Addendum #1
SPECIAL PROVISIONS FOR

SECTION 240 – CLEANING CULVERTS, INLETS AND MANHOLES

240.1 DESCRIPTION

DELETE ENTIRE SECTION AND ADD THE FOLLOWING:

This work shall consist of complete video inspection of culverts, and their appurtenant structures; e.g., inlets, manholes, etc.; when appropriate or so designated, in a manner determined by the Contractor and acceptable to the Authority’s Representative. The Contractor shall comply with OSHA regulations regarding manhole cover removal and confined space entry. Each culvert must be inspected along the full length. In the event that an obstruction hinders the advancement of the inspection from entering the culvert from one end, the inspection must then be continued from entering through the other end. When a culvert being inspected contains debris and sediment to a depth equal to or exceeding 40% of the pipe diameter measured at the pipe invert, the Contractor shall clean the culvert prior to inspection and payment will be made under Item 240001. The removal of sediment and debris in culverts when the depth is below 40% of the pipe diameter measured at the pipe invert shall be incidental to Item 240020. See Scope of Work Section “Contract Scope Notes for CV-1-18” for closed circuit television (CCTV) requirements.

240.4 METHOD OF MEASUREMENT

DELETE ENTIRE SECTION AND ADD THE FOLLOWING:

“Videoing Culverts” will be measured by the linear foot of all culverts videoed, the measurement being considered along the centerline of each culvert. The lengths for branch connections, tees, wyes and elbows will be considered along their centerlines and those values included in the total lengths of the appropriate culvert. Measured values for culverts with sloped or skewed ends will be the length along the invert. The portion of culverts extending through to the inside face of headwalls, wingwalls, manholes, inlets, boxes or other structures shall be included in the measurement. “Cleaning Culverts” will be measured by linear foot and include connected inlets and manholes.

240.5 BASIS OF PAYMENT

DELETE ENTIRE SECTION AND ADD THE FOLLOWING:

The quantities, determined as provided above, will be paid for at the contract unit prices bid for Items 240001 and 240020. Payment will be made for actual lengths cleaned and inspected, however there will be no guaranteed quantity.

240.6 PAY ITEMS

ADD THE FOLLOWING:

Item 240020, Culvert Inspection, Video Taping, “Size”, Per Linear Feet.

Addendum #1
