State Highway Engineer

Jimmy Wriston, P. E.
Secretary of Transportation
Commissioner of Highways

December 29, 2022

The Honorable Jim Justice, Governor;
The Members of the West Virginia Legislature;
The Citizens of the State of West Virginia

We are pleased to submit the Annual Comprehensive Financial Report of the West Virginia Department of Transportation, Division of Highways (the Division) for the fiscal year ended June 30, 2022. The purpose of the report is to provide the Governor, Legislature, Citizens and other interested parties with reliable financial information about the Division.

Management assumes all responsibility for both the accuracy of the information and the completeness and fairness of presentation, including all disclosures of the information contained in this report, based upon a comprehensive framework of internal control that it has established for this purpose. Since the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements. All disclosures necessary to enable the reader to gain an understanding of the Division's financial activities have been included.

State statute requires that an annual audit of the Division is performed. The accounting firm of Suttle and Stalnaker, PLLC was engaged to perform the audit for the year ended June 30, 2022. Their report is included in the financial section of this report. The West Virginia Department of Transportation is included in the West Virginia Single Audit in accordance with the audit requirements of Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). The West Virginia Single Audit for the year ended June 30, 2022, is available upon request.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complements this letter of transmittal and should be read in conjunction with it.

PROFILE OF THE GOVERNMENT

The Division is an operating division of the state government of West Virginia (the State). The State Road Fund (the Division's general fund) is considered a special revenue fund of the State and represents separate funds of the State that are not a part of the State's General Fund. Effective July 1, 1989, the Department of Highways became the Division of Highways when the Department of Transportation was established as a result of legislation enacted by the West Virginia Legislature. It had been the Department of Highways since 1969 when the name was changed from the State Road Commission, which was established in 1917.

With roughly 39,000 miles of public highway mileage, West Virginia is one of only four states (Delaware, North Carolina and Virginia are the others) in which there is no county and/or township ownership of highways. As a result, the Division has statutory authority for the construction, improvement, and maintenance of nearly all public highway miles (approximately 36,000 or 92%) in the state, the highest percentage in the nation. Furthermore, despite West Virginia's relatively small size, the Division is responsible for the sixth-largest state-maintained highway network in the nation.

RELEVANT FINANCIAL POLICIES

The Division is dependent not only on revenues generated from the purchase and use of motor fuel, motor vehicle fees, and sales (privilege) tax on consumer purchases of motor vehicles, but also federal reimbursements for expenditures on federal-aid eligible projects. Revenues are affected by state and national economic conditions, world events affecting availability and pricing of motor fuel, and fuel consumption rates for motor vehicles.

The Division's expenditures are subject to the legislative budget process of the State of West Virginia. The budget is legally enacted through passage of a legislative bill and approval of the Governor. The Division's internal accounting system is used to accumulate and segregate expenditures and compare them against legislative appropriations. A computerized accounting system with daily input of expenditures from all the Division's facilities throughout the state is used to provide management with current information. This expenditure data, in conjunction with actual revenue collection data, is used by the Division's management to track current cash status and to forecast future cash requirements. These forecasts are used to adjust planned expenditures to a level appropriate to the forecasted cash availability.

Long-term goals and policies for the Division are outlined in a number of federally required plans, such as the 2050 Multi-Modal Statewide Transportation Plan, the Transportation Asset Management Plan (TAMP), the State Freight Plan and the State Highway Safety Plan. These plans discuss in broad terms the long-range goals, objectives, and performance of various elements of the State's transportation network. Since needs always exceed resources, not all needs of the network can be addressed. The various plans provide a framework for setting priorities, understanding the tradeoffs associated with competing needs and tying investments to performance.

The planned initiatives that comprise the Division's short-term capital program are reflected in the 2020-2025 Statewide Transportation Improvement Program (STIP). The Division is in the process of developing an updated STIP for the federal fiscal years 2023-2028. The federal portion of the STIP is a financially constrained document that demonstrates how the Agency intends to use the resources at its disposal to advance the goals and policies of the Agency and achieve established performance targets. The STIP is organized so that most projects that are programmed fall within one of eight core programs. The goal is to better manage assets and meet performance targets by placing emphasis on needs and the type of work being performed rather than the type of funding used. To do this, the Division is utilizing a virtual platform for public involvement to help decide where federal transportation spending should go. In addition to federal funding, the STIP also identifies regionally significant projects that are being advanced using various bond funds, as well as initiatives that are being funded with State Road Fund monies.

The STIP includes a wide variety of projects including roadway, bridge, bicycle, pedestrian, safety, and public transportation (transit) projects. Projects are subject to many considerations and actions from conception to completion that may impede or accelerate their progress. These considerations may include policy decisions, changes in design requirements, conflicts with other scheduled activities, unforeseen circumstances such as funding reductions, shortage of manpower, and inflation of project costs. Project cost estimates are based on the best available engineering estimates at the time the STIP is developed and are regularly updated based on current information. When a project is adversely affected by any of the above-mentioned factors, the projected fiscal year dates and/or costs will be adjusted accordingly.

ECONOMIC CONDITIONS AND OUTLOOK

According to the *West Virginia Economic Outlook 2023-2027*, published by the Bureau of Business and Economic Research at John Chambers College of Business & Economics, West Virginia University, "West Virginia's economy has nearly fully recovered from the COVID-19 recession. While the pandemic does continue to have lingering impacts on aspects of the economy, e.g., the labor force and persistent bottlenecks in supply chains for some products, most of the state's big picture economic indicators now surpass pre-pandemic levels and several have even managed to reach new highs (or lows). West Virginia's economic growth prospects for the next five years are moderately positive overall thanks to further waning of the pandemic and some major economic development announcements and initiatives; however, the state's economy does face heightened downside risks to its performance over the next year or so because of national concerns over the impacts of high inflation and rising interest rates. Also, geopolitical issues continue to cast a shadow of uncertainty.

Despite being the shortest official recession on record, employment fell by roughly 95,000 in March and April 2020. As of late-summer 2022, preliminary data shows nearly 93,000 jobs have been regained—leaving the state nearly on par with its pre-pandemic level. Several sectors have seen activity return to or surpass what was considered typical before the pandemic, led by construction and business services. Nonetheless, many sectors continue to deal with severe supply chain problems and others are facing record-high rates of unfilled job openings. The state’s unemployment rate surged to nearly 16 percent in April 2020 but has declined significantly since then. The jobless rate reached an all-time low of roughly 3.5 percent during the second quarter of 2022. Only 55 percent of West Virginia’s adult population is either working or looking for work. Though an improvement from recent years, this remains the lowest rate of labor force participation among all 50 states and represents a key hurdle to economic growth. Per capita personal income in West Virginia increased nearly 7 percent in 2021, fueled in large part by federal government pandemic relief and surging wage growth. Per capita personal income in West Virginia stands at 76 percent or so of the national average. West Virginia’s real GDP increased 4 percent in 2021, helping to offset the drop in economic output observed during 2020. The state’s topline measure of real economic output remains volatile, largely because of the energy sector, and that volatility continues into 2022. Export shipments from West Virginia have also been quite volatile in recent years, due in large part to swings in energy demand, persistent problems with shortages of key manufacturing equipment, and congestion at seaports. Expanding and diversifying the state’s export portfolio is of vital importance to economic development in West Virginia over the long run.

West Virginia will reach pre-pandemic levels at some point during the fourth quarter of 2022, but ultimately employment growth is expected to slow in the coming quarters as higher interest rates and other factors weigh on broader US economic growth. Overall, payrolls in West Virginia are expected to increase 0.3 percent annually, compared to 0.4 percent for the nation. We anticipate the state’s energy sector will rebound over the forecast horizon, but longer-term prospects are better for natural gas. Coal will see some benefit from global demand growth, particularly the developing world, but domestic use will shrink as more coal-fired generating capacity is retired. The construction sector’s near-term performance will be hurt by the national housing market slowdown, but the overall outlook has improved thanks to a mix of public infrastructure investment and major economic development projects. The \$2.7 billion investment by Nucor will be one of the single-largest developments in state history. Manufacturing will also add jobs at an above-average pace during the five-year forecast horizon and is also expected to enjoy some diversification into new industries, such as clean-tech manufacturing. West Virginia’s healthcare sector will grow at a slower rate compared to the last decade or so, but the state’s underlying demographics should support service demand and recent strategic developments and additions by several health system networks provide upside potential. The state’s unemployment rate is expected to increase over the next year or so, reaching five percent or so by late-2023/early-2024. This increase will largely be driven by entry into the labor force. Real per capita personal income is expected to grow 1.6 percent annually through 2027. Investment income and transfer payments are expected to register the fastest growth over the next five years, while wages and salaries will increase at just over one percent annually.

West Virginia’s population has declined by approximately 76,000 residents since 2012. Population losses are expected to be smaller in magnitude going forward. West Virginia’s age distribution ensures natural declines in the population will continue and likely grow larger in the coming years. Positive shocks to the economy are essential to encourage in-migration and reduce the severity of natural population decline. Economic development strategies should focus on ways to improve health outcomes, lower drug abuse, and advance educational and vocational training opportunities in the state to make West Virginia’s workforce more attractive to potential businesses.”

LONG-TERM FINANCIAL PLANNING

The schedule that follows presents summary revenue and expenditure information for the State Road (General) Fund for the year ended June 30, 2022. All data is presented in thousands of dollars.

	<u>Amount</u>	<u>Percent of Total</u>	<u>Change from Prior Year</u>	
			<u>Amount</u>	<u>Percent</u>
Motor fuel excise tax	\$ 422,937	30%	\$ 18,512	5%
Automobile privilege taxes	296,875	21%	(241)	0%
Motor vehicle registration and licenses	135,736	10%	(3,902)	-3%
Special fees and permits	6,719	0%	(83)	-1%
Federal aid	529,914	38%	319	0%
Investments and interest income	1,901	0%	1,619	574%
Intergovernmental	0	0%	(575,221)	-100%
Miscellaneous	18,603	1%	(8,141)	-30%
Total revenues	<u>\$ 1,412,685</u>	<u>100%</u>	<u>\$ (567,138)</u>	<u>-29%</u>
Road construction and other road operations	\$ 504,215	33%	\$ (57,572)	-10%
Road maintenance	681,773	45%	159,656	31%
Support and administrative operations	169,161	11%	36,703	28%
Debt Service	155,582	10%	(466)	0%
Total Expenditures	<u>\$ 1,510,731</u>	<u>100%</u>	<u>\$ 138,321</u>	<u>10%</u>

Overall, State tax and fee revenues in Fiscal Year 2022 increased by 1.68% from Fiscal Year 2021. Motor Fuel Excise Tax made up the majority on the increase.

At June 30, 2022, the outstanding principal balance of long-term general obligation (GO) bonds was \$1,589,340,000. Of this principal balance, \$55,650,000 relates to bonds that were issued in 2015 including \$550,000,000 issued under the Safe Road Amendment of 1996 and are scheduled to be retired through June 1, 2025. The remaining outstanding principal balance of \$1,533,690,000 is the issuance of GO bonds also known as the Roads to Prosperity Bonds from 2018, 2019 and 2021. Total debt service payments for the Safe Road Bonds are around \$15.3 million annually for fiscal years 2023 and around \$23.2 million annually for fiscal years 2024-2025. The debt service payments for the currently issued Roads to Prosperity Bonds are around \$118.2 million in fiscal year 2023, around \$113.2 million in fiscal year 2024, around \$115.6 million annually for fiscal years 2025-2027, around \$578 million annually for fiscal years 2028-2042 and then around \$205.6 million annually for fiscal years 2043-2046.

At June 30, 2022, the outstanding principal balance of the Grant Anticipation Revenue Vehicle (GARVEE) notes was \$226,815,000. The notes were issued as a debt-financing instrument authorized to receive federal reimbursement of debt service and related financing costs under Section 122 of Title 23, United States Code. In October 2017, the Division issued \$219,985,000 of GARVEE notes to fund bridge replacement and interstate rehabilitation projects and \$78,810,000 GARVEE notes were issued in August 2018. These provide funding for repairs and capital improvement to any roadway or bridge. GARVEE Notes of \$53,380,000 issued in 2016 were defeased in February 2018 due to cancellation of the related project. At June 30, 2022, \$9,870,000 of the defeased debt remained outstanding. In general, projects funded with the proceeds of a GARVEE debt instrument are subject to the same requirements as other federal-aid projects. The exception is the reimbursement process; reimbursement

of GARVEE project costs occurs when debt service is due rather than when construction costs are incurred. Under terms of the Memorandum of Agreement between the Federal Highway Administration and the Division of Highways, the yearly debt service must be the first obligation in the federal fiscal year. The Division usually tries to obligate funds in the previous year to eliminate this restriction.

MAJOR INITIATIVES

During Fiscal Year 2022, the West Virginia Division of Highways (WVDOH) continued work on several of its major initiatives around the State including Corridor H, the Nitro Bridge project on I-64, the Wellsburg Bridge, the Welch to WV 16 portion of the Coalfields Expressway and the Airport Road - John Nash Boulevard portion of the King Coal Highway (to name a few). It is also worth noting, one major initiative from FY 2021 was finishing US35, which has now been completed. During FY 2022, the WVDOH authorized a total of 462 highway and bridge construction projects statewide. The value was considerably lower than normal for a number of reasons which includes timing issues surrounding implementation of the Agency's new project tracking system, which took place in October 2021, delays in the availability of federal funding with the roll out of the Infrastructure and Investment Act (IIJA) and delays in establishing the FY 2023 Resurfacing Program. Rugged mountainous terrain and numerous streams and rivers characterize the topography of the State and, consequently, West Virginia's road system includes 7,248 vehicular bridges, of which the WVDOH is responsible for 7,138. The WVDOH's Bridge Program in FY 2022, enhanced by an ongoing infusion of General Obligation and Turnpike Bond sales proceeds, in conjunction with the traditional State-Funded and Federal-Aid programs, allowed for 82 construction starts on bridge initiatives ranging from full replacement to deck overlays. The WVDOH's Resurfacing Program consisted of 106 projects, which addressed approximately 261 miles of roadway. For the reasons stated above, the program was significantly lower than FY 2021, but will rebound in FY 2023.

