ratings are as follows:

<u>Agency</u>	<u>Rating</u>
Standard & Poor's	AA-
Moody's Investors Service	AA3

A schedule of results of operations for the years ended June 30, 2006, 2005 and 2004 follows (in thousands):

	2006	2005	2004	Change '06-'05
Revenues:				
Operating revenues:				
Toll revenues	\$ 61,858	\$ 57,999	\$ 56,854	6.6%
Other revenues	7,319	6,911	6,418	5.9%
Nonoperating revenues:				
Interest earned on investments	1,445	1,285	381	12.5%
Total revenues	70,622	66,195	63,653	6.7%

Years Ended June 30, 2006 and 2005
(Continued)

	<u>2006</u>	<u>2005</u>	<u>2004</u>	<u>Change '06-'05</u>
Expenses:				
Operating expenses:				
Maintenance	18,004	16,290	16,324	10.5%
Toll collection	9,426	9,574	10,043	(1.5)%
Traffic enforcement	2,785	2,443	2,042	14.0%
General and administrative	10,020	10,095	8,932	(0.7)%
Depreciation	29,877	29,779	28,675	0.3%
Nonoperating expenses:				
Interest expense	<u>6,521</u>	<u>7,096</u>	<u>7,174</u>	<u>(8.1)%</u>
Total expenses	<u>76,633</u>	<u>75,277</u>	<u>73,190</u>	<u>1.8%</u>
Net loss	<u>\$ (6,011)</u>	<u>\$ (9,082)</u>	<u>\$ (9,537)</u>	<u>(33.8)%</u>

Toll revenues increased 6.6% in fiscal year 2006 from fiscal year 2005 after an increase of 2.4% in fiscal year 2005. Excluding the impact of the temporary rate increase, toll revenue would have increased only 0.6%, as commercial vehicle transactions decreased 1.2% to 26.7 million transactions.

On January 1, 1994, the Authority created its Parkways Authority Commuter Card (PACC) program for high frequency users of the West Virginia Turnpike that include non commercial passengers, automobiles, and light trucks. This discount program costs the user \$25 per quarter or \$95 per year, per mainline barrier. There were approximately 13,800 PAC cards issued at June 30, 2006. Daily commuters can achieve up to a 90% savings through participation in this program.

Other revenues increased 5.9% in fiscal year 2006 due to increased sales occurring at the Caperton Center. Other revenues in the aggregate were consistent with fiscal year 2006 compared to 2005. Included in this account are revenues from travel plaza restaurants that increased 5.7% to \$1.7 million after increasing 6.2% in 2005. The increase in food sales is due to the growth in traffic after establishing and continuing to update food concepts in demand by the general public. A ten-year agreement with HMS Host (restaurant operator) took effect on January 1, 2000, and provides the Authority revenue equal to 18% of store gross receipts. Revenues from service stations decreased 1.2% to \$.8 million after increasing 1.2% in fiscal year 2005. On January 3, 2005, the Authority signed a five-year contract with PM Terminals, Inc. (the service station operator) providing the Authority revenue at the fixed rate of \$.1057 per gallon of gasoline and \$.1006 per gallon of diesel fuel sold.

West Virginia Parkways, Economic Development and Tourism Authority
Management's Discussion and Analysis (Unaudited)
Years Ended June 30, 2006 and 2005
(Continued)

Total expenses increased 1.8% to \$76.6 million after an increase of 2.9% in 2005. Included in maintenance expenses are \$1.2 million of engineering and design costs related to the mandated Shady Spring project which has now been removed. Excluding this one-time charge, expenses would have increased by 0.2% reflecting the Authority's continued cost savings programs despite challenges caused by rising insurance premiums, fuel prices, and raw materials costs. Traffic enforcement increased \$342,000 as a result of the establishment of a full staff of officers, after years of incomplete staffs as the results of National Guard duty overseas. The decrease in interest expense is mainly the result of principal payments on the Authority's outstanding bonds.

CONTACTING THE AUTHORITY'S FINANCIAL MANAGEMENT

This financial report is designed to provide our bondholders, patrons, and other interested parties with a general overview of the Authority's finances and to demonstrate the Authority's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the West Virginia Parkways Authority, Director of Finance, P. O. Box 1469, Charleston, WV 25325-1469.

