SUBJECT: ACCOUNTING

CHAPTER TITLE: ORGANIZATION NUMBERS

---

The Organization Numbering System provides a numerical designation for each of the organizational units of the Department of Transportation. These numerical designations provide a means of gathering accounting and other operational information for each organization on the basis of its assigned number. Each DOT agency is assigned the following organization number or range of numbers.

|                                   | <u>ORG. NUMBERS</u> |
|-----------------------------------|---------------------|
| Highways                          | 0056 through 1099   |
| Office of Administration Hearings | 2000                |
| Port Authority                    | 3000                |
| State Rail Authority              | 4000                |
| State Rail Authority Board        | 4100                |
| Motor Vehicles                    | 5020 through 5444   |
| Public Transit                    | 6000                |
| Aeronautics                       | 7000                |
| Civil Air Patrol                  | 8000                |
| Secretary of Transportation       | 0069                |

The larger DOT agencies require the assignment of multiple organization numbers. Within the noted range, specific organization numbers are assigned to permit information gathering for each administrative unit or sub-unit of the agency. The following listing identifies the assignment of organization numbers for Highways and for Motor Vehicles.