West Virginia emphasizes the safety of its Citizens by promoting seat belt use. The Division further emphasizes safety through its railroad grade crossing, high hazard location, and guardrail installation programs. The Division also adheres to national standards for traffic control in road construction and road maintenance work areas to maximize safety for motorists and its employees.

AWARDS AND ACKNOWLEDGEMENTS

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Division of Highways for its annual comprehensive financial report for the fiscal year ended June 30, 2021. This was the 30th consecutive year that the Division has achieved this prestigious award (1992-2021). In order to be awarded the Certificate of Achievement, a government must publish an easily readable and efficiently organized annual comprehensive financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The Division believes its Fiscal Year 2022 annual comprehensive financial report continues to meet the Certificate of Achievement Program's requirements and is submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of the annual comprehensive financial report on a timely basis was made possible by the personnel of the Transportation Finance & Administration and Transportation Budget Divisions. I express my sincere appreciation for the contributions made by these individuals in the preparation of this report, particularly the Financial Reporting Section of the Finance & Administration Division, which has administrative responsibility for this function.

Sincerely,

Carla P. Rotsch

INDEPENDENT AUDITOR'S REPORT

Joint Committee on Government and Finance
West Virginia Legislature
Charleston, West Virginia

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of the governmental activities and each major fund of the West Virginia Department of Transportation, Division of Highways (the Division), a component unit of the State of West Virginia and the State of West Virginia Department of Transportation, as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the Division's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of the Division as of June 30, 2022, and the respective changes in financial position and the budgetary comparison for the State Road (General) Fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Division and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Change in Accounting Principle

As described in Note 2 to the financial statements, during fiscal year 2022, the Division implemented Governmental Auditing Standards Board Statement No. 87, *Leases*. Our opinion is not modified with respect to this matter.

Emphasis of Matter

As discussed in Note 1, the financial statements of the Division are intended to present the financial position and the changes in financial position of only that portion of the governmental activities and each major fund of the State of West Virginia and the West Virginia Department of Transportation that is attributable to the transactions of the Division. They do not purport to, and do not present fairly the financial position of the State of West Virginia and West Virginia Department of Transportation, as of June 30, 2022, or the changes in its financial position, for the year then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Division's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Division's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Division's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 16 through 24, the schedule of proportionate share of the net pension liability (asset), the schedule of pension contributions, the schedule of proportionate share of the net OPEB liability (asset), the schedule of OPEB contributions, and related notes on pages 63 through 68 be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

A handwritten signature in cursive script, reading "Seattle & Stalnak, PLLC".

MANAGEMENT'S DISCUSSION AND ANALYSIS

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Unaudited)

This section of the West Virginia Department of Transportation, Division of Highways (Division) annual financial report presents our discussion and analysis of the Division's financial performance during the fiscal year that ended June 30, 2022. This section introduces the basic financial statements and provides an analytical overview of the Division's financial activities. Please read it in conjunction with the Division's financial statements, which immediately follow this section.

FINANCIAL HIGHLIGHTS - PRIMARY GOVERNMENT

Net Position - The net position of the Division was \$8.7 billion at the close of fiscal year 2022.

Changes in Net Position - During the year, the Division's net position increased by \$12 million or 1.61%. During fiscal year 2021, net position increased by \$667 million or 8.19%.

Revenues and Expenses - Total revenues decreased by \$644 million or 31.42%. Total expenses increased \$11 million or 0.79%. There were no significant changes in the programs carried out by the Division during the year.

Governmental Fund - Fund Balances - As of the close of fiscal year 2022, the Division's governmental funds reported combined total fund equity of \$1.7 billion, a decrease of \$430 million in comparison with the prior year.

Long-term Debt - The Division's total outstanding general obligation bonds, net of bond premiums, decreased by \$56 million during the current fiscal year. The Division's total outstanding special obligation notes, net of note premium, decreased by \$24 million during the current fiscal year. With the adoption of Governmental Accounting Standards Board 87, *Leases*, in the current year, the Division has \$18 million of leases payable at year end.

OVERVIEW OF THE FINANCIAL STATEMENTS

The discussion and analysis serves as an introduction to the Division's financial statements. The Division's financial statements are comprised of five components, government-wide financial statements, fund financial statements, statements of revenues, expenditures, and change in fund balances - budget and actual, notes to the financial statements, and required supplementary information.

Government-wide Statements

Government-wide financial statements provide both long-term and short-term information about the Division's financial condition. Changes in the Division's financial position may be measured over time by increases and decreases in the statement of net position. Information on how the Division's net position changed during the fiscal year is presented in the Statement of Activities.

Fund Financial Statements

The fund financial statements focus on the individual parts of the Division, reporting the Division's operations in more detail than the government-wide financial statements. Fund financial statements can include the statements for governmental, proprietary, and fiduciary funds. The Division has two governmental financial reporting funds.

Statement of Revenues, Expenditures, and Changes in Fund Balance-Budget and Actual

The budget and actual statement reports the originally submitted budget along with budget amendments that are combined to arrive at the final budget. The final budget amounts are then compared to the actual operating results for the same fiscal year to arrive at variances.

Notes to the Financial Statements

Notes to the financial statements provide additional information that is essential to the full understanding of the data provided in the government-wide and fund financial statements.

DIVISION OF HIGHWAYS
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Unaudited)

Required Supplementary Information

Required supplementary information includes the presentation of this management's discussion and analysis and certain information concerning the Division's progress in funding its proportionate share of providing pension benefits and other post-employment benefits to its employees through its participation in the West Virginia Public Employees Retirement System and the West Virginia Retiree Health Benefit Trust Fund.

CONDENSED FINANCIAL INFORMATION

Condensed Statements of Net Position

The following condensed financial information was derived from the government-wide statement of net position and summarizes the Division's net position as of June 30, 2022 and 2021 (amounts in thousands).

The largest component of the Division's net position reflects its investment in capital assets (e.g., land, buildings, equipment, infrastructure, and others) less any related debt outstanding (excluding debt proceeds that have yet to be expended for infrastructure construction) that was needed to acquire or construct the assets. The Division uses these capital assets to provide services to the citizens and businesses in the State; consequently, these resources are not available for future spending. The remaining portion is classified as either restricted or unrestricted net position. The unrestricted net position may be used at the Division's discretion. The restricted net position has constraints as to how these funds may be used. Enabling legislation directs the use of these funds.

**Condensed Statements of Net Position
June 30,**

	2022	2021	% Change
Assets and deferred outflows of resources			
Current assets	\$ 1,912,750	\$ 2,302,058	-16.91%

Condensed Statements of Activities

The following condensed financial information was derived from the government-wide statement of activities and reflects how the Division's net position changed during the fiscal year (amounts in thousands):

Condensed Statement of Activities			
Years Ended June 30,			
	<u>2022</u>	<u>2021</u>	<u>% Change</u>
Revenues			
Taxes	\$ 719,820	\$ 701,541	2.61%
Investment and interest income	4,838	2,297	110.62%
Intergovernmental	-	152,340	-100.00%
Miscellaneous revenues	5,961	5,221	14.17%
Total general revenues	<u>730,619</u>	<u>861,399</u>	-15.18%
Capital grants and contributions	532,914	955,476	-44.23%
Charges for services and other program revenue	142,455	233,191	-38.91%
Total program revenues	<u>675,369</u>	<u>1,188,667</u>	-43.18%
Total revenues	<u>1,405,988</u>	<u>2,050,066</u>	-31.42%
Expenses			
Road maintenance	630,406	491,288	28.32%
Road construction and other road operations	571,170	708,371	-19.37%
General and administration	111,907	113,114	-1.07%
Interest on long-term debt	68,626	63,631	7.85%
Unallocated depreciation	11,714	6,509	79.97%
Total expenses	<u>1,393,823</u>	<u>1,382,913</u>	0.79%
Change in net position	12,165	667,153	98.18%
Net position, beginning - restatement	(153,688)	-	100.00%
Net position, beginning	<u>8,815,717</u>	<u>8,148,564</u>	8.19%
Net position, ending	<u>\$ 8,674,194</u>	<u>\$ 8,815,717</u>	-1.61%

Over time, increases and decreases in net position measure whether the Division's financial position is improving or deteriorating. During the fiscal year, the net position of the governmental activities increased by \$12 million or 1.61%.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Unaudited)

The following chart depicts the revenues under the accrual basis of accounting for the Division for the fiscal year.

Total revenues decreased by approximately \$644 million. Intergovernmental revenues decreased by approximately \$575 million. Large components of Intergovernmental revenue for 2021 included 1) legally authorized appropriations under West Virginia State Code by the West Virginia Legislature (\$150 million) 2) payments on behalf related to the OPEB special funding situation (\$2.3 million), and 3) an allocation from the Parkways Authority to be used for the contraction of the Division's transportation projects locate in counties adjacent to the Turnpike (\$422 million). No similar revenues were received in 2022. In 2021, other program revenue - paving settlement represents amounts recognized as a result of a legal settlement reached in 2021 with a paving vendor, which provides for both cash proceeds and credits against future paving projects. The following summarizes revenues for the years ended June 30, 2022 and June 30, 2021 (amounts in thousands):

	2022	2021	% Change
Motor fuel excise tax	\$ 422,945	\$ 404,425	4.58%
Industrial access roads	3,000	3,000	0.00%
Automotive privilege tax	296,875	297,116	-0.08%
Motor vehicle registration fees	135,736	139,638	-2.79%
Special fees and permits	6,719	6,802	-1.22%
Federal aid	529,914	529,595	0.06%
Investment and interest income	4,838	2,297	110.62%
Intergovernmental	-	575,221	-100.00%
Other program revenue - paving settlement	-	86,751	-100.00%
Miscellaneous revenues	5,961	5,221	14.17%
Total revenues	<u>1,405,988</u>	<u>2,050,066</u>	-31.42%

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Unaudited)

The Division's primary sources of revenue for funding of ongoing administration of the Division, general maintenance and construction of the state road system and for providing resources to match available Federal funds are derived from fuel taxes, automobile privilege taxes, motor vehicle registration and license fees, net of costs incurred by the Division of Motor Vehicles in collecting funds for deposit into the State Road Fund.

The Division also relies on federal funds as a source of revenue. The federal aid is obtained in the form of reimbursable grants. Federal transportation legislation and special spending authorizations provide funds that are available for obligation by the Federal Government in specific years, and the Division expects to continue to fully obligate available funds, thus ensuring that it captures all federal dollars. Revenue under these grants is recognized when expenditures occur and the Division requests reimbursement on specific projects that have qualified for federal participation. On December 4, 2015, the President signed into law the "Fixing America's Surface Transportation Act," or FAST Act, which is a five-year surface transportation program authorizing funding for highway and public transportation investments. The FAST Act was the first long-term transportation legislation to pass Congress in ten years and provided stability to the Division in planning its transportation investments. The FAST Act was originally set to expire on September 30, 2020, but was extended to September 30, 2021. Late on October 1, 2021, the House passed a 30-day surface transportation funding extension, expiring on October 31, 2021. The Senate subsequently passed that extension on October 2, 2021, with President Biden signing it into law that same day. This allowed Congress additional time to determine whether to pass the Infrastructure Investment and Jobs Act (IIJA) measure first, or to wait until possible passage of the Build Back Better funding measure. On November 15, 2021, Public Law 117-58, the IIJA, was enacted and covers federal fiscal years 2022-2026. In transportation circles the new legislation is also commonly referred to as the Bipartisan Infrastructure Law (BIL). West Virginia's federal fiscal year 2022 apportionment was \$576.6 million and the total obligation limitation was \$621.3 million.

The following chart depicts expenses under the accrual basis of accounting for the Division for the fiscal year.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Unaudited)

Total expenses increased by approximately \$11 million or 0.79%. The following summarizes expenses for the years ended June 30, 2022 and June 30, 2021 (amounts in thousands):

	2022	2021	% Increase (Decrease)
Road maintenance	\$ 630,406	\$ 491,288	28.32%
Road construction and other road operations	571,170	708,371	-19.37%
General and administration	111,907	113,114	-1.07%
Interest on long-term debt	68,626	63,631	7.85%
Unallocated depreciation	11,714	6,509	79.97%
Total expenses	<u>\$ 1,393,823</u>	<u>\$ 1,382,913</u>	0.79%

The maintenance expenses of the Division are comprised primarily of Annual Plan routine maintenance as well as maintenance-related capital improvements including small bridge repair, contract paving, and various types of renovation such as guardrail, slides, and drainage. For State fiscal year 2021, Governor Justice, understanding the critical needs of the roadway network in West Virginia, requested funds from the General Fund be transferred to the State Road Fund in order to take care of the critical paving and drainage needs that plague the system. These funds were received in June 2021 with the spending authority granted for fiscal year 2022. This will continue to afford the Division a wonderful opportunity to gain ground in this area.

Operating units are allocated yearly amounts of funding for routine maintenance. What the routine maintenance expenses are spent on is dependent, to a degree, on the level of snow removal and ice control (SRIC) that is required in a given year. In State fiscal year 2022, the agency continued and enhanced its core maintenance plan, which emphasizes ditching, mowing, brush-cutting, canopy clearing, and patching maintenance activities, also with distinct emphasis placed on these activities by the Governor personally. County crews concentrate on these activities during all non-SRIC periods. The intent is to improve safety and perform maintenance that will extend the life of the highway system.