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS

1 - FINANCIAL REPORTING ENTITY

The West Virginia Parkways, Economic Development and Tourism Authority (the Authority) was created as the successor-in-interest to the West Virginia Turnpike Commission (the Turnpike Commission) by an Act (the Act) of the West Virginia Legislature effective June 1, 1989. All the duties, powers, and functions of the Turnpike Commission were transferred to the Authority. Under the Act, the Authority assumed all assets, property, obligations, indebtedness, and other liabilities of the Turnpike Commission and personnel of the Turnpike Commission were transferred to the employment of the Authority. The Authority has the power to enact and amend its operating budget, and receives no appropriations from the State of West Virginia (the State). The State's Governor or his designee serves as chairman of the Authority and the State's Secretary of Transportation serves as a board member. The other five Authority members are appointed by the Governor with the approval of the Senate. As the State is able to impose its will over the Authority, the Authority is considered a component unit of the State and its financial statements are discretely presented in the comprehensive annual financial report of the State.

In evaluating how to define the Authority for financial reporting purposes, management has considered all potential component units. The decision to include a potential component unit in the reporting entity is made by applying the criteria set forth in generally accepted accounting principles. Generally accepted accounting principles define component units as those entities which are legally separate governmental organizations for which the appointed members of the Authority are financially accountable, or other organizations for which the nature and significance of their relationship with the Authority are such that exclusion would cause the Authority's financial statements to be misleading. Since no such organizations exist which meet the above criteria, the Authority has no component units.

2 - SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The Authority is accounted for as a special purpose government engaged in business type activities. In accordance with Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments*, and accounting principles generally accepted in the United States of America, the financial statements are prepared on the accrual basis of accounting, using the flow of economic resources measurement focus. Under this basis of accounting, revenues are recognized when earned and expenses are recognized when incurred. As

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

2 - SIGNIFICANT ACCOUNTING POLICIES (Continued)

Basis of Accounting (Continued)

permitted by GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting*, the Authority has elected not to adopt Financial Accounting Standards Board (FASB) statements and interpretations issued after November 30, 1989, unless the GASB specifically adopts such FASB statements or interpretations.

The Authority is included in the State's basic financial statements as a business type activity using the accrual basis of accounting. Because of the Authority's business type activities, there may be differences between the amounts reported in these financial statements and the basic financial statements of the State as a result of major fund determination.

Cash Equivalents

For purposes of the statement of cash flows, the Authority considers all highly liquid investment securities purchased with an original maturity of three months or less to be cash equivalents.

Investments

Investments are reported at fair value and realized and unrealized gains or losses are reported in the statement of revenues, expenses, and changes in fund net assets as a component of investment income.

Inventories

Inventories are valued at the lower of cost (first-in, first-out method) or market.

Economic Development Projects

In accordance with the Act, and as provided for under the Trust Indentures, as defined elsewhere herein, certain funds of the Authority are unrestricted and available to further economic development and tourism within a prescribed service area. From time to time, the Authority evaluates proposals for investment in economic development and tourism projects,

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

2 - SIGNIFICANT ACCOUNTING POLICIES (Continued)

Economic Development Projects (Continued)

which may be unrelated to improvements in the Authority's infrastructure. Investments in such projects are generally varied forms of equity participation, and typically provide for below-market returns relative to investment risk. The Authority accounts for the majority of such investments on the cost-recovery method. Annually, the investments are evaluated for impairment in value based upon a review of the investee's current financial condition, anticipated future levels of operations, and consideration of the likelihood of the investee ultimately being capable of returning to the Authority its original investment. To the extent any such returns are in excess of the Authority's original investment, the excess is recorded as income when received.

Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, and similar items), are reported at historical cost and include interest on funds borrowed to finance construction. Capital assets are defined by the Authority as assets with an initial, individual cost of more than \$30,000 for turnpike activities and \$2,500 for economic development activities and an estimated useful life in excess of one year. Contributed infrastructure assets were valued at the Turnpike Commission's (predecessor's) cost basis, adjusted for depreciation occurring from the date the assets were placed in service through the date of transfer of such assets to the Authority. Depreciation is computed using the straight-line method over the following estimated economic useful lives of the assets; buildings (30 years); equipment (5-10 years); and infrastructure (10-50 years).

