Appendix A - U.S. Census Bureau Summary Reports by Block Group

Environmental Justice Analysis for the WV 14 (Pike Street) 26th Avenue to Blizzard Drive Widen, Add Lanes (0.49. mile) for the Categorical Exclusion (CE)

1.0 Introduction

Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (February 11, 1994), requires each federal agency to “make achieving environmental justice part of its mission by identifying and addressing as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations.” The Federal Highway Administration (FHWA) has identified three fundamental principles of environmental justice:

- To avoid, minimize, or mitigate disproportionately high and adverse human health and environmental effects, including social and economic effects, on minority populations and low-income populations;
- To ensure the full and fair participation by all potentially affected communities in the decision-making process; and
- To prevent the denial of, reduction in, or substantially delay in the receipt of benefits by minority and low-income populations.

The potential for the proposed project to have an environmental justice impact was examined through visits to the project area, investigation of data from the U.S. Census Bureau, the U.S. Environmental Protection Agency (EPA) EJSCREEN tool, and other locally specific information.

The project is the widening WV 14 (Pike Street) from 26th Avenue to Blizzard Drive, a distance of 0.49 mile. The widening will increase the number of lanes to five, with a roundabout at the Pike Street/Blizzard Drive/Broadway Avenue intersection and a signal at the Pike Street/Gihon Road/Rayon Drive intersection in Parkersburg, West Virginia.

2.0 Study Area and Census Data

The study area for this analysis includes the U.S. Census Block Groups that overlap the project area. This area includes four Census Tracts and six Census Block Groups. The low income population information is available at the Census Tract level while the minority population data is available at the Census Block Group level. These will be the affected communities for this project. The Census Tracts within the project area include:

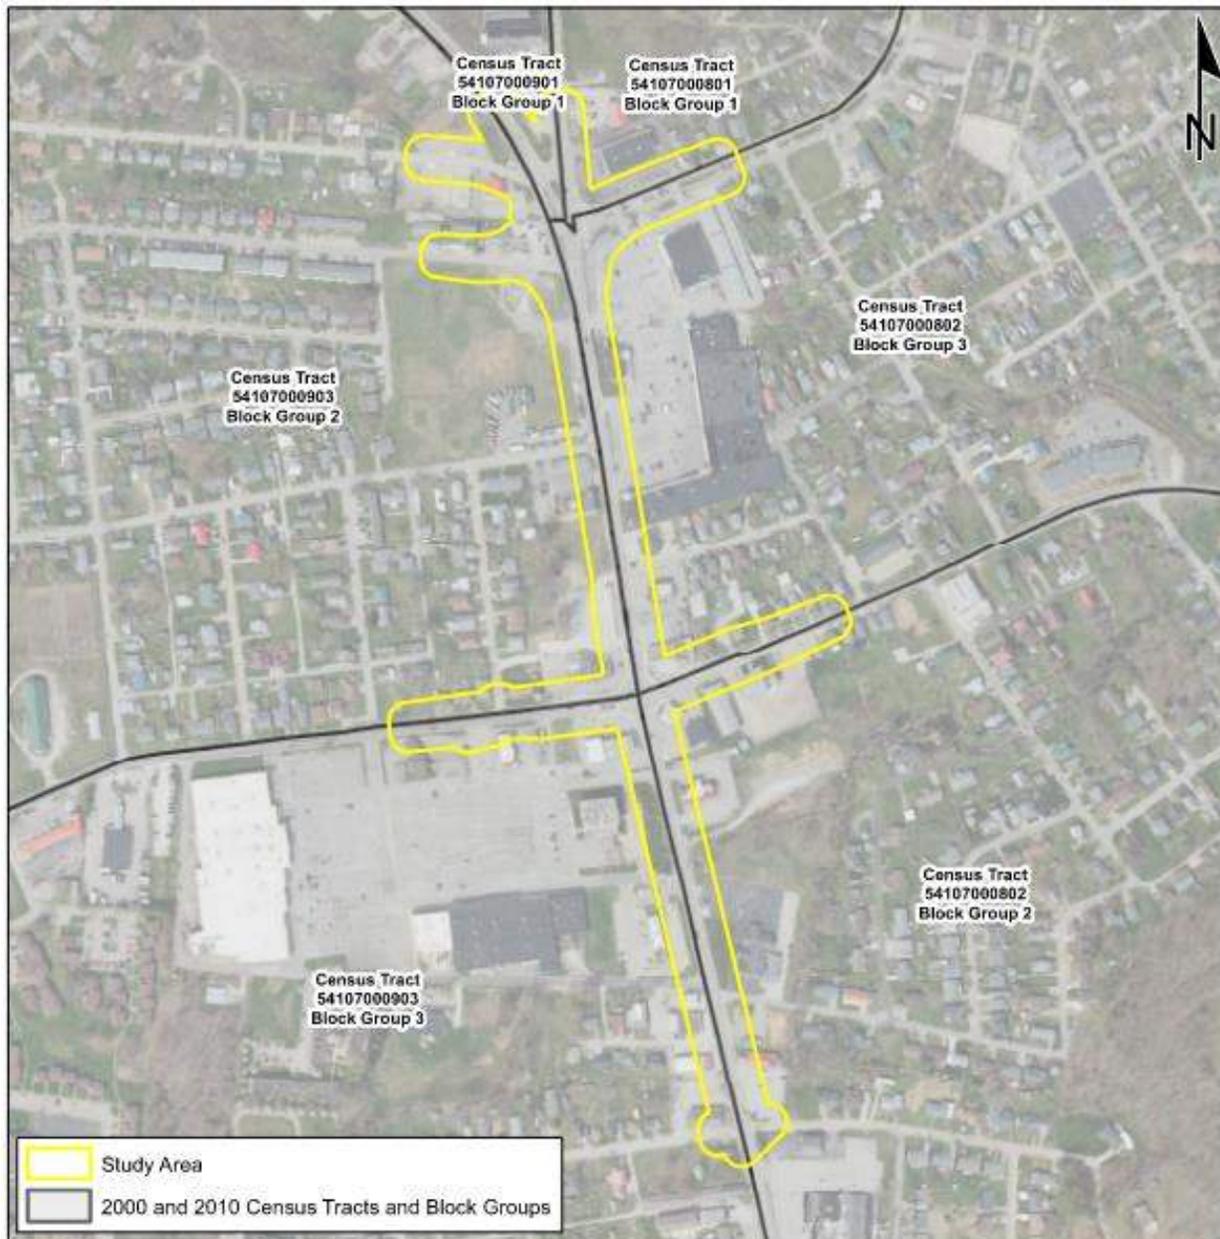

- 54107000801
- 54107000802
- 54107000901
- 54107000903.

The Block Groups within the project area include:

- 541070008011
- 541070008022
- 541070008023
- 541070009011
- 541070009032
- 541070009033.

Figure 1 shows the Census Tract and Block Group boundaries that are included within the project area and used for this analysis.

The City of Parkersburg will be used as the Community of Comparison (CoC) for the project. The U.S. Census 2013-2018 American Community Survey (ACS) data as obtained from the U.S. EPA EJScreen Tool. The project area includes the data area that consists of all of the side road improvement lengths.

Minority Population	5%	3%	0%	2%	0%	0%	8%
Low Income Population	44%						39%
Blockgroup 541070008023, WEST VIRGINIA, (Population: 1,478)							
Minority Population	1%	0%	0%	0%	1%	0%	8%
Low Income Population	61%						39%
Census Tract 54107000901, WEST VIRGINIA, (Population: 1,586)							
Minority Population	1%	0%	0%	0%	0%	1%	8%
Low Income Population	40%						39%
Blockgroup 541070009011, WEST VIRGINIA, (Population: 1,586)							
Minority Population	1%	0%	0%	0%	0%	1%	8%
Low Income Population	40%						39%
Census Tract 54107000903, WEST VIRGINIA, (Population: 4,218)							
Minority Population	4%	2%	0%	0%	0%	2%	8%
Low Income Population	46%						39%
Blockgroup 541070009032, WEST VIRGINIA, (Population: 1,458)							
Minority Population	0%	0%	0%	0%	0%	0%	8%
Low Income Population	36%						39%
Blockgroup 541070009033, WEST VIRGINIA, (Population: 1,082)							
Minority Population	5%	2%	0%	0%	0%	3%	8%
Low Income Population	62%						39%
City Parkersburg, WEST VIRGINIA, (Population: 30,823)							
Minority Population	7%	2%	1%	0%	0%	3%	8%
Low Income Population	51%						39%

Appendix A includes the Summary Reports obtained for EJ Screening website.

3.0 Low Income

Low-income is defined as households living below the 2019 Department of Health and Human Services (DHHS) poverty guideline of \$25,750 (for a family of four). Statistics on income presented below are based on the U.S. Census Bureau's poverty threshold, which differs slightly from the DHHS poverty guideline; however, as stated on the DHHS website: "The best approximation for the number of people below the HHS poverty guidelines in a particular area would be the number of persons below the Census Bureau poverty thresholds in that area."

The median household income within Parkersburg, West Virginia is \$36,010 with 51% of people within Parkersburg live at or below the poverty level. The State of West Virginia has a median household income of \$46,711 and 16% of the population is at or below the poverty level.

The EJSCREEN tool uses a percent of a census tract or block group's population in households where the household income is less than or equal to twice the federal "poverty level". The EJSCREEN tool has identified the project area with 53% of the population as low income. The Census Tract data indicates that the data ranges from Census Tract 54107000901 with 49% of the population low income to Census Tract 54107000801 with 63% of the population low income.

