CURRENT VEHICLE INVENTORY

A new requirement now exists for agencies receiving funding from the Section 5310 Program. If your agency provides regular, continuing shared-ride surface transportation services that are open to the general public or open to a segment of the general public defined by age, disability or low income then an **inventory of all vehicles that are used by your agency to provide transportation services** is required to be submitted to the Division (*regardless of original funding source*).

The Division is required by the Federal Transit Administration to gather total vehicle inventory for inclusion in a Statewide Transit Asset Management Plan (TAM). The TAM Plan must be completed for the Division to be eligible to receive Section 5310 funds.

As an example, 5310 providers who provide open service to all seniors in a town, must be included in the plan. If your agency only provides rides to seniors who are registered with the senior center or nutrition center then it is deemed closed door and does not need to be included in the TAM Plan. This same philosophy must be applied to all 5310 grantees (mental health, sheltered workshop, etc.) to determine if your agency is closed or open to your segment of the general population.

The above example is the best I have for your agency to decide whether you are an open or closed transportation provider. If your agency is receiving contracted services funding from the Division or NEMT, then you are an open transportation provider.

- Page 22 is a certification that is to be signed in blue and returned as part of your application packet. The Division must provide justification to FTA if a 5310 recipient is not included in the plan. (All agencies must complete certification.)
- 2. Complete the Current Vehicle Inventory Chart on the next page. List all your agency's vehicles that are used to provide transportation services (regardless of original funding source). All columns must be completed. Condition Code Definitions are provided. Attach additional sheets if necessary. If you serve multiple counties, down right side of table, add county vehicle is utilized in.
- 3. If you are an open transportation provider, for vehicles purchased/donated using other funding sources, a copy of the title of the vehicle is also required to be submitted (this will provide entry of the correct serial number into the TAM Plan.)

COORDINATION WITH OTHER FEDERAL PROGRAMS

The U.S. Department of Transportation (U.S. DOT) signed an interagency agreement with the U.S. Department of Health and Human Services (DHHS) in 1996 to improve the coordination of programs funded by the two departments. States are to encourage their Section 5310 recipients to participate in coordinated systems at the local level, along with recipients of funds from the programs of DHHS. The State must sign an assurance that the consolidated program of projects submitted for funding provides for maximum feasible coordination of transportation services assisted under Section 5310 with transportation services assisted by other Federal sources.

Also, the Older Americans Act now has provisions that affect community transportation services. There is strengthened language describing expectations for coordination of senior-oriented and public transportation services under the "Title III-B" supportive services and senior centers program.

35. Describe the processes that your agency undertakes to ensure that the proposed transportation services are or will be coordinated to the maximum extent possible with other federally funded agencies and private transportation providers in the proposed service area? Refer to the 2014 West Virginia Transportation Providers Directory and specifically address how you have coordinated with providers in your service area.

Locally Developed Coordinated Public Transit-Human Services Transportation Plan

All projects funded by the Enhanced Mobility of Seniors and Individuals With Disabilities Formula Program (Section 5310) must be part of a "locally developed coordinated public transit-human services transportation plan." This plan was required to be developed through a process that included representatives of public, private, and non-profit transportation service providers, human services transportation providers and the general public.

All known transportation agencies were notified that any agency planning on applying for funding under the Section 5310 Program, anytime within the next four years, had to PARTICIPATE IN THE PLAN DEVELOPMENT AND ATTEND THE DEVELOPMENT MEETINGS!

Regional Planning and Development Councils across the state facilitated the development of the Coordinated Public Transit-Human Services Transportation Plans for each region and continue to update the plans periodically. The Councils held meetings in your Region, surveyed agencies and ask for input.