Compensated Absences and Post-Employment Benefits Other Than Pension Benefits

Employees fully vest in all earned but unused vacation and the Authority accrues for obligations that may arise in connection with compensated absences for vacation at the current rate of employee pay. Annually, the Authority pays employees for one-fourth of the unused sick leave earned in the current period at the employees' current pay rate. The Authority accrues its estimated obligation for unused sick leave. In accordance with State personnel policies, employees vest in any remaining unused sick leave only upon retirement, at which time such unused leave can be converted into employer paid premiums for post-retirement health care coverage or additional periods of credited service for purposes of determining retirement benefits, using the "termination payments" method. The cost of retiree health care benefits is recognized as an expense as incurred.

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

2 - SIGNIFICANT ACCOUNTING POLICIES (Continued)

Bond Discounts, Premiums, Issuance Costs and Deferred Loss on Advance Refunding

Bond discounts, premiums, and issuance costs are being accreted and amortized using the effective interest method over the varying terms of the bonds issued. The difference between the reacquisition price and the net carrying amount of refunded debt is reported in the financial statements as a deduction from the refunding bonds, with the related amortization of such deferral being charged to interest expense using the effective interest method.

Net Assets

Net assets are the difference between assets and liabilities. Net assets invested in capital assets consist of all capital assets, less accumulated depreciation and any outstanding debt related to the acquisition, construction or improvement of those assets. Net assets are restricted when there are legal limitations imposed on their use by legislation or external restrictions by other governments, creditors, or grantors.

Operating Revenues and Expenses

Operating revenues and expenses are those that result from providing services and producing and delivering goods. It also includes all revenues and expenses not related to capital and related financing, non-capital financing, or investing activities. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Other Revenues

Other revenues primarily consist of concession sales at the travel centers on the West Virginia Turnpike and craft and food sales at the Caperton Center (also known as TAMARACK-*The Best of West Virginia*). The amount of sales reported is net of costs of goods sold. The related general and administrative expenses are included under operating expenses in the statement of revenues, expenses, and changes in fund net assets.

3 - DEPOSITS AND INVESTMENTS

The Authority has adopted investment guidelines that are consistent with those specified in the bond trust indentures for its outstanding bonds. Those guidelines authorize the Authority to invest all bond proceeds and other revenues in obligations of the United States

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

3 - DEPOSITS AND INVESTMENTS (Continued)

and certain of its agencies, certificates of deposit, direct and general obligations of states, repurchase agreements relating to certain securities, and guaranteed investment contracts. Investments are managed by the financial institution servicing as the trustee for the Authority. The Authority has not adopted a formal investment policy beyond the requirements of the bond indentures.

Interest Rate Risk – Investments

As a means of limiting its exposure to fair value losses resulting from rising interest rates, the Authority's bond indentures limit at least half of the Authority's investment portfolio to maturities of less than five years. As of June 30, 2006, the Authority had the following investments and maturities (in thousands):

<u>Investment Type</u>	<u>Fair Value</u>	<u>Less than 1</u>	<u>1-5</u>	<u>6-10</u>	<u>10+</u>
Mutual bond funds	\$ 7,709	\$ 7,518	\$ 191	\$ -	\$ -
U.S. Treasury Obligations	98	98	-	-	-
Government agency bonds	25,148	8,855	13,124	2,520	649
State government bonds	669	100	381	188	-
Corporate bonds	3,973	364	2,511	72	1,026
Repurchase agreements	<u>6,031</u>	<u>6,031</u>	<u>-</u>	<u>-</u>	<u>-</u>
	<u>\$ 43,628</u>	<u>\$ 22,966</u>	<u>\$ 16,207</u>	<u>\$ 2,780</u>	<u>\$ 1,675</u>

Concentration of Credit Risk – Investments

As of June 30, 2006, the Authority had investment balances with the following issuers which were greater than or equal to 5% of the total investment balance:

<u>Type</u>	<u>Issuer</u>	<u>Percentage of Investments</u>
Mutual bond funds	Federated Government Obligations Fund	14%
Government agency bonds	Federal Home Loan Bank	25%
	Federal Home Loan Mortgage Corp.	8%
	Federal National Mortgage Association	5%

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

3 - DEPOSITS AND INVESTMENTS (Continued)

Concentration of Credit Risk – Cash Deposits

The Authority's cash deposits with financial institutions were \$1,293 at June 30, 2006. These deposits, which had a bank balance of \$1,783, are either insured by the Federal Deposit Insurance Corporation or collateralized with securities held in the Authority's name by its agent.