The project area low income percent of 53% does not exceed the threshold of 125% above the CoC (64%), but is greater than 50% of the overall population within the project area, therefore the population within the project area is considered environmental justice low-income.

4.0 Minority

Title VI of the Civil Rights Act of 1964 states that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance.

According to FHWA Order 6640.23 (1998), "FHWA Actions to Address Environmental Justice in Minority and Low-Income Populations," population groups defined as minorities include the following:

- Black (having origins in any of the black racial groups of Africa);
- Hispanic (of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture of origin, regardless of race);
- Asian American (having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands);
- American Indian and Alaskan Native (having origins in any of the original people of North America and who maintains cultural identification through tribal affiliation or community recognition); and
- Other non-white persons, including those persons of two or more races.

The minority population of Parkersburg, West Virginia is 7%. WV 14 project area based on the EJSCREEN tool has a minority population of 3%. The Census Block Groups that contain the project area have a minority population ranging between 0% to 5%.

Block Groups are not greater than 125% of the CoC or more than 50% overall minority population. Minority population is not considered an Environmental Justice population of concern. The project area does not appear to be dominated by minority residents, although some minority residents do reside in the area.

5.0 Public Involvement

The West Virginia Division of Highways (WVDOH) conducted a Virtual Public Meeting on March 23, 2021 to discuss the project and obtain public input on the project. WVDOH representatives presented the project and allowed for public comments to be submitted during the virtual meeting. During the presentation, the environmental justice populations were discussed. A total of 59 people attended the meeting.

A 30-day comment period followed the public meeting, with comments due to WVDOH by April 23, 2021. Comment forms were attached to the handouts and available on the WVDOH website. A total of 81 comments were received, with 60 submitted during the meeting, 20 submitted through the DOH website, and 1 submitted by mail. Most of the comments received were concerned with the use of the roundabout at Pike Street/Blizzard Drive/Broadway Avenue intersection and right-of-way (ROW) impacts to businesses along Pike Street. No comments were received concerning the EJ populations and any impacts the project may have on the populations.

6.0 Environmental Justice Population Impacts

Based on the Census information presented in EJScreening, EJ populations have been identified within the study area. This analysis concluded the following:

- Minority populations exist in:
 - Census Tract 801, Block Group 1,
 - Census Tract 802, Block Groups 2 and 3,
 - Census Tract 901, Block Group 1,
 - Census Tract 903, Block Group 2, and
 - Census Tract 903 Block Group 3 had 0% minority population.

The percent minority populations in each of the Census Tract Block Groups are below the average for the City of Parkersburg, as a whole.

- Low-income populations have been identified in all of the Census Tracts and Block Groups. The following Census Tracts and Block Groups Low Income Population percent equals or exceeds the City of Parkersburg's percent:
 - Census Tract 801, Block Group 1,
 - Census Tract 802, Block Group 3, and
 - Census Tract 903, Block Group 3.

The low-income population in the other Census Tract Block Groups is below the City of Parkersburg, as a whole.

The No Build alternative will maintain the existing condition of traffic congestion. The existing lack of sidewalks will hinder the movement of pedestrians (both EJ and non-EJ populations) along the WV 14 corridor. No disproportionately high and adverse effects on EJ populations will occur under the No-Build Alternative.

Under the Build Alternative, which increases the number of lanes to five and adding sidewalks to both sides of WV 14, traffic movement and pedestrian safety will be improved along the corridor. These improvements will benefit both the EJ and non-EJ populations. Based upon the preliminary engineering for the project, strip ROW will be acquired from the properties adjacent to the existing WV 14 ROW. A review of the project area land use indicates that most of the parcels where ROW will be required are commercial or vacant properties. Several

residential properties may require a strip of land off the front of the property for the roadway widening but will not require relocation of the residents. Only up to three parcels may require relocation of the businesses based on the preliminary design. The business may include a used auto dealer/service center, a shed-type structure associated with a business, and a gas station canopy.

While the maintenance of traffic plan has not been developed, the idea is to maintain at least one lane of traffic in each direction on WV 14 during construction. Temporary closures of intersecting streets and driveways may be required but access to all properties will be maintained. No disproportionately high and adverse effects on EJ populations will occur under the Build Alternative.

The proposed project is not likely to adversely affect or cause disproportionately high effects to low-income and minority populations within the project area.

Mitigation

Representatives of WVDOH will work with the City of Parkersburg to post notices along Pike Street prior to and during construction to inform all users of temporary delays and closures during construction. Multiple notices will be needed during phased construction. These notices will also be published in the local newspaper at least 7 days in advance of the closures.

The project when constructed will include sidewalks on both sides of Pike Street from 26th Avenue to Blizzard Drive. This will improve pedestrian and bicycle access through the project area.