General and administration expenses were fairly consistent between years. Road maintenance expenses increased \$139 million primarily due to the General Revenue Surplus Program. A total of \$150 million was transferred from the State's General Revenue Surplus to the State Road Fund in fiscal year 2021 for specific projects that were programmed within the Maintenance appropriation and these funds were spent in fiscal year 2022.

Other road operations expenditures reported in the Government-Wide Financial Statements include the total expended for all other road operations and small construction activities that fail to meet the criteria established for capitalization as infrastructure assets. A discussion of the change in actual funds expended is included in the financial analysis of the Division's Fund Financial Statements below.

FINANCIAL ANALYSIS OF THE DIVISION'S MAJOR FUNDS

At June 30, 2022, the Division reported fund balances of approximately \$1.7 billion. Of this total amount, \$180 million constitutes unassigned fund balance, while \$1.4 billion is restricted for various purposes. The remainder of the fund balance is non-spendable and is not available for spending because it is comprised of inventories.

State Road Fund

The State Road Fund is the Division's General Fund. At the end of the 2022 fiscal year, unassigned fund balance of the General Fund was \$180 million and non-spendable fund balance was \$62 million, while the restricted fund balance was \$485 million. The total General Fund balance decreased \$97 million during the fiscal year primarily due to the spend down of one-time State General Revenue funding that was received at the end of fiscal year 2021 but expensed in fiscal year 2022.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Unaudited)

State Road (General) Fund and Budgetary Highlights

The Division is dependent on revenues generated from the purchase and use of motor fuel, motor vehicle fees, privilege tax on consumer purchases of motor vehicles, and federal funding generated from motor fuel purchases. Revenues are affected by state and national economic conditions, world events affecting availability and pricing of motor fuel, and fuel consumption rates for motor vehicles. The forecast for fuel consumption is still anticipated to trend downward as vehicles continue to become more fuel efficient. Motor Fuel and Registration collections fell well below estimates, while Privilege Tax collections rose above estimates to compensate for the lack of other revenue sources. This is primarily due to the increase in demand and price of vehicles. The following table summarizes tax and fee collections (budget basis) over the past two years (amounts in thousands):

	2022	2021	Increase (Decrease)	% Increase (Decrease)
Motor fuel excise and wholesale fuel	\$ 419,593	\$ 399,542	\$ 20,051	5.02%
Motor vehicle registration	136,234	136,484	(250)	-0.18%
Privilege tax	300,583	300,975	(392)	-0.13%
	<u>\$ 856,410</u>	<u>\$ 837,001</u>	<u>\$ 19,409</u>	2.32%

Motor fuel excise tax is imposed on the consumption of motor fuel. The motor fuel excise tax is the combination of a flat 20.5 cents per invoiced gallon rate and a variable sales and use tax rate that is calculated yearly. The variable rate was 11.7 cents on January 1, 2017 but changed on July 1, 2017 to 15.2 cents as the result of SB1006. The rate has not changed since that time.

Fiscal year 2022 tax collections reported on a budgetary basis increased by \$19.7 million (2.81%) from fiscal year 2021 tax collections. Motor fuel tax collections were \$10.4 million (-2.42%) below estimate for the year, and \$20.1 million (5.02%) above fiscal year 2021 collections. Registration fee collections were \$37.8 million (-21.70%) below estimates and \$0.3 million (-0.18%) below fiscal year 2021 collections. Privilege tax collections were \$40.6 million (15.61%) above estimates and \$0.4 million (-0.13%) below fiscal year 2021 collections. In fiscal year 2023, motor fuel tax and registration fee collections are projected to be slightly higher than fiscal year 2022 actual collections. In fiscal year 2023, privilege tax collections are estimated to remain steady as compared to fiscal year 2022 actual numbers.

The Division's federal revenue, on a budgetary basis for fiscal year 2022 was \$474.4 million, used primarily for the design, right-of-way, and construction of Corridor H, US 35, Coalfields Expressway and numerous system preservation projects on other federal-aid highways. As previously discussed, the recognition of revenue under these grants occurs when expenditures occur on specific projects that have qualified for federal participation and the Division requests reimbursement. The budgeted amounts for federal revenue and expenditures are based on projects that have been approved and estimates of the timing of each phase of the project. Since the timing of such expenditures is dependent on variables such as the weather, the existence of differing site conditions that require plan modification, or delays caused by environmental issues or the results of public meetings, expenditures often do not occur as planned.

It is anticipated that the state revenues will increase slightly in fiscal year 2023 when compared to fiscal year 2022. Regardless of current and future events, management will continue to monitor and maintain a fiscally sound equity position. If revenues received are lower than estimated, management is confident adequate discretionary expenditure items can be reduced to permit the Division to continue to operate in a fiscally sound manner.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Unaudited)

Capital Projects Fund

The Capital Projects Fund accounts for financial resources to be used for road construction financed by the sale of General Obligation bonds. On October 7, 2017 the citizens of West Virginia voted to pass a referendum which allows the Division to sell \$1.6 billion dollars in General Obligation bonds. The Division sold \$800 million (face value) in General Obligation bonds during the fiscal year ended June 30, 2018, \$600 million (face value) in General Obligation bonds during the fiscal year ended June 30, 2020, and \$200 million (face value) in General Obligation bonds during the fiscal year ended June 30, 2021. These bonds will fund the construction of all or a portion of projects across the State. During the fiscal year ended June 30, 2022, the Capital Projects Fund fund balance decreased by \$332 million primarily due to construction expenses related to the Roads to Prosperity initiative. At June 30, 2022, the capital projects fund balance of approximately \$960 million represented unexpended bond funds associated with the above-referenced issuances.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets

As of June 30, 2022, the Division had invested \$9.2 billion, net of accumulated depreciation and amortization, in a range of capital assets (see Note 8 for additional details). Depreciation and amortization charges for the fiscal year totaled \$327 million.

As the Division continues to expand the state road system, these expansions are focused primarily on upgrading existing roadways and the completion of Appalachian Highway Corridor H. While these are significant construction projects, the additions are offset by \$302 million in depreciation of the infrastructure. The Division expended \$592 million dollars during the year ended June 30, 2022 for additions to capital assets. Of this amount, \$551 million was related to the acquisition of right of way and construction of roads and bridges. Construction costs for completed projects in the amount of \$153 million were reclassified from construction in process to roads and bridges. Major construction expenditures during the year included the Coalfields Expressway in Wyoming County, Corridor H in Randolph County, and continued environmental studies on various projects in process.

Long-Term Debt

The Division was authorized to issue general obligation bonds of the State of West Virginia by constitutional amendments. The final tranche of \$200 million was issued in fiscal year 2021 per house concurrent resolution 105.

The Division has also been authorized to issue revenue notes in the amount of \$500 million by constitutional amendment. The Division issued revenue notes in the amount of \$53 million in December 2016, which were defeased in February 2018. In October 2017, the Division issued revenue notes in the amount of \$220 million. In August 2018, the Division issued revenue notes in the amount of \$79 million. The debt service payments on these notes will be funded through federal aid revenue. The outstanding balance of issued special notes was \$227 million at June 30, 2022.

DIVISION OF HIGHWAYS
RECONCILIATION OF THE BALANCE SHEET - GOVERNMENTAL FUNDS
TO THE STATEMENT OF NET POSITION
JUNE 30, 2022
(amounts expressed in thousands)

Total fund balance - governmental funds	\$	1,686,812
---	----	-----------

Amounts reported for governmental activities in the statement of net position are different because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds. These assets consist of:

Capital assets not being depreciated		
Land - non-infrastructure	\$	25,730
Land - infrastructure		1,295,794
Construction in progress		2,175,658
Capital assets net of accumulated depreciation and amortization		
Land improvements		13,183
Buildings		125,421
Furniture and fixtures		451
Rolling stock		107,222
Scientific equipment		32
Shop equipment		240
Roads		2,966,225
Bridges		2,430,016
Right-to-use assets		<u>17,152</u>
		9,157,124

Deferrals of resources related to pensions that represent a consumption of net position that applies to a future period and, therefore, is reported as a deferred outflow of resources in the statement of net position.		68,045
--	--	--------

Deferrals of resources related to OPEB that represent a consumption of net position that applies to a future period and, therefore, is reported as a deferred outflow of resources in the statement of net position.		8,590
--	--	-------

Receivables related to the paving settlement are not available to pay for current-period expenditures and, therefore, are reported as unavailable in the funds.		58,588
---	--	--------

Some assets and liabilities are not due and receivable or payable in the current period and therefore are not reported in the funds. Those assets and liabilities consist of:

Net pension asset	137,597	
Net other postemployment benefits asset	1,685	
Accrued interest payable	(10,325)	
Claims and judgments	(14,212)	
Compensated absences	(22,632)	
Leases payable	(17,522)	
General obligation bonds and revenue notes	<u>(2,137,190)</u>	(2,062,599)

Deferrals of resources related to pensions and OPEB and gain on refunding that represents an acquisition of net position that applies to a future period and, therefore, are reported as deferred inflows of resources in the statement of net position.		<u>(242,366)</u>
--	--	------------------

Net position of governmental activities	\$	<u><u>8,674,194</u></u>

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES
IN FUND BALANCES - GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

Net change in fund balance - governmental funds	\$	(429,548)
---	----	-----------

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation and amortization expense. This is the amount by which the capital outlays (\$593,022) exceeded depreciation and amortization (\$326,562) in the current period.

266,460

In the statement of activities, only the loss on the sale of assets is reported, whereas in the governmental funds, the proceeds from the sale increase financial resources. Thus the change in the net position differs from the change in fund balance by the depreciated cost of the assets sold.

(204)

Bond, note, and lease proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net position. Repayment of bond and note principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net position. This is the amount by which proceeds exceeded repayments.

62,159

Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds. This is the change in claims and compensated absences in the current period.

10,063

Revenues in the governmental funds for activities that provide current financial resources but were reported as revenues in the statement of activities in a prior year. This amount represents revenue related to the paving settlement that is a current financial resource.

(9,642)

Some expenses do not require the use of current financial resources and, therefore, are not reported in governmental funds. This is the amount of amortization of bond premium, change in interest payable, pension expense, OPEB expense, and amortization of gain on bond refunding.

112,877

Change in net position of governmental activities

\$ 12,165

The Accompanying Notes Are An Integral Part Of These Financial Statements

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION - The accompanying financial statements of the West Virginia Department of Transportation, Division of Highways (the "Division") have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

REPORTING ENTITY - The Division is an operating unit of the West Virginia Department of Transportation and represents separate funds of the State of West Virginia (the "State") that are not included in the State's General Fund. The Division is a legally separate entity defined by the State constitution, and has statutory responsibility for the construction, reconstruction, maintenance, and improvement of all State roads. The Division is governed by a commissioner who is appointed by the Governor, but does not have a governing board separate from the State Legislature. The Division is considered a component unit of the State and its financial statements are blended with the financial statements of the primary government in the State's comprehensive annual financial report.

The financial statements of the Division are intended to present the financial position and the changes in financial position, of only that portion of the governmental activities and each major fund of the State and the West Virginia Department of Transportation that is attributable to the transactions of the Division. They do not purport to, and do not present fairly the financial position of the State and West Virginia Department of Transportation, as of June 30, 2022, or the changes in its financial position, for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Management has considered all potential component units to be included in the Division's reporting entity by applying the criteria set forth in accounting principles generally accepted in the United States of America. These criteria include but are not limited to the consideration of organizations for which the Division is financially accountable, or organizations for which the nature and significance of their relationship with the Division are such that exclusion would cause the Division's financial statements to be misleading or incomplete. Since no organizations meet these criteria, the Division has no component units.

The Division of Motor Vehicles is an operating division of the West Virginia Department of Transportation, which collects certain revenues for expenditure by the Division. The expenditures related to the collection of these revenues are recorded in the State Road Fund of the Division.

The Public Service Commission collects revenues from coal companies that are operating trucks with excessive weights. These revenues are deposited into the Coal Resource Fund, which is controlled by the Division.

GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS - The government-wide financial statements (the statement of net position and the statement of activities) report information of all of the activities of the primary government and its component units, if any. The effect of interfund activity has been removed from these government-wide financial statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from the legally separate component units for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function, segment or component unit are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function, segment, or component unit. Program revenues include charges to customers who purchase, use or directly benefit from goods or services provided by a given function, segment, or component unit. Program revenues also include grants and contributions that are restricted to meeting the operational or capital requirements of a particular function, segment, or component unit. Taxes and other items not properly included among program revenues are reported instead as general revenues. Resources that are dedicated internally are reported as general revenues rather than as program revenues. The Division does not allocate general government (indirect) expenses to other functions.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Separate financial statements are provided for governmental funds. Major individual governmental funds are reported as separate columns in the fund financial statements, as necessary.

MEASUREMENT FOCUS, BASIS OF ACCOUNTING, AND FINANCIAL STATEMENT PRESENTATION

GOVERNMENT-WIDE FINANCIAL STATEMENTS - The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

GOVERNMENTAL FUND FINANCIAL STATEMENTS - The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered, to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Division considers revenues to be available if they are collected within 45 days of the end of the current fiscal year. Principal revenues subject to accrual include gasoline and wholesale fuel taxes, automobile privilege taxes, federal reimbursements and other reimbursements for use of materials and services.