Credit Risk – Investments

The following table provides information on the credit ratings of the Authority's investments (in thousands):

<u>Security Type</u>	<u>Fitch</u>	<u>Moody's</u>	<u>S&P</u>	<u>Fair Value</u>
Mutual bond funds	AAA	Aaa	AAA	\$ 7,709
Government agency bonds	AAA	Aaa	AAA	25,148
State government bonds	AAA	Aaa	AAA	669
Corporate bonds	AAA	Aaa	AAA	<u>3,973</u>
				<u>\$ 37,499</u>

Unrated securities included a repurchase agreement of \$6,031. Acceptable collateral for the repurchase agreement includes United States Treasury and government agency securities equal to 105% of the carrying value, all of which carry the highest credit rating.

Credit risk is managed by limiting investments to the following types of debt securities in accordance with the Authority's bond indentures: direct obligations of or obligations guaranteed by the United States of America, the State of West Virginia or any other state, provided that obligations of other states meet certain requirements, obligations of certain federal agencies, certain types of indebtedness of public agencies or municipalities, and corporate indebtedness meeting certain requirements.

Custodial Credit Risk – Investments

For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the Authority will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. As of June 30, 2006, the Authority held no securities that were subject to custodial credit risk.

3 - DEPOSITS AND INVESTMENTS (Continued)

	June 30	
	2006	2005
Insurance Liability	1,000	1,000
Economic Development and Tourism	4,332	3,783
	26,416	26,430
Reserve Revenue, restricted by Tri-Party Agreement	15,763	10,659
Facility Improvement	636	405
Highway/Bridge Contingency, restricted by Tri-Party Agreement	1,000	1,000
Unredeemed coupons	228	228
Total restricted and designated assets	\$ 44,043	\$ 38,722

The assets restricted by the 1989, 1993, 2002, and 2003 Trust Indentures must be used for construction, turnpike maintenance and operation, and debt service. The Trust Indentures require that the balance in the 1989, 1993, 2002, and 2003 Reserve Account equal maximum annual debt service for all bonds. The balance in the 1989, 1993, 2002, and 2003 Debt Service Accounts are required by the Trust Indentures to have a balance equal to accrued debt service for the current year plus one-twelfth of the debt service which will accrue in the next succeeding fiscal year. The Trust Indentures also require that a reserve be established for Renewal and Replacement that equals the consulting engineer's recommendations for the year. The Operations and Maintenance Account is required by the Trust Indentures to maintain a balance equal to one-eighth of budgeted operating expenses for the fiscal year.

The Insurance Liability account is a self-insured fund that covers the Authority against risk of loss from natural disaster, among other items, and is designated as the Authority's percentage of contribution in the event of a disaster.

The Economic Development and Tourism Account is designated to be used for economic development and tourism projects by the Authority. All revenues derived from these projects, including recovery of principal, are pledged as security for the 2001A and 2001B Bonds.

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

3 - DEPOSITS AND INVESTMENTS (Continued)

The Contingency Highway and Bridge Reserve Account, established by the Authority and restricted by the Tri-Party Agreement, was established in February 2002 in the event that the Authority needed additional cash or liquidity for highway and bridge projects for any reason (for example, without limitation, due to unanticipated traffic reductions resulting in toll revenue reductions, unanticipated cost overruns on one or more projects, the need to begin or complete a project before originally planned, terrorist events, or failure to achieve all anticipated savings from the issuance of the Series 2002 and 2003 Refunding Bonds). This reserve is not a requirement by the bondholders and will not be used to pay debt service on any bonds of the Authority, but it will be used at the Board's discretion for costs of highway and/or bridge projects in emergency situations.

The Reserve Revenue Account, restricted by the Tri-Party Agreement dated December 1988 among the West Virginia Department of Transportation, the Federal Highway Administration, and the Authority, can only be used for maintenance and operation of the Turnpike and for debt service.

The Unredeemed Coupons Account has been designated by the Authority to fund redemption of interest coupons that have matured but are not yet redeemed for bonds issued under previous bond indentures.