APPENDIX A

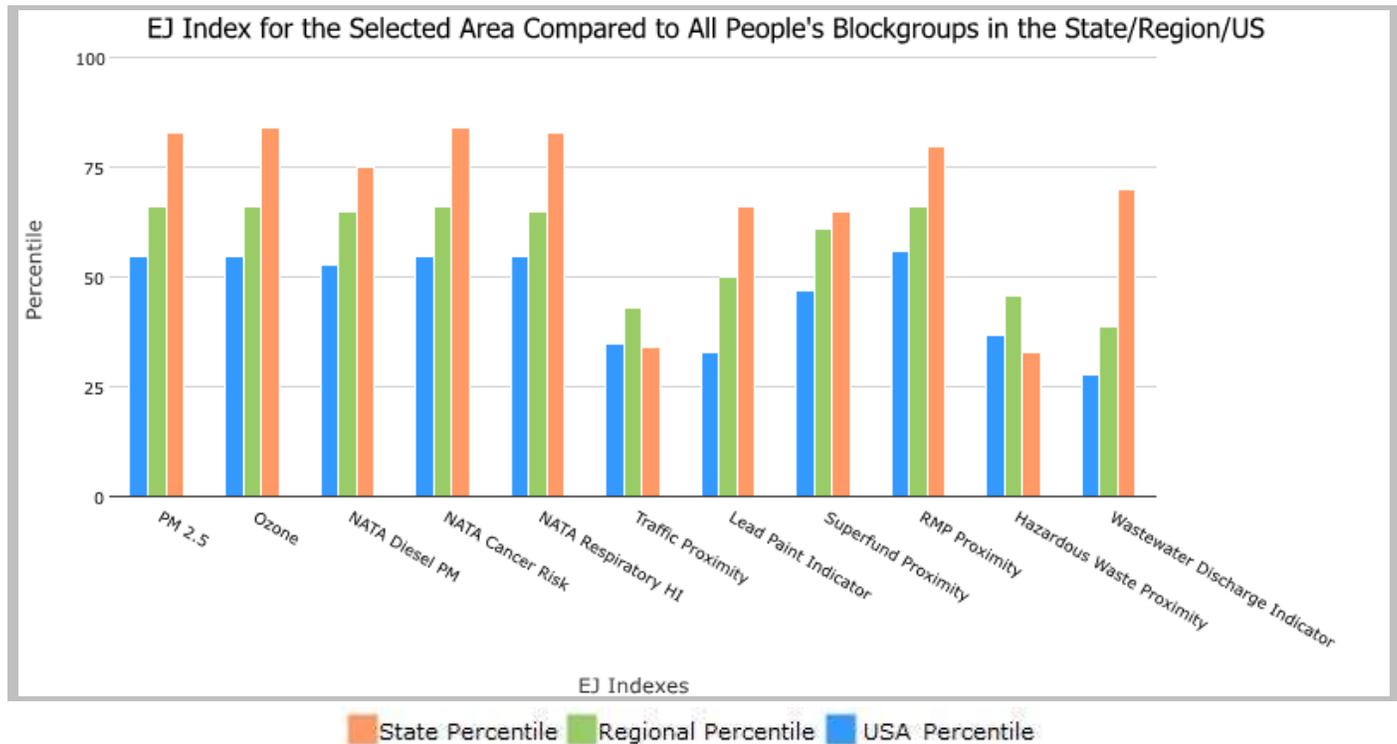

U.S. CENSUS BUREAU SUMMARY REPORTS BY BLOCK GROUP

Blockgroup: 541070008011, WEST VIRGINIA, EPA Region 3

Approximate Population: 1,453

Input Area (sq. miles): 0.70

Selected Variables	State Percentile	EPA Region Percentile	USA Percentile
EJ Indexes			
EJ Index for PM2.5	83	66	55
EJ Index for Ozone	84	66	55
EJ Index for NATA* Diesel PM	75	65	53
EJ Index for NATA* Air Toxics Cancer Risk	84	66	55
EJ Index for NATA* Respiratory Hazard Index	83	65	55
EJ Index for Traffic Proximity and Volume	34	43	35
EJ Index for Lead Paint Indicator	66	50	33
EJ Index for Superfund Proximity	65	61	47
EJ Index for RMP Proximity	80	66	56
EJ Index for Hazardous Waste Proximity	33	46	37
EJ Index for Wastewater Discharge Indicator	70	39	28

