

Fallen Worker Memorial

This looks a little busy in my picture but in reality it would be spaced out better and your view would be looking at one side. The signs on the barcade could hold names and you could put additional names on the base. It would also look better with more street signs standing in the middle.

Optional water area: Bridge on high platform to the side of the entrance or behind the structure with misting from under bridge.

Misting would allow to cool people and pets off during the summer without getting visitors wet.

Optional lighting: I think the lights on the barcade and the barrels should be lit with possible slow blinking option.