4 - ECONOMIC DEVELOPMENT PROJECTS

In May 1996, as part of the Authority's focus on economic development and tourism, the Authority opened the Caperton Center, a 59,000 square-foot arts and crafts center near Beckley, West Virginia. The Caperton Center's main purposes are to stimulate economic growth for small producers of high quality arts, crafts, and food products, and promote tourism. The facility serves as a demonstration area and retail outlet for West Virginia arts, crafts, and food products, and contains a theater for performing arts and presentations of West Virginia attractions. In June 2004, a 22,000 square foot expansion for a conference center was completed which will further enhance the image of West Virginia and attract more visitors. Its operations are funded in part by Authority revenues that are unrestricted under the terms of the Authority's existing 1989 and 1993 Trust Indentures and the Tri-Party Agreement.

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

4 - ECONOMIC DEVELOPMENT PROJECTS (Continued)

Prior to the development of the Caperton Center, the Authority invested approximately \$4,700,000 primarily to foster economic development, including employment stimulation, in the Authority's service area. These investments provide the Authority with minimal economic return. Included in these investments is a \$2,000,000 limited partnership interest in certain real property to be held for lease. The lessee is utilizing the facility as an insurance claims processing center and has created or maintained nearly 625 jobs. The Authority has also made additional permitted economic development investments in various light manufacturing and high technology concerns. Certain of the investees have encountered economic difficulties and management has established a valuation allowance, based on an evaluation of the investees' prospects for future economic success and anticipated return of the Authority's investment.

The Authority issued revenue bonds to finance the construction of the Caperton Center within the economic development and tourism activities. Both the turnpike operations and the economic development and tourism activities are accounted for in a single fund. However, investors in these revenue bonds rely solely on the revenue generated by the economic development and tourism activities for repayment. Summary financial information for the economic development and tourism segment activities for the years ended June 30, 2006 and 2005, is presented below (in thousands):

6 - REVENUE BONDS PAYABLE (Continued)

	2006	2005
Series 2002 Serial Bonds, issued \$44,205 in February 2002 at 3.50% to 5.25%, due in varying installments from May 2002 through May 2019	34,885	36,805
Series 2003 Variable Rate Demand Revenue Refunding Bonds, \$63,900 at variable rates, due in varying installments through May 2019	63,300	63,500
Total revenue bonds payable	106,999	110,046
Add:		
Unamortized premium and accumulated appreciation on Premium Capital Appreciation Bonds	5,396	8,874
Less:		
Unamortized deferred loss on advance refunding	(11,230)	(12,184)
Unamortized discount and issuance costs	(1,478)	(1,638)
Current portion of revenue bonds payable	(3,239)	(3,047)
	\$ 96,448	\$ 102,051

In 1993, the Authority issued \$118,781,000 of Revenue Refunding Bonds for the express purpose of defeasing \$111,245,000 of 1989 Series Bonds, all of which are no longer outstanding. The advance refunding resulted in a \$14,350,000 deferred loss arising from the difference between the reacquisition price and the net carrying amount of the refunded debt. Amortization of this deferral, charged annually to interest expense through 2019, approximated \$63,000 and \$89,000 in 2006 and 2005, respectively. The Authority completed the advance refunding to reduce its aggregate debt service payments by almost \$7,400,000 over a 26-year period (life of the refunding bonds) and obtain an economic gain (difference between the present values of the old and new debt service payments) of \$5,200,000.

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

6 - REVENUE BONDS PAYABLE (Continued)

The outstanding 1993 Revenue Refunding Bonds were comprised of premium capital appreciation bonds as of June 30, 2006 and 2005.

Interest on the Series 1993 Capital Appreciation Bonds is compounded on May 15 and November 15 of each year and will be payable at maturity of such bonds.

The Revenue Bonds under the 1993, 2002 and 2003 Trust Indentures are secured by a pledge of substantially all Authority operating revenues and all monies deposited into accounts created by the Trust Indentures.