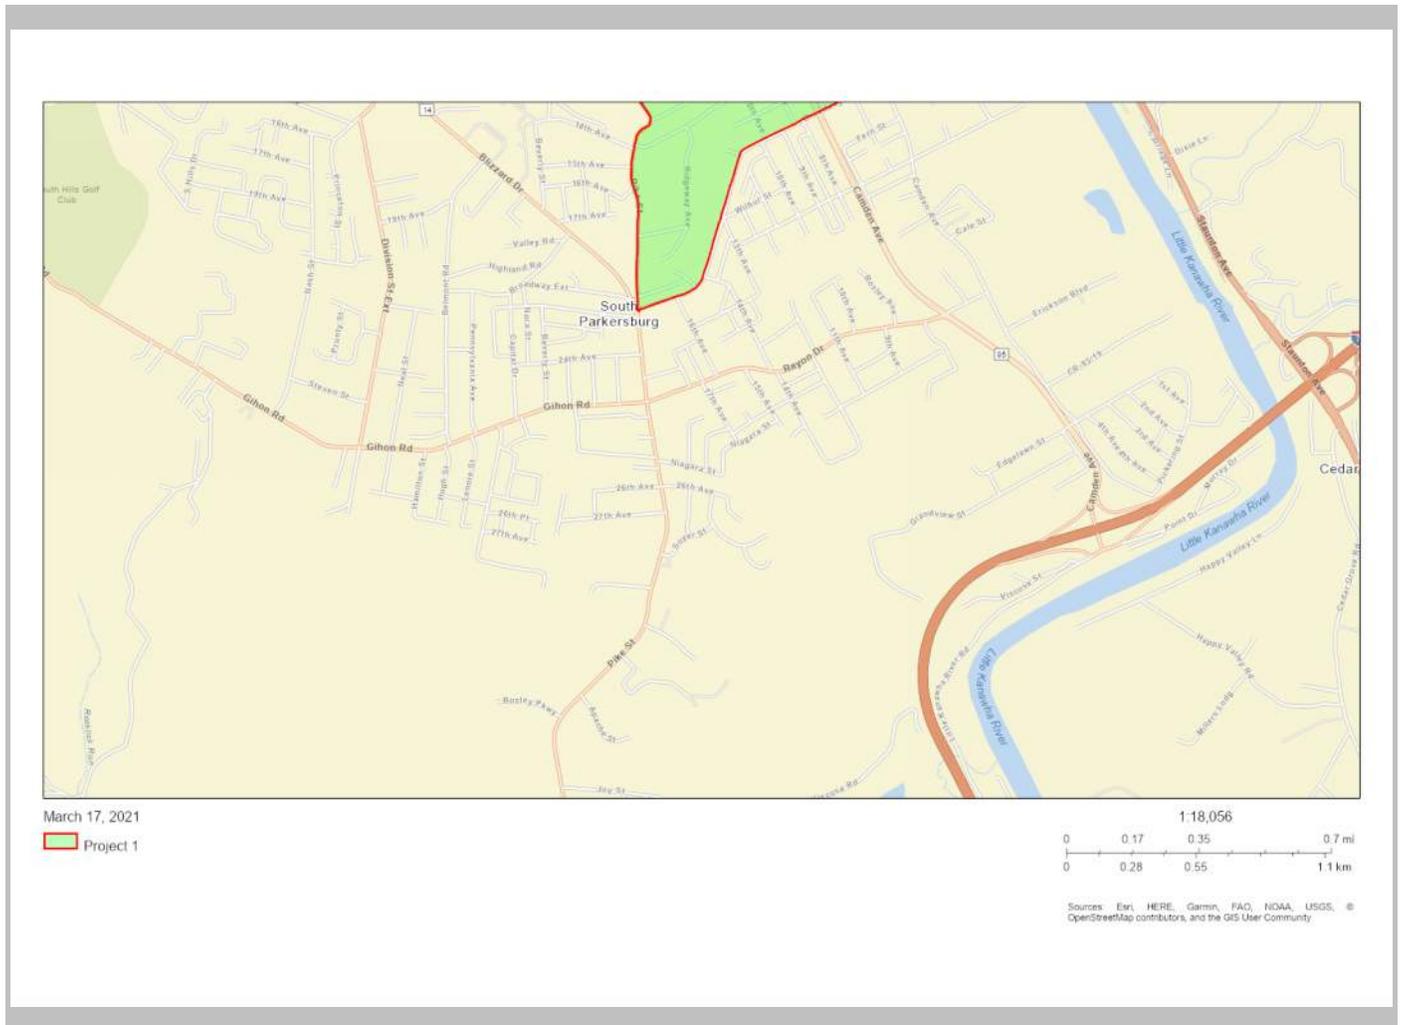

This report shows the values for environmental and demographic indicators and EJSCREEN indexes. It shows environmental and demographic raw data (e.g., the estimated concentration of ozone in the air), and also shows what percentile each raw data value represents. These percentiles provide perspective on how the selected block group or buffer area compares to the entire state, EPA region, or nation. For example, if a given location is at the 95th percentile nationwide, this means that only 5 percent of the US population has a higher block group value than the average person in the location being analyzed. The years for which the data are available, and the methods used, vary across these indicators. Important caveats and uncertainties apply to this screening-level information, so it is essential to understand the limitations on appropriate interpretations and applications of these indicators. Please see EJSCREEN documentation for discussion of these issues before using reports.