Expenditures generally are recorded when a liability is incurred, as under accrual accounting. Modifications to the accrual basis of accounting for the governmental fund financial statements include:

- Employees' vested annual leave is recorded as expenditures when utilized. The amount of accumulated annual leave unpaid at June 30, 2022, has been reported only in the government-wide financial statements.
- Division employees earn sick leave benefits, which accumulate, but do not vest. When separated from employment with the Division, an employee's sick leave benefits are considered ended and no reimbursement is provided. Any employee who retires, however, may convert any unused accumulated sick leave to increase service credits for retirement purposes. Additionally, certain employees may choose to apply any unused accumulated sick leave to pay a portion of the employee's postemployment health care insurance premium in lieu of increasing their service credits. Those employees cannot split their unused leave between the two options.
- Principal and interest on general long-term debt, including lease liabilities, are recorded as fund liabilities when due or when amounts have been accumulated in a debt service fund for transfer to the fiscal agent or for payment to be made early in the following year.
- Claims and judgments are recorded only when payment is due.
- Pension and other post-employment benefits expense is recorded when contributions are due in the governmental fund financial statements and recorded when incurred in the government-wide financial statements.
- Revenue from the paving contract settlement is recognized when available, either when cash proceeds are received or when credits are used during the year or within the availability period.

FUND ACCOUNTING - The Division uses funds to report its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

A fund is a separate accounting entity with a self-balancing set of accounts. The following summarizes the major governmental funds that are presented in the accompanying financial statements:

- State Road (General) Fund - This fund serves as the Division's General Fund and is used to account for all financial resources, except those accounted for in another fund. The State Road Fund is funded primarily by dedicated highway user taxes and fees and matching federal highway funds.
- Capital Projects Fund - This fund accounts for financial resources to be used for road construction financed by the proceeds from the sale of general obligation bonds.

INTERFUND ACTIVITY - As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges from the government's various functions. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned. The Division processes certain routine payments, such as payroll through the State Road Fund and allocates those costs to the other governmental funds based on individual projects charged. The interfund balances at June 30, 2022 generally are a result of these routine payments and transfers.

BUDGETING AND BUDGETARY CONTROL - The Division's expenditures are subject to the legislative budget process of the State, with annual budgets adopted utilizing the cash basis of accounting. The cash basis is modified at year-end to allow for payment of invoices up to 45 days after year-end for goods or services received prior to year-end. Appropriated budgeted expenditures, which lapse 45 days after the end of the fiscal year, are incorporated into the Division's overall financial plan, which includes revenue estimates developed by the Division and the State's executive branch. Expenditures are budgeted using natural categories of activity including specific categories of construction, maintenance, and operations, as well as special items. Any revisions that alter overall budgeted expenditures for an expenditure category must be approved by the State Legislature.

The Division's State Road (General) Fund, which includes the State Road Fund and A. James Manchin Fund, has a legislatively approved budget. However, the Capital Projects Fund, Coal Resource Fund, Industrial Access Fund, and certain monies reported within the State Road Fund in accordance with accounting principles generally accepted in the United States of America are not considered appropriated funds in accordance with the Division's budgetary reporting policy. Accordingly, these funds have not been reported in the Division's Statement of Revenues, Expenditures, and Changes in Fund Balance - Budget and Actual (Budgetary Basis) - State Road Fund. A reconciliation of the excess of revenues over expenditures and other financing uses for the year ended June 30, 2022, on the budgetary basis to the GAAP basis for the State Road fund follows:

Excess (deficiency) of revenues over expenditures - budgetary basis	\$ (45,221)
Basis of accounting differences (budgetary to GAAP)	(32,317)
Unbudgeted funds	<u>(19,764)</u>
Excess (deficiency) of revenues over expenditures - GAAP basis	<u>\$ (97,302)</u>

CASH AND CASH EQUIVALENTS - Cash and cash equivalents are short-term investments with original maturities of 90 days or less. Cash and cash equivalents principally consist of amounts on deposit in the State Treasurer's Office (STO) that are pooled funds managed by the West Virginia Board of Treasury Investments (BTI). Interest income from these investments is prorated to the Division at rates specified by the BTI based on the balance of the Division's deposits maintained in relation to the total deposits of all State agencies participating in the pool. Deposits are available with overnight notice to the BTI.

The STO has statutory responsibility for the daily cash management activities of the State's agencies, departments, boards, and commissions. The STO determines which funds to transfer to the BTI for investment in accordance with the West Virginia Code, policies set by the BTI, and provisions of bond indentures and trust agreements when applicable.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

INVENTORIES - Inventories are stated at weighted average cost generally using the “consumption method” whereby expenditures are recognized in the period in which inventory usage, as opposed to purchase, occurs. The portion of fund balance relating to inventories is reported as “Non-spendable” in the Government Fund Financial Statements.

CAPITAL ASSETS - Capital assets, which include buildings, non-infrastructure land, furniture and fixtures, rolling stock, scientific equipment, shop equipment and infrastructure assets (which are normally immovable and of value only to the Division, such as roads, bridges, and similar items), are reported in the statement of net position in the government-wide financial statements. Capital assets are defined by the Division as follows:

- Non-infrastructure assets with a useful life of at least three years and:
 - A cost of five thousand dollars or more for machinery, equipment, rolling stock, furniture, and fixtures; or
 - An acquisition cost of one hundred thousand dollars or more for buildings at the date of acquisition; and
- Infrastructure assets with a cost in excess of one million dollars.

Purchased and constructed capital assets are valued at historical cost or estimated historical cost. Donated capital assets are recorded at acquisition value.

The estimates of historical costs of buildings and other improvements were based on values that were compiled in 1983. Buildings and non-infrastructure land have been recorded at cost since 1983. Infrastructure constructed from July 1, 1980 to July 1, 2001 has been recorded at estimated historical cost. The estimated historical cost for years 1980-2001 was based on capital outlay expenditures reported by the West Virginia Department of Transportation in the annual reports for those years, less an amount estimated for the historical cost of the acquisition of land for right-of-way. The Division has not capitalized any infrastructure expenditures for assets constructed prior to July 1, 1980. The costs of normal maintenance and repairs that do not add to the asset’s value or materially extend an asset’s useful life are not capitalized. Interest incurred during construction of capital facilities is not capitalized.

New construction is put into construction in process until completed. At that time the projects are evaluated to determine if they meet the threshold for capitalization. The projects that don’t meet the threshold for capitalization are expensed.

Capital assets utilized in the governmental funds are recorded as expenditures in the governmental fund financial statements. Depreciation expense is recorded in the government-wide financial statements.

Capital assets are depreciated on the straight-line method over the assets’ estimated useful lives. There is no depreciation recorded for land and construction in progress. Generally, estimated useful lives are as follows:

- Machinery and equipment: 5 - 20 years
- Buildings: 15 - 40 years
- Furniture and fixtures: 3 - 20 years
- Rolling stock: 3 - 30 years
- Scientific equipment: 3 - 25 years
- Infrastructure: roads: 30 years
- Infrastructure: bridges: 50 years

Capital assets also include intangible right-to-use lease assets, initially measured at the present value of payments expected to be made during the lease term, plus certain other costs. Lease assets are amortized in a systematic and rational manner over the shorter of the lease term or the estimated useful life of the underlying asset, unless the lease contains a purchase option.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Costs incurred to construct capital assets that will not be maintained by the Division are contributed to the State agency that will own and maintain the asset. During fiscal year 2022, \$14,940 of capital assets constructed by the Division were contributed to the West Virginia Parkways Authority and are reported as construction on behalf of West Virginia Parkways Authority on the government-wide statement of activities.

ACCOUNTS AND TAXES RECEIVABLE - Accounts receivable in all funds report amounts that have arisen in the ordinary course of business and are stated net of allowances for uncollectable amounts. Governmental fund type receivables consist largely of amounts due from the Federal government. Interest and investment revenue receivable in all funds consist of revenues due on each investment. Taxes receivable in governmental funds represent taxes subject to accrual, primarily motor fuel excise taxes and automobile privilege taxes, which are collected within forty-five days after year-end. The uncollectible amounts are based on collection experience and a review of the status of existing receivables.

CLAIMS - Claims awarded against the Division in the West Virginia State Court of Claims must be approved and funded by legislative action. Expenditures in the fund financial statements for such claims are recognized to the extent that claims awarded are approved and funded by the Legislature. A liability for unfunded claims is recorded in the government-wide financial statements when management and the Division's legal section determine that it is probable that a loss has occurred and the loss can be reasonably estimated. Such claims are segregated as either tort or contract actions and estimates of loss are based on an analysis of the individual claims and historical experience.

COMPENSATED ABSENCES - Division employees generally earn vacation and sick leave on a monthly basis. Vacation, up to specific limits, is fully vested when earned, and sick leave, while not vesting to the employee prior to retirement, can be carried over to subsequent periods. During 2008, the legislature passed a bill allowing regular full-time employees hired before July 1, 2001, having accumulated at least 65 days of sick leave, to be paid, at their option, for a portion of their unused sick leave, not to exceed the number of sick leave days that would reduce the employee's sick leave balance to less than fifty days. The employee shall be paid at a rate equal to one quarter of their usual rate of daily pay during that calendar year. Expenditures for compensated absences are recognized as incurred in the governmental fund financial statements. The government-wide financial statements present the cost of accumulated compensated absences as a liability.

OTHER POSTEMPLOYMENT BENEFITS - For purposes of measuring the net OPEB asset, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the State OPEB Plan and additions to/deductions from the OPEB Plan's fiduciary net position have been determined on the same basis as they are reported by West Virginia Retiree Health Benefit Trust Fund (RHBT). For this purpose, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. See Note 13 for further discussion.

PENSION - For purposes of measuring the net pension asset, deferred outflows of resources and inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the West Virginia Public Employees Retirement System (PERS) and additions to/deductions from PERS fiduciary net position have been determined on the same basis as they are reported by PERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments of the PERS are reported at fair value.

PREMIUMS, DISCOUNTS, AND ISSUANCE COSTS - In the government-wide financial statements long-term debt and other long-term obligations are presented in the columns for governmental activities. Where material, bond and note premiums and discounts are deferred and amortized over the life of the debt. Bonds and notes payable are reported net of the applicable bond premium or discount. In the governmental fund financial statements, governmental funds recognize bond premiums and discounts, as well as bond issuance costs. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuance are reported as other financing sources while discounts are reported as other financing uses. Issuance costs, other than bond insurance, whether or not withheld from the actual debt proceeds received, are reported as expenditures.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

DEFERRED OUTFLOWS OF RESOURCES/DEFERRED INFLOWS OF RESOURCES - The statement of net position reports a separate financial statement element called *deferred outflows of resources*. This financial statement element represents a consumption of net assets that applies to a future period and so will *not* be recognized as an outflow of resources (expense) until that time. The Division reports \$76,635 as deferred outflows of resources related to pensions and OPEB on the statement of net position.

The statement of net position and balance sheet report a separate financial statement element called *deferred inflows of resources*. This financial statement element represents an acquisition of net assets that applies to a future period and so will *not* be recognized as an inflow of resources (revenue) until that time. The Division reports \$242,366 as deferred inflows of resources related to pensions and OPEB and gain on the refunding of debt on the statement of net position and \$58,588 as deferred inflows of resources related to unavailable revenue associated with a paving settlement on the balance sheet (see further information on the paving settlement in Note 4).

NET POSITION - As required by GASB Standards, the Division displays net position in the government-wide financial statements in three components: net investment in capital assets; restricted and unrestricted.

NET INVESTMENT IN CAPITAL ASSETS - This component of net position consists primarily of capital assets, including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

RESTRICTED NET POSITION - Restricted net position is assets whose use or availability has been restricted and the restrictions limit the Division's ability to use the resources to pay current liabilities. When both restricted and unrestricted resources are available for use, it is the Division's policy to use restricted resources first, then unrestricted resources as needed. Amounts shown as restricted on the statement of net position are restricted by debt agreements and enabling legislation.

UNRESTRICTED NET POSITION - Unrestricted net position consists of net position that does not meet the definition of "restricted" or "net investment in capital assets." In the governmental environment, net position is often designated to indicate that management does not consider them to be available for general operations. These types of constraints on resources are internal and management can remove or modify them. Such internal designations are not reported on the face of the statement of net position.

RESTATEMENT OF BEGINNING NET POSITION – Net position as of July 1, 2021 was restated to \$8,662,029 which is a decrease of \$153,688 from \$8,815,717 reported at June 30, 2021. The Division implemented a new capital asset tracking system during fiscal year 2022 and as part of that implementation, completed a comprehensive review of all capital assets. The adjustment results from those efforts and represents net amounts removed from capital assets related to prior periods.

FUND BALANCES - The Division has classified in the governmental fund financial statements its fund balances in the following categories: non-spendable, restricted, committed, assigned and unassigned as applicable.

The non-spendable fund balance classification includes amounts that cannot be spent because they are either not in spendable form or are legally or contractually required to be maintained intact.

The restricted fund balance classification includes amounts restricted for use to specific purposes including externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments; imposed by law through constitutional provisions, or enabling legislation including legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. Legal enforceability means that a government can be compelled by an external party, such as citizens, public interest groups, or the judiciary, to use resources created by enabling legislation only for the purposes specified by the legislation.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Committed fund balances are amounts that can only be used for specific purposes pursuant to constraints imposed by appropriation legislation passed by the West Virginia State Legislature, which is the highest level of decision-making authority for the State. Those committed amounts cannot be used for any other purpose unless the West Virginia State Legislature passes new legislation concerning those amounts. The Division has no committed fund balances at June 30, 2022.

Assigned fund balances are constrained by the Division's intent to use such funds for specific purposes, but are neither restricted nor committed. The specific purpose for which the funds are intended is expressed within the appropriation requests of the Division and approved by the State Budget Office, according to the West Virginia State Code. Assigned fund balances include all remaining amounts that are not classified as non-spendable and are neither restricted nor committed. The Division has no assigned fund balances at June 30, 2022.