In 2002, \$5,695,000 of Raleigh County, West Virginia, Taxable Commercial Development Revenue Refunding Bonds, Series 2001A and \$5,900,000 of Commercial Development Revenue Bonds, Series 2001B (the Series 2001 Bonds) were issued pursuant to a bond resolution adopted by the County Commission of Raleigh County, West Virginia (the issuer), and a Trust Indenture, dated December 1, 2001 (the Indenture). The bond proceeds of the Series 2001A were used to advance refund \$1,735,000 of the Series 1994 Bonds and \$4,075,000 of the Series 1996 Bonds, of which \$3,710,000 remains outstanding but is considered defeased and accordingly has been removed from the Authority's financial statements. The advance refunding resulted in a \$491,000 deferred loss arising from the difference between the reacquisition price and the net carrying amount of the refunded debt. Amortization of this deferral, charged annually to interest expense through 2011, approximated \$60,000 and \$60,000 in 2006 and 2005, respectively. The Series 2001B Bonds were issued to construct and furnish an expansion of the Caperton Center. The Series 2001 Bonds are limited obligations of the Issuer payable solely from loan payments by the Authority pledged under the Indenture, and are also secured equally and ratably by a Trust Agreement among the Authority, the Issuer and a trustee, wherein the Authority has pledged certain non-toll revenues of the Authority including (i) net revenues of the Caperton Center; (ii) certain interest and other investment earnings; and (iii) gross revenues derived from concessionaire or other contracts with third parties relating to operations conducted by such third parties at any of the Authority's service plazas. Toll revenues derived by the Authority in connection with the operation of the Turnpike are not pledged or otherwise available to pay debt service on the Series 2001 Bonds. The Authority completed the advance refunding to remove certain restrictive indenture requirements of the Series 1994 and Series 1996 bonds. The refunding resulted in an economic loss (difference between the present values of the old and new debt service payments) of \$582,582.

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

6 - REVENUE BONDS PAYABLE (Continued)

Additionally in 2002, \$44,205,000 of Revenue Refunding Bonds were issued for the express purpose of defeasing \$36,036,000 of Series 1993 Bonds. The advance refunding resulted in a \$6,313,000 deferred loss arising from the difference between the reacquisition price and the net carrying amount of the refunded debt. Amortization of this deferral, charged annually to interest expense through 2019, approximated \$270,000 in 2006 and 2005. The Authority completed the advance refunding to reduce its aggregate debt service payments by almost \$3,003,064 over an 18-year period (life of the refunding bonds) and obtain an economic gain (difference between the present values of the old and new debt service payments) of \$1,623,705.

In 2003, the Authority issued \$63,900,000 of Variable Rate Demand Revenue Refunding Bonds for the express purpose of refunding \$61,280,000 of the Authority's Series 1993 Bonds. This refunding resulted in a \$7,896,000 deferred loss arising from the difference between the reacquisition price and the net carrying amount of the refunded debt. Amortization of this deferral, charged annually to interest expense through 2019, approximated \$569,000 and \$570,000 in 2006 and 2005, respectively. The Authority completed the refunding to reduce its aggregate debt service payment by \$7,270,000 over a 17-year period (life of the refunding bonds) and obtain an economic gain (difference between the present values of the old and new debt service payments) of \$4,851,000.

The Series 2003 bonds bear interest at the Weekly Interest Rate determined by the remarketing agent on Tuesday of each week. The Authority has entered into an interest rate swap agreement on the Series 2003 bonds as follows:

Objective of the Interest Rate Swap

As a means to lower its borrowing costs, when compared against fixed-rate bonds at the time of issuance in February 2003, the Authority entered into an interest rate swap in connection with its 2003 Variable Rate Demand Revenue Refunding Bonds. The intention of the swap was to effectively change the Authority's variable interest rate on the bonds to a synthetic fixed rate of 4.387%.

Terms of the Interest Rate Swap

The bonds and the related swap agreement mature on May 1, 2019, and the swap's notional amount of \$63,900,000 matches the \$63,900,000 variable rate bonds, Series 2003. The swap was entered at the same time the bonds were issued (February 14, 2003).

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

6 - REVENUE BONDS PAYABLE (Continued)

Terms of the Interest Rate Swap (Continued)

Under the swap, the Authority pays the counterparty a fixed payment of 4.387% and receives a variable payment computed as 67 percent of the London Interbank Offered Rate (LIBOR). Conversely, the bond's variable rate is based on The Bond Market Association Municipal Swap Index (BMA).

Fair Value

Because interest rates have declined since the execution of the swap, the swap had a negative fair value of \$2,328,123 as of June 30, 2006. The swap's negative fair value may be countered by a reduction in total interest payments required under the variable rate bonds, creating a lower synthetic interest rate. Because the Authority's bonds adjust to changing interest rates, the bonds do not have a corresponding fair value increase. The fair value was estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on the date of each future net settlement of the swap.