* The National-Scale Air Toxics Assessment (NATA) is EPA's ongoing, comprehensive evaluation of air toxics in the United States. EPA developed the NATA to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that NATA provides broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations. More information on the NATA analysis can be found at: <https://www.epa.gov/national-air-toxics-assessment>.

For additional information, see: www.epa.gov/environmentaljustice

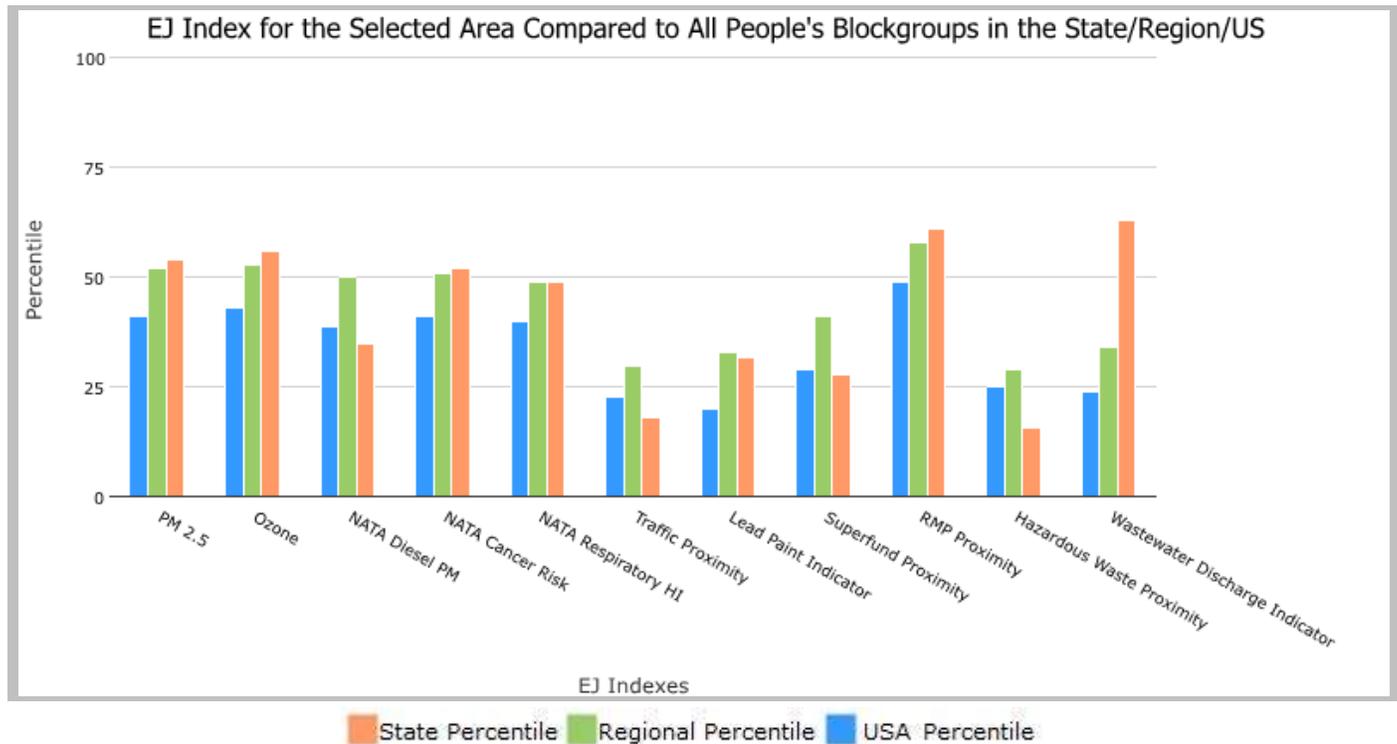

EJSCREEN is a screening tool for pre-decisional use only. It can help identify areas that may warrant additional consideration, analysis, or outreach. It does not provide a basis for decision-making, but it may help identify potential areas of EJ concern. Users should keep in mind that screening tools are subject to substantial uncertainty in their demographic and environmental data, particularly when looking at small geographic areas. Important caveats and uncertainties apply to this screening-level information, so it is essential to understand the limitations on appropriate interpretations and applications of these indicators. Please see EJSCREEN documentation for discussion of these issues before using reports. This screening tool does not provide data on every environmental impact and demographic factor that may be relevant to a particular location. EJSCREEN outputs should be supplemented with additional information and local knowledge before taking any action to address potential EJ concerns.

* The National-Scale Air Toxics Assessment (NATA) is EPA's ongoing, comprehensive evaluation of air toxics in the United States. EPA developed the NATA to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that NATA provides broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations. More information on the NATA analysis can be found at: <https://www.epa.gov/national-air-toxics-assessment>.