Unassigned fund balance is the residual classification for the General Fund. This classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the General Fund. Any negative fund balances are unassigned.

The Division's policy is to use funds in the order of the most restrictive to the least restrictive.

NEWLY ADOPTED STATEMENTS ISSUED BY THE GOVERNMENTAL ACCOUNTING STANDARDS BOARD - The Division has implemented GASB Statement No. 87, *Leases*, effective for fiscal years beginning after June 15, 2021. This Statement requires lessees and lessors to report leases under a single model. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources for each lease. This Statement also requires additional notes to financial statements related to the timing, significance, and purpose of a government's leasing arrangements. As a result of this implementation, the Division has recorded right-to-use assets and leases payable on the statement of net position. See additional information in Notes 2, 8, 9 and 15.

The Division implemented GASB Statement No. 92, *Omnibus 2020*, which is effective for fiscal years beginning after June 15, 2021. The requirements of this Statement address a variety of items, including specific provisions regarding the following topics: (1) GASB Statement No. 87 Implementation; (2) intra-entity transfers of assets; (3) postemployment benefits; (4) government acquisitions; (5) risk financing and insurance related activities of public entity risk pools; and (6) fair value measurements and derivative instruments. The adoption of GASB Statement No. 92 did not have a significant impact on the financial statements.

The Division implemented GASB Statement No. 97, *Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans—an amendment of GASB Statements No. 14 and No. 84, and a supersession of GASB Statement No. 32.*, parts of which were effective immediately, while other provisions are effective for reporting periods beginning after June 15, 2021. The provisions that were immediately effective required that for purposes of determining whether a primary government is financially accountable for a potential component unit, except for a potential component unit that is a defined contribution pension plan, a defined contribution OPEB plan, or an other employee benefit plan that the absence of a governing board should be treated the same as the appointment of a voting majority of a governing board if the primary government performs the duties that a governing board typically would perform and limits the applicability of the financial burden criterion in GASB Statement No. 84 to defined benefit pension plans and defined OPEB plans administered through trusts. This Statement also requires that an IRC Section 457 Plan be classified as either a pension plan or an other employee benefit plan depending on whether the plan meets the definition of a pension plan and clarifies that arrangements under IRC Section 457 should be assessed as a potential fiduciary activity under GASB Statement No. 84. As part of the supersession of GASB Statement No. 32, this Statement also requires that investments of all Section 457 plans should be measured as of the end of the plan's reporting period in all circumstances. The portion of GASB Statement No. 97 that was effective immediately did not have a significant impact on the financial statements. The adoption of the remaining portions of GASB Statement No. 97 did not have a significant impact on the financial statements.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

GASB has issued Statement No. 99, *Omnibus 2022*, with varying effective dates based upon each provision ranging from being effective immediately to fiscal years beginning after June 15, 2023. The requirements of this Statement address a variety of items, including specific provisions regarding the following topics: (1) guidance and terminology updates on reporting derivative instruments that do not meet the definition of either an investment derivative or hedging derivative, but are within the scope of GASB Statement No. 53; (2) clarification of provisions of GASB Statement Nos. 87, 94, and 96; (3) extension of the period during which the London Interbank Offered Rate (LIBOR) is considered an appropriate benchmark interest rate; (4) accounting for Supplemental Nutrition Assistance Program (SNAP) benefits; (5) non-monetary transactions; (6) clarification related to the focus of government-wide financial statements under GASB Statement No. 34; and (7) terminology updates related to GASB Statement No. 63. The adoption of GASB Statement No. 99 did not have a significant impact on the financial statements.

RECENT STATEMENTS ISSUED BY THE GOVERNMENTAL ACCOUNTING STANDARDS BOARD - GASB has issued Statement No. 91, *Conduit Debt Obligations*, which is effective for fiscal years beginning after December 15, 2021. The requirements of this Statement eliminate the existing option for issuers to report conduit debt obligations as their own liabilities, thereby ending significant diversity in practice. The clarified definition will resolve stakeholders' uncertainty as to whether a given financing is a conduit debt obligation. Requiring issuers to recognize liabilities associated with additional commitments extended by issuers and to recognize assets and deferred inflows of resources related to certain arrangements associated with conduit debt obligations also will eliminate diversity or inconsistency. This Statement requires issuers to disclose general information about their conduit debt obligations, organized by type of commitment, including the aggregate outstanding principal amount of the issuers' conduit debt obligations and a description of each type of commitment. Issuers that recognize liabilities related to supporting the debt service of conduit debt obligations also should disclose information about the amount recognized and how the liabilities changed during the reporting period. The Division has not yet determined the effect that the adoption of GASB Statement No. 91 may have on its financial statements.

GASB has issued Statement No. 94, *Public-Private and Public-Public Partnerships (PPPs) and Availability Payment Arrangements (APAs)*, which is effective for fiscal years beginning after June 15, 2022. The requirements of this Statement establish the definitions of PPPs and APAs and providing uniform guidance on accounting and financial reporting for transactions that meet those definitions, but are outside of the scope of Lease or Service Concession Arrangement Guidance. That uniform guidance will provide more relevant and reliable information for financial statement users and create greater consistency in practice. This Statement will require governments to report assets and liabilities related to PPPs consistently and disclose important information about PPP transactions. The required disclosures will allow users to understand the scale and important aspects of a government's PPPs and evaluate a government's future obligations and assets resulting from PPPs. The Division has not yet determined the effect that the adoption of GASB Statement No. 94 may have on its financial statements.

GASB has issued Statement No. 96, *Subscription-Based Information Technology Arrangements (SBITA)*, which is effective for fiscal years beginning after June 15, 2022. The requirements of this Statement establish a definition for SBITA which is defined as a contract that conveys control of the right to use another party's (a SBITA vendor's) information technology (IT) software, alone or in combination with tangible capital assets (the underlying IT assets), as specified in the contract for a period of time in an exchange or exchange-like transaction. Generally, this Statement will require a government to recognize a right-to-use subscription asset—an intangible asset—and a corresponding subscription liability. The Statement also establishes guidance for the treatment of costs related to SBITA activities other than subscription payments. Those activities are: Preliminary Project Stage, Initial Implementation Stage, and Operation and Additional Implementation Stage. This Statement also requires a government to disclose essential information about the arrangement such as the amount of the subscription asset, accumulated amortization, other payments not included in the measurement of a subscription liability, principal and interest requirements for the subscription liability. The Division has not yet determined the effect that the adoption of GASB Statement No. 96 may have on its financial statements.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

GASB has issued Statement No. 100, *Accounting Changes and Error Corrections- an Amendment of GASB Statement No. 62*, which is effective for fiscal years beginning after June 15, 2023. This Statement defines accounting changes as changes in accounting principles, changes in accounting estimates, and changes to or within the financial reporting entity and describes the transactions or other events that constitute those changes. Those changes include things like: certain changes in accounting principles, certain changes in estimates that result from a justified or preferable change in measurement or new methodology. This statement requires that changes in accounting principles and error corrections be reported retroactively by restating prior periods; changes to or within the reporting entity be reported by adjusting beginning balances of the current period; and changes in accounting estimates be reported prospectively by recognizing the change in the current period. If the change in accounting principle is the result of a new pronouncement the requirements only apply absent specific transition guidance in the pronouncement. Under this standard it is also necessary to display the total adjustment to beginning net position, fund balance, or fund net position on the face of the financial statements, by reporting unit. This statement also specifies both qualitative and quantitative disclosure requirements. Lastly, this statement provides guidance for if and how these changes should be reflected in required supplementary information and supplementary information. The Division has not yet determined the effect that the adoption of GASB Statement No. 100 may have on its financial statements.

GASB has issued Statement No. 101, *Compensated Absences*, which is effective for fiscal years beginning after December 15, 2023. This statement modifies the criteria requiring a liability for compensated absences to be recognized. Under this statement a liability must be recognized for leave that has not been used, or leave that has been used but not yet paid in cash or settled through noncash means. Furthermore, the liability for leave that has not been used is recognized if the leave is attributed to services already rendered, that accumulates, and the leave is more likely than not to be used for time off or otherwise paid in cash or settled through noncash means. If the leave is considered more likely than not to be settled through conversion to a defined benefit post-employment benefit it should not be included in the liability for compensated absences. This statement also specifies certain types of benefits where the liability is not recognized until leave commences or where the liability is not recognized until the leave is used. The statement also provides guidance for measuring the liability and modifies the disclosure requirements allowing for disclosure of only the net change in the liability, and no longer requiring disclosure of which governmental funds have been used to liquidate the liabilities. The Division has not yet determined the effect that the adoption of GASB Statement No. 101 may have on its financial statements.

NOTE 2: CHANGE IN ACCOUNTING PRINCIPLE

During fiscal year 2022, the Division implemented GASB Statement No. 87, *Leases*. It establishes requirements for lease accounting based on the principle that leases are financings of the right to use an underlying asset. A lessee is required to recognize a lease liability and a right-to-use lease asset. The implementation has no impact on beginning net position for fiscal year 2022 since the right-to-use lease asset equaled the lease liability. The Division recognized \$21,641 as a right-to-use lease asset and lease liability as of July 1, 2021, the date of implementation.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 3: CASH AND CASH EQUIVALENTS

The composition of cash and cash equivalents which are carried at amortized cost, were as follows at June 30:

Cash on deposit with State Auditor	\$ 45,903
Cash on deposit with State Auditor in Debt Service Fund	59
Cash on deposit with State Treasurer invested in BTI	
WV Money Market Pool	584,919
Cash on deposit with State Treasurer invested in BTI	
WV Money Market Pool (Roads to Prosperity)	989,772
Cash on deposit with BNY Mellon Bank	1
Cash in transit	<u>1,600</u>
Total cash and cash equivalents	<u>\$ 1,622,254</u>

The State Treasurer has statutory responsibility for the daily cash management activities of the State's agencies, departments, boards and commissions, and transfers funds to the BTI for investment in accordance with West Virginia statutes, policies set by the BTI and provisions of bond indentures and trust agreements when applicable.

The Division's cash balances invested by the BTI in the West Virginia Money Market Pool include investment income pro-rated to the Division at rates specified by the BTI based on the balance of the deposits maintained in relation to the total deposits of all State agencies participating in the pool. Investments in the West Virginia Money Market Pool are available to the Division with overnight notice. Remaining cash balances are on deposit or in transit to/from the State Treasurer.

WEST VIRGINIA BOARD OF TREASURY INVESTMENTS (BTI) WV MONEY MARKET POOL - The BTI has adopted an investment policy in accordance with the "Uniform Prudent Investor Act." The "prudent investor rule" guides those with responsibility for investing the money for others. Such fiduciaries must act as a prudent person would be expected to act, with discretion and intelligence, to seek reasonable income, preserve capital, and, in general, avoid speculative investments. The BTI's investment policy is to invest assets in a manner that strives for maximum safety, provides adequate liquidity to meet all operating requirements, and achieves the highest possible investment return consistent with the primary objectives of safety and liquidity. The BTI recognizes that risk, volatility, and the possibility of loss in purchasing power are present to some degree in all types of investments. Due to the short-term nature of the WV Money Market Pool, the BTI believes that it is imperative to review and adjust the investment policy in reaction to interest rate market fluctuations/trends on a regular basis and has adopted a formal review schedule. Investment policies have been established for the WV Money Market Pool.

CREDIT RISK - Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The WV Money Market Pool has been rated AAAM by Standard & Poor's. A fund rated AAAM has extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit, market, and/or liquidity risks. AAAM is the highest principal stability fund rating assigned by Standard & Poor's. Neither the BTI itself nor any of the other Consolidated Fund pools or accounts has been rated for credit risk by any organization. The WV Money Market Pool is subject to credit risk.

The BTI limits the exposure to credit risk in the WV Money Market Pool by requiring all long-term corporate debt to be rated A+ or higher by Standard & Poor's (or its equivalent) and short-term corporate debt be rated at A-1 by Standard & Poor's (or its equivalent). The pool must have at least 15% of its assets in U.S. Treasury obligations or obligations guaranteed as to repayment of interest and principal by the United States of America. At June 30, 2022, the WV Money Market Pool investment had a total carrying value of \$8,145,595, of which the Division's ownership represents 19.33%.

INTEREST RATE RISK - Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The WV Money Market Pool is subject to interest rate risk.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 3: CASH AND CASH EQUIVALENTS (Continued)

The overall weighted average maturity of the investments of the WV Money Market Pool cannot exceed 60 days. Maximum maturity of individual securities cannot exceed 397 days from date of purchase, except for government floating rate notes, which can be up to 762 days. The following table provides information on the weighted average maturities for the various asset types in the WV Money Market Pool:

Security Type	Carrying Value (In Thousands)	WAM (Days)
U.S. Treasury notes	\$ 37,503	1
Commercial paper	5,805,709	23
Negotiable certificates of deposit	1,466,500	25
Repurchase agreements	617,400	1
Money market funds	217,659	1
Cash	824	1
	<u>\$ 8,145,595</u>	21

OTHER RISKS - Other risks can include concentration of credit risk, custodial credit risk, and foreign currency risk. The WV Money Market Pool is not exposed to these risks as described below.

Concentration of credit risk is the risk of loss attributed to the magnitude of the WV Money Market Pool or an account's investment in a single corporate issuer. The BTI investment policy prohibits the WV Money Market Pool from investing more than 5% of their assets in any one corporate name or one corporate issue.

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the BTI will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. Repurchase agreements are required to be collateralized by at least 102% of their value, and the collateral is held in the name of the BTI. The BTI or its agent does not release cash or securities until the counterparty delivers its side of the transaction.

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The WV Money Market Pool does not hold interests in foreign currency or interests valued in foreign currency.

