1.0 INTRODUCTION

This procedure governs deposit, transfer into the appropriate project authorization, and refunding of monies in Escrow Accounts. At the request of government agencies, corporations, or private citizens the West Virginia Division of Highways (WVDOH) may perform work on public highways for which the requesting party, under contractual agreement, partially or wholly, subsidizes. The balance of funding for this type of highway project may be federal, state, or local funds. The agreement between the WVDOH and the requesting party specifies the funding contribution to be made by each of the parties. Initially, the monies received by the WVDOH from the requesting party will be deposited into escrow which is wvOASIS balance sheet account (BSA) 2095 until it can be transferred to a project funding line or until the project is cancelled and the monies can be refunded.

Escrow Accounts may also be used to deposit funds that must be held until the account can be resolved. For example, in the event that a land developer is required by the WVDOH to post a bond due to the possibility of his work resulting in damage to WVDOH property, this bond money would be held in escrow until it has been determined that the threat no longer exists, or the money is required to make repairs.

2.0 SCOPE