For additional information, see: www.epa.gov/environmentaljustice

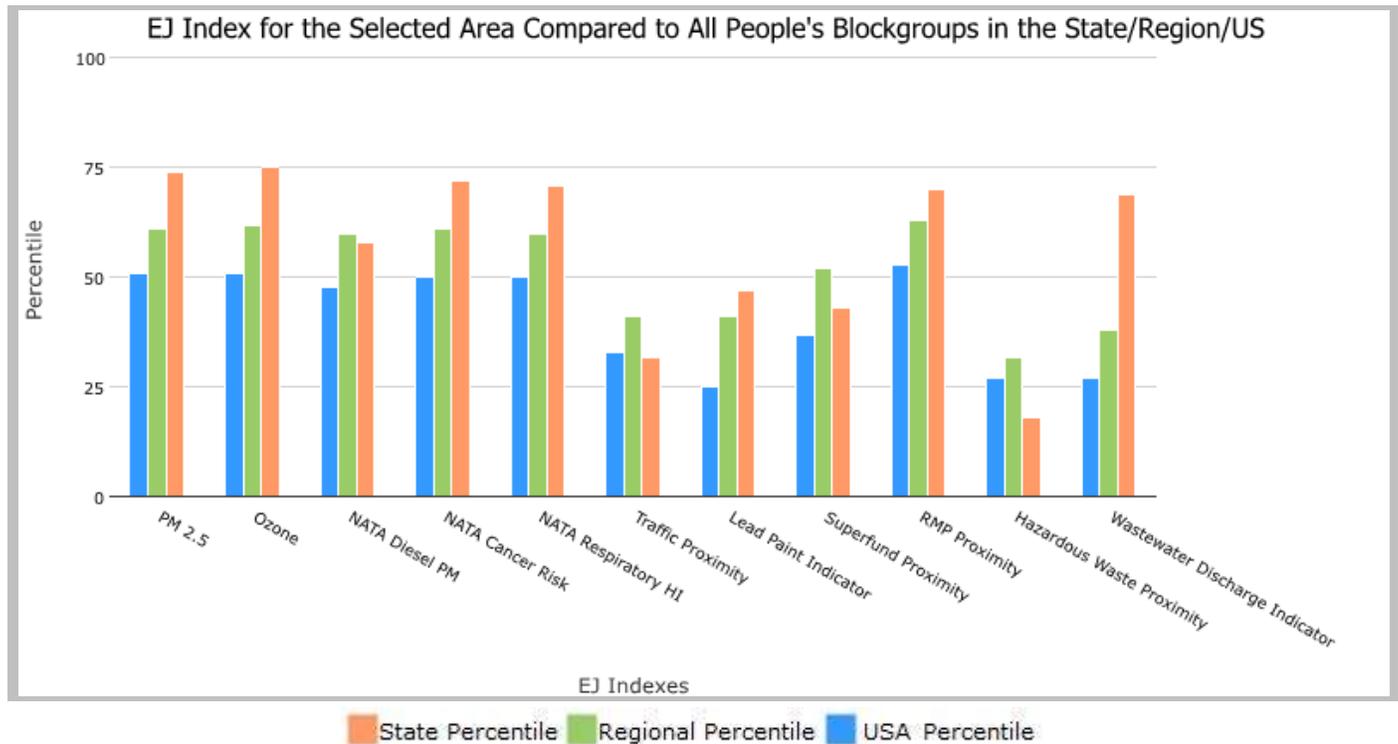

EJSCREEN is a screening tool for pre-decisional use only. It can help identify areas that may warrant additional consideration, analysis, or outreach. It does not provide a basis for decision-making, but it may help identify potential areas of EJ concern. Users should keep in mind that screening tools are subject to substantial uncertainty in their demographic and environmental data, particularly when looking at small geographic areas. Important caveats and uncertainties apply to this screening-level information, so it is essential to understand the limitations on appropriate interpretations and applications of these indicators. Please see EJSCREEN documentation for discussion of these issues before using reports. This screening tool does not provide data on every environmental impact and demographic factor that may be relevant to a particular location. EJSCREEN outputs should be supplemented with additional information and local knowledge before taking any action to address potential EJ concerns.