NOTE 4: ACCOUNTS RECEIVABLE

Accounts receivable at June 30, 2022 consisted of the following:

Federal aid earned	\$ 77,753
Paving settlement	58,588
Other receivables	<u>7,850</u>
Combined total receivables	144,191
Less: allowance for uncollectibles	<u>(120)</u>
Net accounts receivable	<u>\$ 144,071</u>

Accounts receivable representing federal aid earned relate principally to the Federal Highway Administration's (FHWA) participating share of expenditures on highway projects and Federal Emergency Management Agency (FEMA) participating expenditures in response to certain disaster related projects.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 4: ACCOUNTS RECEIVABLE (Continued)

During 2021, the State entered into a settlement agreement with a paving vendor. As it relates to the Division, the settlement provided for \$15.7 million of cash proceeds and \$71 million in credits for use on certain construction projects. During 2021, the full \$15.7 million was received and approximately \$2.8 million of credits were used. On the government-wide financial statements, the full settlement amount was recognized as program revenue in the road maintenance function in 2021. During 2022, \$9.6 million of these credits were used.

NOTE 5: TAXES RECEIVABLE

Taxes receivable at June 30, 2022 consisted of the following:

Automobile privilege taxes	\$ 22,554
Motor fuel excise taxes	56,621
Registration fees	2,228
Other	<u>332</u>
Total taxes receivable	<u><u>\$ 81,735</u></u>

NOTE 6: DUE FROM/TO OTHER STATE OF WEST VIRGINIA AGENCIES

Amounts due from other State agencies at June 30, 2022 consisted of the following:

The Department of Motor Vehicles	\$ 2,490
Other agencies	<u>496</u>
Total amounts due from other State agencies	<u><u>\$ 2,986</u></u>

Amounts due to other State agencies at June 30, 2022 consisted of the following:

Public Employee's Insurance Agency	\$ 2,915
Public Employee's Retirement	2,158
Other agencies	<u>1,884</u>
Total amounts due to other State agencies	<u><u>\$ 6,957</u></u>

NOTE 7: INVENTORIES

Inventories at June 30, 2022 consisted of the following:

Material and supplies	\$ 38,424
Equipment repair parts	18,422
Gas and lubrication supplies	<u>4,858</u>
Total inventories	<u><u>\$ 61,704</u></u>

* The Division adopted the requirements of GASB Statement No. 87, *Leases*, effective July 1, 2021, and has applied the provisions of this standard to the beginning of the period of adoption recognizing \$21,641 as a right-to-use asset.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 8: CAPITAL ASSETS (Continued)

Current year depreciation totaling \$314,848 was allocated as separate line items in the statement of activities under the major functions of the Division of Maintenance and Improvements. The remaining \$11,714 unallocated depreciation and amortization expense is included as a separate line item in the statement of activities. Infrastructure depreciation is primarily related to construction type activities; depreciation of shop and rolling stock assets is primarily related to maintenance type activities; and depreciation and amortization of buildings and improvements and furniture and fixtures support all of the various activities of the Division.

A summary of depreciation and amortization on each capital asset type follows:

<u>Asset Type</u>	<u>Depreciation</u>
Road Maintenance	
Rolling stock	\$ 13,096
Shop equipment	36
Scientific equipment	3
Total road maintenance	<u>13,135</u>
Other Road Operations	
Infrastructure - roads	230,056

Total long-term obligations				\$ 2,393,722	\$ 49,463	\$ 390,911	\$ 2,052,274

* The Division adopted the requirements of GASB Statement No. 87, *Leases*, effective July 1, 2021, and has applied the provisions of this standard to the beginning of the period of adoption recognizing \$21,641 as a lease liability.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 9: LONG-TERM OBLIGATIONS (Continued)

General obligation bond issues are authorized by constitutional amendments and are general obligations of the State. Legislation implementing the amendments requires that debt service on the bonds be paid from the State Road Fund and, to the extent that there are insufficient funds therein, from a levy of an annual state tax. All bonds authorized under prior constitutional amendments have been issued and include amounts outstanding above.

Surface Transportation Improvement Special Obligation Notes are authorized under Chapter 17, Article 17A of the Code of West Virginia, 1931, as amended. The Code provides for the issuance of special obligation notes to facilitate the construction of highways, secondary roads and bridges to be funded wholly or in part by federal dollars and in anticipation of reimbursement from such sources. The federal legislation that enables reimbursement of such costs is included in Title 23, Section 122. The Memorandum of Agreement executed between the Federal Highway Administration and the Division of Highways documents the procedures for managing the stewardship and oversight of highway projects that are financed with the proceeds of these notes.

Debt service expenditures included interest of \$92,679 for the year ended June 30, 2022. Total debt service costs, exclusive of coupon redemption costs, for each of the next five years and thereafter, on general obligation bonds payable and revenue notes payable liquidated through debt service funds, are as follows:

	2023	2024	2025	2026	2027	2028- 2032	2033- 2037	2038- 2042	2043- 2046	Total

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 9: LONG-TERM OBLIGATIONS (Continued)

GENERAL OBLIGATION BONDS - The State was authorized by constitutional amendment to issue general obligation bonds to fund highway and road construction projects known as Safe Road Bonds and subsequent General Obligation State Road Refunding Bonds.

The Division issued on behalf of the State, \$35,135 in General Obligation State Road Refunding Bonds, Series 2010A on July 22, 2010, resulting in proceeds of \$38,048. This bond issue refunded the Series 1998 and Series 2001 General Obligation State Road Bonds with cumulative outstanding principal of \$37,730. During 2021, these bonds were refunded with the issuance of General Obligation State Road Refunding Bonds, Series 2021B.

The Division issued on behalf of the State, \$133,710 in General Obligation Refunding Bonds, Series 2015A on April 28, 2015, resulting in proceeds of \$159,908. This series refunded Series 2005A General Obligation State Road Bonds with cumulative outstanding principal of \$159,300.

The State was authorized by constitutional amendment to issue general obligation bonds to fund highway and road construction projects known as Road to Prosperity Bonds and subsequent General Obligation State Road Refunding Bonds. Bonds of \$800,000 were issued during June of 2018, resulting in proceeds of \$913,435. Bonds of \$600,000 were issued during December of 2019, resulting in proceeds of \$746,576. Bonds of \$214,085 were issued in 2021, resulting in proceeds of \$277,455. Included in this 2021 issuance is \$14,085 of refunding bonds.

General obligation bonds are secured by pledged receipts of annual tax revenue.

REVENUE NOTES - The State was authorized by constitutional amendment to issue \$500,000 of Surface Transportation Improvements Special Obligation Notes (GARVEE Notes) to fund highway and road construction projects. These notes will be repaid from future federal highway revenues.

GARVEE Notes of \$219,985 were issued during October 2017, resulting in proceeds of \$259,867. GARVEE Notes of \$78,810 were issued on August 1, 2018, resulting in proceeds of \$90,870.

In 2016, GARVEE Notes of \$53,380 were defeased due to the cancelation of the related project. At June 30, 2022, \$9,870 of the defeased debt remained outstanding.

GARVEE Notes are secured by pledged receipts of eligible FHWA funds received by the Division, representing reimbursement of the costs incurred in connection with the federal-aid projects financed by the GARVEE notes.

(amounts expressed in thousands)

NOTE 9: LONG-TERM OBLIGATIONS (Continued)

Long-term obligations for compensated absences, claims payable, leases, and general obligation bonds are as follows:

	Compensated Absences	Claims and Judgments	Leases Payable	General Obligation Bonds and Revenue Notes and Premium	Total
Current liabilities	\$ 17,460	\$ 622	\$ 4,415	\$ 98,434	\$ 120,931
Long-term liabilities	<u>5,172</u>	<u>13,590</u>	<u>13,107</u>	<u>2,038,756</u>	<u>2,070,625</u>
Totals	<u>\$ 22,632</u>	<u>\$ 14,212</u>	<u>\$ 17,522</u>	<u>\$ 2,137,190</u>	<u>\$ 2,191,556</u>

The following summarizes the estimated claims liability for the current year and that of the preceding two years.

	Year Ended June 30, 2022	Year Ended June 30, 2021	Year Ended June 30, 2020
Estimated claims liability, July 1	\$ 23,737	\$ 36,158	\$ 21,843
Additions for claims incurred during the year	1,346	2,245	2,609
Changes in estimates for claims of prior periods	(10,254)	(13,831)	14,309
Payments on claims	<u>(617)</u>	<u>(835)</u>	<u>(2,603)</u>
Estimated claims liability, June 30	<u>\$ 14,212</u>	<u>\$ 23,737</u>	<u>\$ 36,158</u>

At June 30, 2022, approximately \$53 million of claims were pending against the Division in the West Virginia Court of Claims. Related to these claims, the Division has an estimated obligation of \$14,212 (\$10,712 of tort claims and \$3,500 in environmental claims) recorded in the government-wide statement of net position, based on management's evaluation of the nature of such claims and consideration of historical loss experience for the respective types of action. Such claims will be recognized primarily as expenditures of the State Road Fund if, and when, they are approved for payment by the Legislature in accordance with legal statutes. Also included in claims are claims that have been settled in the court of claims and approved for payment through legislative action. These amounts total approximately \$622. During the normal course of operations, the Division may become subject to other litigation. No provision has been made in the financial statements for liabilities, if any, from such litigation.

The Division's obligation for accrued vacation leave time includes leave time and related costs expected to be paid to employees in the future and are determined using wage levels in effect at the date the obligation is calculated. Upon retirement, an employee may apply unused sick leave to reduce their future insurance premiums paid to the West Virginia Public Employees Insurance Agency or apply unused sick leave or annual leave or both to obtain a greater benefit under the West Virginia Public Employees Retirement System.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 10: RELATED PARTY TRANSACTIONS WITH THE STATE OF WEST VIRGINIA

The Division enters into certain transactions with various agencies of the State. The following summarizes the nature and terms of the most significant transactions:

The Division leases from the Department of Administration substantially all of State Office Building No. 5, which is owned by the State Building Commission. The Division may be released from its obligation only at the option of the lessor. The Division is obligated under leases, which expire June 30, 2024, for rental payments of approximately \$2.3 million annually.

The Division's employees participate in various benefit plans offered by the State. Employer contributions to these plans are mandatory. During the year ended June 30, 2022, the Division incurred payroll related expenditures of approximately \$34,549 for employee health insurance benefits provided through the West Virginia Public Employees Insurance Agency, approximately \$25,804 in employer matching contributions to the State Public Employees Retirement System and approximately \$5,913 for employee OPEB benefits provided by the West Virginia Retiree Health Benefits Trust Fund.

NOTE 11: COMMITMENTS AND CONTINGENCIES

The amount of unexpended balances of highway design and construction contracts entered into by the Division with various contractors approximated \$1,796,707 at June 30, 2022.

The Division participates in several federal programs which are subject to audit by the federal awarding agency. Any disallowed claims, including amounts already collected by the Division, may constitute a liability to the federal awarding agency of the applicable funds. The Division reports a liability related to costs incurred on federally funded projects outside of project end dates. These amounts may be re-appropriated to other Federal Highway Administration grants. The Division expects other such amounts, if any, to be immaterial to the financial position of the Division. The Division records these disallowed costs in the period the audit is finalized.

Based on the Division's Inspection Program, the Division has reviewed the information on obsolete and deficient bridges. The Division is concerned about safety and tries to prioritize bridges for repair and replacement based on engineering assessments. The Division's long-range plans to address this issue will be impacted by actions that may be taken by both the federal and state government, including funding levels provided for this purpose.

Various legal proceedings and claims related to condemnation and eminent domain cases are pending against the Division. At June 30, 2022, there were approximately 184 open cases. These cases involve the acquisitions of properties by the Division for right of way purposes. The Division has paid the applicable courts on behalf of the land grantors, estimated fair values of the properties acquired. The open cases may result in condemnation commissioners or jury verdicts awarding amounts in excess, of the previously paid estimated fair value amounts. In these situations, the excess award amount plus a statutory interest rate of 10% would be paid to the grantor. The interest amount would be calculated on the excess award amount from the date of the petition filing to the date of the excess payment amount to the court. Several of these cases relate to condemnations from the 1960s and 1970s. There is no estimate available as to the amount of monies needed to resolve these cases. Management is of the opinion, that any liability resulting from these claims would have no material adverse effect on the financial position of the Division.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 12: RETIREMENT PLAN

PLAN DESCRIPTION - The Division contributes to the West Virginia Public Employees Retirement System (PERS), a cost-sharing multiple-employer defined benefit pension plan administered by the West Virginia Consolidated Public Retirement Board (CPRB). PERS covers substantially all employees of the State and its component units, as well as employees of participating non-state governmental entities who are not participants of another State or municipal system. Benefits under PERS include retirement, death and disability benefits, and have been established and may be amended by action of the State Legislature. The CPRB issues a publicly available financial report that includes financial statements and required supplementary information for PERS. That report may be obtained at www.wvretirement.com.

BENEFITS PROVIDED - Benefits are provided through PERS using a two-tiered system. Effective July 1, 2015, PERS implemented the second tier, Tier II. Employees hired, for the first time, on or after July 1, 2015 are considered Tier II members. Tier I and Tier II members are subject to different regulations.

Tier I: Employees who retire at or after age 60 with five or more years of credited service, or at least age 55 with age and service equal to 80 years or greater, are entitled to a retirement benefit established by State statute, payable monthly for life, in the form of a straight-life annuity equal to two percent of the employee's final average salary multiplied by years of service. Final average salary is the average of the highest annual compensation received by an employee during any period of three consecutive years of credited service included within fifteen years of credited service immediately preceding the termination date of employment with a participating public employer or, if the employee has less than three years of credited service, the average of the annual rate of compensation received by the employee during the total years of credited service. Terminated members with at least five years of contributory service who do not withdraw their accumulated contributions may elect to receive their retirement annuity beginning at age 62.