Credit Risk

As of June 30, 2006, the Authority was not exposed to credit risk because the swap had a negative fair value. However, should interest rates change and the fair value of the swap become positive, the Authority would be exposed to credit risk in the amount of the derivative's fair value. The swap counterparty was rated AA by Fitch Ratings and Standards & Poor's and Aa by Moody's Investor's Service as of June 30, 2006.

Basis Risk

The swap exposes the Authority to basis risk should the relationship between LIBOR and BMA converge, changing the synthetic rate on the bonds. The effect of this difference would be indicated by a difference between the intended synthetic rate and the synthetic rate as of June 30, 2006. If a change occurs that results in rates moving to convergence, the expected cost saving may not be realized. As of June 30, 2006, the BMA rate was 3.67 percent, whereas 67 percent of the LIBOR was 3.81 percent.

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

6 - REVENUE BONDS PAYABLE (Continued)

Termination Risk

The Authority or the counterparty may terminate the swap if the other party fails to perform under the terms of the contract. If the swap is terminated, the variable rate bond would no longer carry a synthetic interest rate. Also, if at the time of termination the swap has a negative fair value, the Authority would be liable to the counterparty for a payment equal to the swap's fair value.

Swap Payments and Associated Debt

Using rates as of June 30, 2006, debt service requirements of the variable rate debt and net swap payments, assuming current interest rates remain the same for their term, were as follows (in thousands). As rates vary, variable rate bond interest payments and net swap payments will vary.

Year Ending June 30	Variable-Rate Bonds		Interest Rate Swap, Net	Total
	Principal	Interest		
2007	\$ 300	\$ 561	\$ 2,375	\$ 3,236

Less:			
Unamortized deferred loss on advance refunding	(11,230)		
Unamortized discount and issuance costs	(1,478)		
	\$ 99,687		

The Revenue Bonds are subject to the arbitrage rebate provisions of the Internal Revenue Code (the Code). The Code requires that 90% of excess investment earnings on the Bond proceeds be paid to the Internal Revenue Service every five years in order for the Bonds to maintain their tax-exempt status. At June 30, 2006 and 2005, the Authority's estimated arbitrage rebate liability was zero.

7 - CAPITAL LEASING

The Authority entered into four lease agreements during FY 2006 for the financing of roadside maintenance vehicles, police cruisers, miscellaneous maintenance vehicles, and roadway maintenance vehicles. These lease agreements qualify as capital leases for accounting purposes and, therefore, have been recorded at the present value of their future minimum lease payments as of the inception date.

In accordance with the Authority's capitalization guidelines, the Authority expensed \$437,031 of the equipment. The remaining assets acquired through capital leases are as follows (in thousands):

Present value of minimum lease payments		\$	<u><u>1,945</u></u>

8 - UNUSED SICK LEAVE

Following is a summary of the liability for unused sick leave for the year ended June 30, 2006 (in thousands):

	Balance <u>June 30, 2005</u>	<u>Increases</u>	<u>Decreases</u>	Balance <u>June 30, 2006</u>	<u>Due Within One Year</u>
Termination payments related to sick leave	\$ <u>3,044</u>	\$ <u>23</u>	\$ <u>(108)</u>	\$ <u>2,959</u>	\$ <u>296</u>

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

9 - PENSION PLAN

All full-time Authority employees are eligible to participate in the State of West Virginia Public Employees' Retirement System (PERS), a cost-sharing multiple-employer public employee retirement system. Employees who retire at or after age 60 with five or more years of credited service, or at least age 55 with age and service equal to 80, are entitled to a retirement benefit established by State statute, payable monthly for life, in the form of a straight-life annuity equal to two percent of the employee's final average salary, multiplied by the number of years of the employee's credited service at the time of retirement. The PERS also provides deferred retirement, early retirement, death and disability benefits. The PERS issues an annual report, a copy of which can be obtained by contacting PERS.