Blockgroup: 541070009011, WEST VIRGINIA, EPA Region 3

Approximate Population: 1,586

EJ Index for Wastewater Discharge Indicator	64	35	25

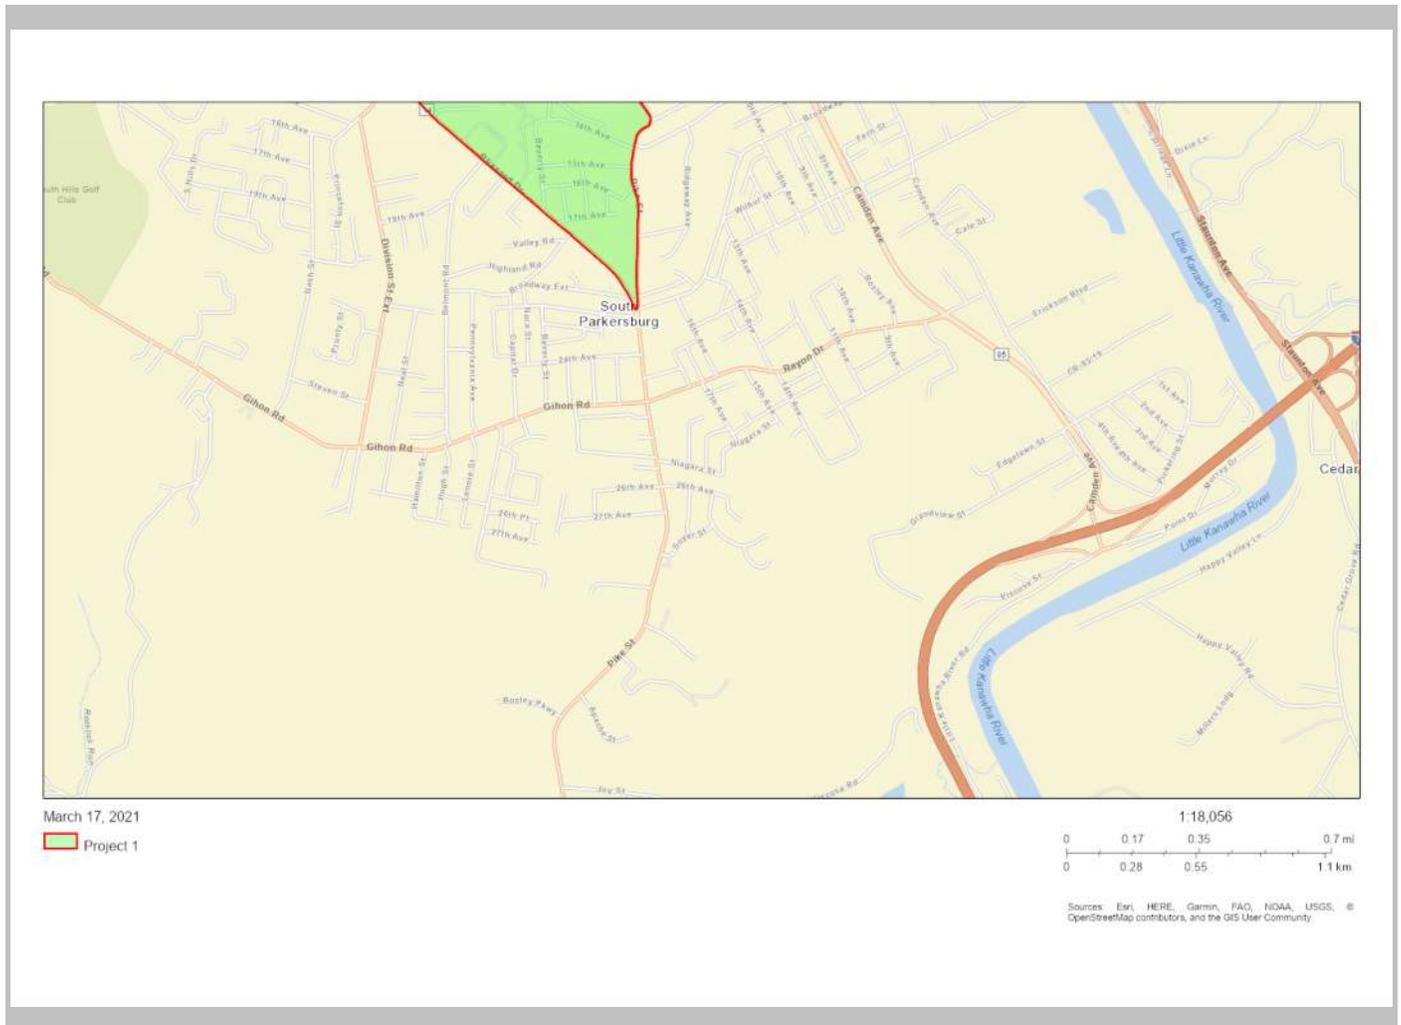

This report shows the values for environmental and demographic indicators and EJSCREEN indexes. It shows environmental and demographic raw data (e.g., the estimated concentration of ozone in the air), and also shows what percentile each raw data value represents. These percentiles provide perspective on how the selected block group or buffer area compares to the entire state, EPA region, or nation. For example, if a given location is at the 95th percentile nationwide, this means that only 5 percent of the US population has a higher block group value than the average person in the location being analyzed. The years for which the data are available, and the methods used, vary across these indicators. Important caveats and uncertainties apply to this screening-level information, so it is essential to understand the limitations on appropriate interpretations and applications of these indicators. Please see EJSCREEN documentation for discussion of these issues before using reports.
