

T409
01-15

West Virginia Division Of Highways Hot-Mix Asphalt Design Gsb Calculation Verification Form

T400 #: _____ Mix: _____ Source: _____ Technician: _____

		Date											
		Time											
Aggregate Type	PMF Target	Sample #											
		Bulk Gsb	Blend	Change	Blend								
Total													
Gsb Calculation													

Enter Aggregate Type and PMF Target from the original T400. Bulk Gsb is from current sampling. Enter the blend proportions of the mix. Only the first Blend proportions are required if no changes occur during the verification.

Circle all nonconforming test results. This test data is used in conjunction with the field verification of the mix design properties.

Verification Accepted: _____ Rejected: _____ District Technician: _____

After the mix design verification is completed, forward this form to the District, Materials Section. After review, acceptance or rejection this form should be forwarded to MCS&T.