Covered employees are required to contribute 4.5% of their salary to the PERS while the Authority is required to contribute 10.5% of covered employee's salaries to the PERS. The required employee and employer contribution percentages are determined by actuarial advisement within ranges set by statute. A summary of the Authority and employee contributions required and made for the years ended June 30, 2006, 2005, and 2004 are as follows (in thousands):

	2006	2005	2004
Authority contributions	\$ 1,453	\$ 1,649	\$ 1,658
Employee contributions	623	726	725
Total contributions	\$ 2,076	\$ 2,375	\$ 2,383

10 - RISK MANAGEMENT

The Authority is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to and illnesses of employees; and natural disasters.

The West Virginia Public Employees Insurance Agency (PEIA), a public entity risk pool, provides employee and dependent health, life, and prescription drug insurance coverage. Brickstreet Mutual Insurance Company (BI) provides coverage for work related injuries of employees. The PEIA and BI determine premiums to be paid by participating/covered employers, including the Authority. In exchange for the payment of premiums to PEIA and BI, the Authority has transferred risk related to health coverage for employees and job-related injuries to employees.

WEST VIRGINIA PARKWAYS, ECONOMIC DEVELOPMENT
AND TOURISM AUTHORITY

NOTES TO FINANCIAL STATEMENTS
(Continued)

10 - RISK MANAGEMENT (Continued)

The Authority, for an annual premium, obtains insurance coverage for general liability, property damage, business interruption, errors and omissions, and natural disasters through the West Virginia Board of Risk and Insurance Management, a public risk pool entity insuring the State of West Virginia, its component units, local government entities, and eligible not-for-profit organizations. Liability coverage provided to all insured entities under this policy is limited to \$1,000,000 per occurrence, subject to an annual aggregate limit of coverage of \$22,000,000. To further reduce its risk of loss, the Authority, for an annual premium paid to a commercial insurer, has obtained an additional liability policy which provides coverage of \$10,000,000 over and above the coverage provided by the West Virginia Board of Risk and Insurance Management. In each of the three fiscal years in the period ending June 30, 2006, the Authority's insurance coverage has been sufficient to meet all claims and settlements against the Authority.

11 - COMMITMENTS AND CONTINGENCIES

Litigation

The Authority is a defendant in certain legal proceedings pertaining to matters incidental to routine operations. Based on the current status of these legal proceedings, it is the opinion of Authority management and counsel that the ultimate resolution of these matters will not have a material effect on the Authority's financial position.

Construction Commitments

At June 30, 2006, the Authority had contractual commitments totaling \$12,728,166 for various Turnpike System improvement projects.

Economic Development Commitments

As a result of State legislation enacted in 1998, amended in 2003, the Authority is required to pay \$250,000 per year through fiscal year 2008 to the Hatfield-McCoy Regional Recreation Authority (HMRRA).

- (1) On December 1, 1989, the Turnpike Commission revenue bonds dated March 10, 1952 and March 3, 1954 (Prior Bonds) matured and were repaid with a portion of proceeds of the Series 1989 Revenue Bonds issued under a Trust Indenture dated October 15, 1989. On March 11, 1993, \$111,245,000 of the Series 1989 Revenue Bonds were refunded with 1993 Series Revenue Bonds issued under a Trust Indenture dated February 15, 1993. On February 1, 2002, \$36,036,000 of the Series 1993 Revenue bonds were refunded with the 2002 Series Revenue Bonds issued under a Trust Indenture dated February 1, 2002. On February 18, 2003, \$61,280,000 of the Series 1993 Revenue bonds were refunded with the Series 2003 Variable Rate Demand Refunding Bonds issued under a Trust Indenture dated February 18, 2003. The revenue bond coverage requirements increased to 150% from 125% under the 2003 trust indenture. Accordingly, the above presentation for each of the ten years ended June 30, 2006, relates only to debt service requirements under the 1993, 2002, and 2003 Trust Indentures. Under the terms of these trust indentures, revenues available for debt service are comprised of collected toll revenues less operating expenses, exclusive of depreciation, other costs funded by bond proceeds or designated established reserves and accruals, and further reduced by capital expenditures funded by amounts other than bond proceeds.

Commercial vehicles	39	39	39	39	39	39

(1) Due to the implementation of a new electronic toll collection system in fiscal year 2000 and the adoption of a new toll classification system, the Parkways Authority converted their traffic statistics to a transaction versus a vehicle based summary. The effect of this conversion was applied retroactively to the year ended June 30, 2000, and earlier periods were not restated.