Tier II: Employees who retire at or after age 62 with ten or more years of credited service are entitled to a retirement benefit established by State statute, payable monthly for life, in the form of a straight-life annuity equal to two percent of the employee's final average salary multiplied by years of service. Final average salary is the average of the highest annual compensation received by an employee during any period of five consecutive years of credited service included within fifteen years of credited service immediately preceding the termination date of employment with a participating public employer. Terminated members with at least ten years of contributory service who do not withdraw their accumulated contributions may elect to receive their retirement annuity beginning at age 64.

CONTRIBUTIONS - While contribution rates are legislatively determined, actuarial valuations are performed to assist PERS and the State Legislature in determining contribution rates. Current funding policy requires employer contributions of 10.0% for the years ended June 30, 2022, 2021, and 2020. The employee contribution rate is 4.5% and 6.0% for Tier I and Tier II employees, respectively.

During the years ended June 30, 2022, 2021, and 2020, the Division's contributions to PERS required and made were approximately \$25,804, \$24,961, and \$25,368, respectively. The General Fund is typically used to liquidate pension liabilities.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 12: RETIREMENT PLAN (Continued)

PENSION ASSET, PENSION EXPENSE, DEFERRED OUTFLOWS OF RESOURCES, AND DEFERRED INFLOWS OF RESOURCES RELATED TO PENSIONS - At June 30, 2022, the Division reported an asset of \$137,597 for its proportionate share of the net pension asset. The net pension asset was measured as of June 30, 2021, and the total pension asset used to calculate the net pension asset was determined by an actuarial valuation as of June 30, 2020, rolled forward to the measurement date of June 30, 2021. The Division's proportion of the net pension asset was based on a projection of the Division's long-term share of contributions to the pension plan relative to the projected contributions of all participating employers, actuarially determined. At June 30, 2021, the Division's proportionate share was 15.67%, which was a decrease of 0.08% from its proportionate share measured as of June 30, 2020.

For the year ended June 30, 2022, the Division recognized pension expense of (\$25,573). At June 30, 2022, the Division reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Net difference between projected and actual earnings on pension plan investments	\$ -	\$ 176,239
Changes in assumptions	26,181	1,115
Changes in proportion and differences between Division contributions and proportionate share of contributions	357	289
Division contributions made subsequent to the measurement date of June 30, 2021	25,804	-
Differences between expected and actual experience	15,703	522
Total	<u>\$ 68,045</u>	<u>\$ 178,165</u>

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 12: RETIREMENT PLAN (Continued)

The amount reported as deferred outflows of resources related to pensions of \$25,804 resulting from Division contributions subsequent to the measurement date will be recognized as an addition to the net pension asset in the year ended June 30, 2023. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

<u>Year ended June 30,</u>	
2023	\$ (20,117)
2024	(21,632)
2025	(42,348)
2026	(51,827)
	<u>\$ (135,924)</u>

ACTUARIAL ASSUMPTIONS AND METHODS - The total pension liability in the June 30, 2021 actuarial valuation was determined using the following actuarial assumptions:

Inflation	2.75%
Salary increases	2.75 - 6.75%, average, including inflation
Investment rate of return	7.25%, net of pension plan investment expense

Mortality rates were based on 100% of Pub-2010 General Employees table, below-median, headcount weighted, projected with scale MP-2018 for active members; 108% of Pub-2010 General Retiree Male table, below-median, headcount weighted, projected with scale MP-2018 for retired healthy males; 122% of Pub-2010 General Retiree Female table, below-median, headcount weighted, projected generationally with scale MP-2018 for retired healthy females, 118% of Pub-2010 General/Teachers Disabled Male table, headcount weighted, projected generationally with scale MP-2018 for disabled males, and 117% of Pub-2010 General/Teachers Disabled Female table, headcount weighted, projected generationally with scale MP-2018 for disabled females.

The actuarial economic assumptions were based on the results of an actuarial experience study for the period July 1, 2015 through June 30, 2020. All other actuarial assumptions were based on the results of an actuarial experience study for the period July 1, 2013 through June 30, 2018.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 12: RETIREMENT PLAN (Continued)

LONG-TERM EXPECTED RATES OF RETURN - The long-term rates of return on pension plan investments were determined using a building-block method in which estimates of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentages and by adding expected inflation. The target allocation and best estimates of long-term geometric rates of return are summarized in the following table:

June 30, 2021			
Asset Class	Long-term Expected Real Rate of Return	Target Allocation	Weighted Average Expected Real Rate of Return
Domestic equity	5.5%	27.5%	1.51%
International equity	7.0%	27.5%	1.93%
Fixed income	2.2%	15.0%	0.33%
Real estate	6.6%	10.0%	0.66%
Private equity	8.5%	10.0%	0.85%
Hedge funds	4.0%	10.0%	0.40%
Total		100.0%	5.68%
Inflation (CPI)			2.10%
			7.78%

DISCOUNT RATE - The discount rate used to measure the total pension asset was 7.25%. The projections of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that employer contributions from employers will follow current funding policies. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rates of return on pension plan investments were applied to all periods of projected benefit payments to determine the total pension asset. Although discount rates are subject to change between measurement dates, there were no changes in the discount rate in the current period.

SENSITIVITY OF THE DIVISION'S PROPORTIONATE SHARE OF THE NET PENSION ASSET TO CHANGES IN THE DISCOUNT RATE - The following table presents the Division's proportionate share of the net pension asset calculated using the current discount rate of 7.25%, as well as what the Division's proportionate share of the net pension asset would be if it were calculated using a discount rate that is one-percentage-point lower or one-percentage-point higher than the current rate:

	1% Decrease (6.25%)	Discount Rate (7.25%)	1% Increase (8.25%)
The Division's proportionate share of the net pension (liability) asset	\$ (1,572)	\$ 137,597	\$ 255,063

(amounts expressed in thousands)

NOTE 12: RETIREMENT PLAN (Continued)

PENSION PLAN FIDUCIARY NET POSITION - Detailed information about the pension plan's fiduciary net position is available in the separately issued PERS financial report available at the Consolidated Public Retirement Board's website at www.wvretirement.com.

NOTE 13: OTHER POST EMPLOYMENT BENEFITS

The following are the Division's net OPEB asset, deferred outflows of resources and deferred inflows of resources related to OPEB, revenues, and the OPEB expense and expenditures for the fiscal year ended June 30, 2022:

Net OPEB asset	\$ 1,685
Deferred outflows of resources	8,590
Deferred inflows of resources	59,596
Revenues (payments on behalf)	(1,543)
OPEB expense	(31,898)
Contributions made by the Division	5,913

PLAN DESCRIPTION - The West Virginia Other Postemployment Benefit (OPEB) Plan (the Plan) is a cost-sharing, multiple employer, defined benefit other postemployment benefit plan and covers the retirees of State agencies, colleges and universities, county boards of education, and other government entities as set forth in the West Virginia Code. Financial activities of the Plan are accounted for in the West Virginia Retiree Health Benefit Trust Fund (RHBT), a fiduciary fund of the State established July 1, 2006 as an irrevocable trust. The Plan is administered by a combination of the West Virginia Public Employees Insurance Agency (PEIA) and the RHBT staff. Plan benefits are established and revised by PEIA and the RHBT management with the approval of the PEIA Finance Board. The plan provides medical and prescription drug insurance, as well as life insurance, benefits to certain retirees of State agencies, colleges and universities, county boards of education, and other government entities who receive pension benefits under the PERS, STRS, TDCRS, TIAA-CREF, Plan G, Troopers Plan A, or Troopers Plan B pension systems, as administered by the West Virginia Consolidated Public Retirement Board (CPRB). The plan is closed to new entrants.

The Plan's fiduciary net position has been determined on the same basis used by the Plan. The RHBT is accounted for as a fiduciary fund, and its financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting in conformity with GAAP for fiduciary funds as prescribed or permitted by the GASB. The primary sources of revenue are plan members and employer contributions. Members' contributions are recognized in the period in which the contributions are due. Employer contributions and related receivables to the trust are recognized pursuant to a formal commitment from the employer or statutory or contractual requirement, when there is a reasonable expectation of collection. Benefits and refunds are recognized when due and payable.

RHBT is considered a component unit of the State for financial reporting purposes, and, as such, its financial report is also included in the State's Annual Comprehensive Financial Report. RHBT issues publicly available financial statements and required supplementary information for the OPEB plan. Details regarding this plan and a copy of the RHBT financial report may be obtained at www.peia.wv.gov.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 13: OTHER POST EMPLOYMENT BENEFITS (Continued)

BENEFITS PROVIDED - The Plan provides the following benefits:

- Medical and prescription drug insurance
- Life insurance

The medical and prescription drug insurance is provided through two options:

- Self-Insured Preferred Provider Benefit Plan – primarily for non-Medicare-eligible retirees and spouses
- External Managed Care Organizations – primarily for Medicare-eligible retirees and spouses

CONTRIBUTIONS - Employer contributions from the RHBT billing system represent what the employer was billed during the respective year for its portion of the pay-as-you-go (paygo) premiums, retiree leave conversion billings, and other matters, including billing adjustments.

Paygo premiums are established by the PEIA Finance Board annually. All participating employers are required by statute to contribute this premium to the RHBT at the established rate for every active policyholder per month. The paygo rate related to the measurement date of June 30, 2021 were:

	<u>July 2020-June 2021</u>
Paygo premium	\$ 160

Members retired before July 1, 1997 pay retiree healthcare contributions at the highest sponsor subsidized rate, regardless of their actual years of service. Members retired after July 1, 1997 or hired before June 30, 2010 pay a subsidized rate depending on the member's years of service. Members hired on or after July 1, 2010, pay retiree healthcare contributions with no sponsor provided implicit or explicit subsidy.

Retiree leave conversion contributions from the employer depend on the retiree's date of hire and years of service at retirement as described below:

- Members hired before July 1, 1988, may convert accrued sick or leave days into 100% of the required retiree healthcare contribution.
- Members hired from July 1, 1988 to June 30, 2001, may convert accrued sick or leave days into 50% of the required retiree healthcare contribution.

The conversion rate is two days of unused sick and annual leave days per month for single healthcare coverage and three days of unused sick and annual leave days per month for family healthcare coverage.

The Division's contributions to the OPEB plan for the years ended June 30, 2022, 2021, and 2020, were \$5,913, \$10,333, and \$10,783, respectively. The General Fund is typically used to liquidate OPEB liabilities.

DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 13: OTHER POST EMPLOYMENT BENEFITS (Continued)

SPECIAL FUNDING - The State is a non-employer contributing entity that provides funding through SB 419, effective July 1, 2012, amended by West Virginia Code §11-21-96. The State provides a supplemental pre-funding source dedicating \$30 million annually to the RHBT Fund from annual collections of the Personal Income Tax Fund and dedicated for payment of the unfunded liability of the RHBT. The \$30 million transferred pursuant to this Code shall be transferred until the Governor certifies to the Legislature that an independent actuarial study has determined that the unfunded liability of RHBT has been provided for in its entirety or July 1, 2037, whichever date is later. This funding is to the advantage of all RHBT contributing employers.

ASSUMPTIONS - The June 30, 2022 OPEB asset for financial reporting purposes was determined by an actuarial valuation as of June 30, 2020 and a measurement date of June 30, 2021. The following actuarial assumptions were used and applied to all periods included in the measurement, unless otherwise specified:

- Inflation rate: 2.25%.
- Wage inflation rate: 2.75%
- Investment rate of return: 6.65%, net of OPEB plan investment expense, including inflation.
- Asset valuation method: Investments are reported at fair value.
- Actuarial cost method: Entry age normal cost method.
- Amortization method: Level percentage of payroll over a 20-year closed period beginning June 30, 2017.
- Projected salary increases: Specific to the OPEB covered group ranging from 2.75-5.18%, including inflation.
- Retirement age: Experience-based table of rates that are specific to the type of eligibility condition.
- Aging factors: Based on the 2013 SOA Study "Health Care Costs – From Birth to Death".
- Mortality rates: Post retirement based on Pub-2010 Below-Median Income General Healthy Retiree Mortality Tables projected with MP-2019 and scaling factors of 106% for males and 113% for females. Pre-Retirement based on Pub-2010 Below-Median Income General Employee Mortality Tables projected with MP-2019.
- Healthcare cost trend rates: Trend rate for pre-Medicare per capita costs of 7.0% for plan year end 2020, decreasing by 0.50% for one year then by 0.25% each year thereafter, until ultimate trend rate of 4.25% is reached in plan year end 2032. Trend rate for Medicare per capita costs of (31.11%) for plan year end 2022. 9.15% for plan year end 2023, decreasing ratably each year thereafter, until ultimate trend rate of 4.25% is reached in plan year end 2036.
- Expenses: Health administrative expenses are included in the development of the per capita claims cost. Operating expenses are included as a component of the annual expense.

Experience studies are performed at least once in every five-year period. The most recent experience study covered the period from July 1, 2015 to June 30, 2020. These assumptions will remain in effect for valuation purposes until such time as the RHBT adopts revised assumptions.

There were no assumption changes from the actuarial valuation as of June 30, 2020, measured at June 30, 2020 and rolled forward to a measurement date of June 30, 2021.

The long-term expected rate of return of 6.65% on OPEB plan investments was determined by a combination of an expected long-term rate of return of 7.00% for long-term assets invested with the WV Investment Management Board and an expected short-term rate of return of 2.50% for assets invested with the BTI.

WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 13: OTHER POST EMPLOYMENT BENEFITS (Continued)

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage. Target asset allocations, capital market assumptions (CMA), and future forecast returns were provided by the plan's investment advisors, including the West Virginia Investment Management Board (WV-IMB). The projected nominal return for the Money Market Pool held with the BTI was estimated based on the WV-IMB assumed inflation of 2.0% plus a 25 basis point spread.

The target allocation and estimates of annualized long-term expected real returns assuming a 10-year horizon are summarized below:

Asset Class	Target Allocation	Long-term Expected Real Return
Global equity	55.0%	4.8%
Core plus fixed income	15.0%	2.1%
Core real estate	10.0%	4.1%
Hedge fund	10.0%	2.4%
Private equity	10.0%	6.8%

SINGLE DISCOUNT RATE - A single discount rate of 6.65% was used to measure the total OPEB asset. This single discount rate was based on the expected rate of return on OPEB plan investments of 6.65%. The projection of cash flows used to determine this single discount rate assumed that employer contributions will be made in accordance with the prefunding and investment policies. Based on these assumptions, the OPEB plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB asset.

SENSITIVITY OF THE NET OPEB ASSET TO CHANGES IN THE DISCOUNT RATE - The following presents the Division's proportionate share of the net OPEB asset as of June 30, 2022 calculated using the discount rate of 6.65%, as well as what the Division's proportionate net OPEB asset would be if it were calculated using a discount rate that is one percentage point lower (5.65%) or one percentage point higher (7.65%) than the current rate.

	1% Decrease (5.65%)	Current Discount Rate (6.65%)	1% Increase (7.65%)
Net OPEB asset (liability)	\$ <u>(9,042)</u>	\$ <u>1,685</u>	\$ <u>10,591</u>

SENSITIVITY OF THE NET OPEB ASSET TO CHANGES IN THE HEALTHCARE COST TREND RATE - The following presents the Division's proportionate share of the net OPEB asset as of June 30, 2022 calculated using the healthcare cost trend rate, as well as what the Division's net OPEB asset would be if it were calculated using a healthcare cost trend rate that is one percentage point lower or one percentage point higher than the current rate.

	1% Decrease	Current Healthcare Cost Trend Rate	1% Increase
Net OPEB asset (liability)	\$ <u>12,441</u>	\$ <u>1,685</u>	\$ <u>(11,417)</u>

DIVISION OF HIGHWAYS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED JUNE 30, 2022
(amounts expressed in thousands)

NOTE 13: OTHER POST EMPLOYMENT BENEFITS (Continued)

OPEB ASSET, OPEB EXPENSE, AND DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES RELATED TO OPEB - The June 30, 2022 net OPEB asset was measured as of June 30, 2021, and the total OPEB asset was determined by an actuarial valuation as of June 30, 2020, rolled forward to the measurement date of June 30, 2021.

At June 30, 2022, the Division's proportionate share of the net OPEB asset was \$2,017. Of this amount, the Division recognized \$1,685 as its proportionate share on the statement of net position. The remainder of \$332 denotes the Division's proportionate share of net OPEB liability attributable to the special funding.

The allocation percentage assigned to each participating employer and non-employer contributing entity is based on its proportionate share of employer and non-employer contributions to OPEB for each of the fiscal years ended June 30, 2021 and 2020. Employer contributions are recognized when due. At the June 30, 2021 measurement date, the Division's proportion was 5.67%, an increase of 0.09% from its proportion of 5.58% calculated as of June 30, 2020.

For the year ended June 30, 2022, the Division recognized OPEB expense of (\$33,441). Of this amount, (\$31,898) was recognized as the Division's proportionate share of OPEB expense and (\$1,543) as the amount of OPEB expense attributable to special funding from a non-employer contributing entity.

At June 30, 2022, deferred outflows of resources and deferred inflows of resources related to OPEB are as follows.

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ -	\$ 11,607
Changes in proportion and difference between employer contributions and proportionate share of contributions	2,677	99
Reallocation of opt-out employer change in proportionate share	-	607
Change in assumptions	-	35,655
Net difference between projected and actual investment earnings	-	11,628
Contributions after the measurement date	<u>5,913</u>	<u>-</u>
Total	<u>\$ 8,590</u>	<u>\$ 59,596</u>

The Division will recognize the \$5,913 reported as deferred outflows of resources resulting from OPEB contributions after the measurement date as an increase to the net OPEB asset in the year ended June 30, 2023. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Fiscal Year Ended June 30,	Amortization
2023	\$ (29,369)
2024	(20,467)
2025	(3,717)
2026	<u>(3,366)</u>
	<u>\$ (56,919)</u>

NOTE 13: OTHER POST EMPLOYMENT BENEFITS (Continued)

PAYABLES TO THE OPEB PLAN - The Division reported \$331 as payable for normal contributions to the OPEB plan as of June 30, 2022.

NOTE 14: RISK MANAGEMENT

The Division is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health and life coverage; and natural disasters. The State established the Board of Risk and Insurance Management (BRIM) and the Public Employees Insurance Agency (PEIA), to account for and finance uninsured risks of losses for State agencies, institutions of higher education, and component units.

BRIM is a public entity risk pool that provides coverage for general, property, medical malpractice, and automobile liability. PEIA is also a public entity risk pool and provides coverage for employee and dependent health, life and prescription drug insurance. The Division retains the risk of loss on certain tort and contractor claims in excess of the amount insured or covered by BRIM's insurance carrier. Other than the amounts disclosed in Note 11, amounts of settlements have not exceeded insurance coverage in the past three years.

Through its participation in the PEIA, the Division has obtained health coverage for its employees. In exchange for payment of premiums to PEIA, the Division has transferred its risks related to health coverage. PEIA issues publicly available financial reports that include financial statements and required supplementary information, these reports may be obtained by writing to PEIA.

Workers compensation coverage to all State agencies is provided through the West Virginia State Insurance Commission who in turn purchases the workers' compensation coverage from commercial insurers on behalf of all State agencies. Nearly every employer in the State who has a payroll must have coverage.

NOTE 15: LEASES

The Division leases buildings for various terms under long-term, noncancelable lease agreements. The leases have monthly installments ranging between \$2 and \$191 plus interest at 4.00% with due dates ranging through March 2031.

Future annual minimum lease payments on leases for years subsequent to June 30, 2022, are as follows:

<u>Fiscal Year Ended June 30,</u>	<u>Principal</u>	<u>Interest</u>	<u>Total Payments</u>
2023	\$ 4,415	\$ 619	\$ 5,034
2024	4,217	447	4,664
2025	1,957	320	2,277
2026	1,861	242	2,103
2027	1,561	174	1,735
2028-2031	<u>3,511</u>	<u>76</u>	<u>3,587</u>
	<u>\$ 17,522</u>	<u>\$ 1,878</u>	<u>\$ 19,400</u>

NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION
YEAR ENDED JUNE 30, 2022

Actuarial Changes Other Postemployment Benefits Plan

The actuarial assumptions used in the total OPEB liability calculation can change from year to year. Please see table below which summarizes the actuarial assumptions used for the respective measurement dates.

	Inflation Rate	Salary Increases	Wage Inflation Rate	Investment Rate of Return & Discount Rate	Mortality	Retirement Age	Aging Factors	Expenses	Healthcare Cost Trend Rates
2021	2.25%	Specific to the OPEB covered group. Ranging from 2.75% to 5.18%, including inflation	2.75%	6.65%, net of OPEB plan investment expense, including inflation	Post-Retirement: Pub-2010 General Below-Median Healthy Retiree Mortality Tables projected with MP-2019 and scaling factors of 106% for males and 113% for females; Pre-Retirement: Pub-2010 Below-Median Income General Employee Mortality Tables projected with MP-2019	Experience-based table of rates that are specific to the type of eligibility condition	2013 SOA study "Health Care Costs - From Birth to Death"	Health administrative expenses are included in the development of the per capita claims cost. Operating expenses are included as a component of annual expense.	Trend rate for pre-Medicare per capita costs of 7.0% for plan year end 2020, decreasing by 0.50% for one year then by 0.25% each year thereafter, until ultimate trend rate of 4.25% is reached in plan year 2032. Trend rate for Medicare per capita costs of 31.11% for plan year end 2022, 9.15% for plan year end 2023, decreasing ratably each year thereafter, until ultimate trend rate of 4.25% is reached in plan year end 2036.
2020	2.25%	Specific to the OPEB covered group. Ranging from 2.75% to 5.18%, including inflation	2.75%	6.65%, net of OPEB plan investment expense, including inflation	Post-Retirement: Pub-2010 Below-Median Income General Healthy Retiree Mortality Tables projected with MP-2019 and scaling factors of 106% for males and 113% for females; Pre-Retirement: Pub-2010 Below-Median Income General Employee Mortality Tables projected with MP-2019	Experience-based table of rates that are specific to the type of eligibility condition	2013 SOA study "Health Care Costs - From Birth to Death"	Health administrative expenses are included in the development of the per capita claims cost. Operating expenses are included as a component of annual expense.	Trend rate for pre-Medicare per capita costs of 7.0% for plan year end 2022, 6.5% for plan year end 2023, decreasing by 0.25% each year thereafter, until ultimate trend rate of 4.25% is reached in plan year 2032. Trend rate for Medicare per capita costs of 31.11% for plan year end 2022, 9.15% for plan year end 2023, 8.40% for plan year end 2024, decreasing gradually each year thereafter, until ultimate trend rate of 4.25% is reached in plan year end 2036.
2019	2.75%	Dependent upon pension system. Ranging from 3.0% to 6.5%, including inflation	4.00%	7.15%, net of OPEB plan investment expense, including inflation	Post-Retirement: RP – 2000 Healthy Annuitant Mortality Table projected with Scale AA on a fully generational basis Pre-Retirement: RP– 2000 Non-Annuitant Mortality Table projected with Scale AA on a fully generational basis	Experience-based table of rates that are specific to the type of eligibility condition	2013 SOA study "Health Care Costs - From Birth to Death"	Health administrative expenses are included in the development of the per capita claims cost. Operating expenses are included as a component of annual expense	Trend rate for pre-Medicare per capita costs of 8.5% for plan year end 2020, decreasing by 0.5% each year thereafter, until ultimate trend rate of 4.5% is reached in plan year 2028. Trend rate for Medicare per capita costs of 3.1% for plan year end 2020, 9.5% for plan year end 2021, decreasing by 0.5% each year thereafter, until ultimate trend rate of 4.5% is reached in plan year end 2031.
2018	2.75%	Dependent upon pension system. Ranging from 3.0% to 6.5%, including inflation	4.00%	7.15%, net of OPEB plan investment expense, including inflation	Post-Retirement: RP – 2000 Healthy Annuitant Mortality Table projected with Scale AA on a fully generational basis Pre-Retirement: RP– 2000 Non-Annuitant Mortality Table projected with Scale AA on a fully generational basis	Experience-based table of rates that are specific to the type of eligibility condition	2013 SOA study "Health Care Costs - From Birth to Death"	Health administrative expenses are included in the development of the per capita claims cost. Operating expenses are included as a component of annual expense	Actual trend used for fiscal year 2018. For fiscal years on and after 2018, trend starts at 8.0% and 10.0% for pre and post-Medicare, respectively, and gradually decreases to an ultimate trend rate of 4.50%. Excess trend rate of 0.13% and 0.00% for pre and post-Medicare, respectively, is added to healthcare trend rates pertaining to per capita claims costs beginning in 2022 to account for the Excise Tax.
2017	2.75%	Dependent upon pension system. Ranging from 3.0% to 6.5%, including inflation	4.00%	7.15%, net of OPEB plan investment expense, including inflation	Post-Retirement: RP – 2000 Healthy Annuitant Mortality Table projected with Scale AA on a fully generational basis Pre-Retirement: RP– 2000 Non-Annuitant Mortality Table projected with Scale AA on a fully generational basis	Experience-based table of rates that are specific to the type of eligibility condition	2013 SOA study "Health Care Costs - From Birth to Death"	Health administrative expenses are included in the development of the per capita claims cost. Operating expenses are included as a component of annual expense	Actual trend used for fiscal year 2017. For fiscal years on and after 2018, trend starts at 8.5% and 9.75% for pre and post-Medicare, respectively, and gradually decreases to an ultimate trend rate of 4.50%. Excess trend rate of 0.14% and 0.29% for pre and post-Medicare, respectively, is added to healthcare trend rates pertaining to per capita claims costs beginning in 2020 to account for the Excise Tax.

Statistical Section

West Virginia Department of Transportation

Division of Highways

Statistical Section Narrative and Table of Contents

Financial Trends – These schedules contain trend information to help the reader understand how the Division’s financial performance and well-being have changed over time.

Net Position by Component	74
Changes in Net Position	76
Changes in Fund Balances of Governmental Funds	78
Fund Balances, Governmental Funds	80

Revenue Capacity Information – These schedules contain trend information to help the reader understand the Division's capacity to raise revenues and the sources of those revenues.

Tax and License Fee Revenue by Source	82
Fuel and Privilege Tax Rates	83

Debt Capacity Information – These schedules contain information to help the reader to understand the Division’s outstanding debt, the capacity to repay the debt, and the ability to issue new debt in the future.

Ratios of Outstanding Debt by Type	84
------------------------------------	----

Demographic and Economic Information – These schedules offer indicators to help the reader understand the environment within which the Division’s financial activities take place.

Demographic Statistics of West Virginia	85
Principal Employers	86

Operating Information – These schedules assist the reader in evaluating the size, efficiency, and effectiveness of the Division.

Employees by Program	88
Highway Construction and Improvement, Total Projects Authorized	90
Highway Construction and Improvement, Total Projects by Work Type	91
Roadway Projects – System Expansion Only	92
Roadway Resurfacing Projects	93
Total Highway Mileage by Category	94
