711.03.23 Mix Design for Portland Cement Concrete

- Suman Thapa: this MP is for the introduction of too much aggregate gradation. It will require a new form to be filled out.

- Edward Haden of IVS Hydro asked about latex modified concrete as his main concern. Dale Hill asked for more clarification. After briefly discussing, Edward gave his email address and he and Mike Mance will further discuss.

Passed

100.00.02 Method of Acceptance of Non-Standard or Non-Conforming Materials in Construction

- This MP provides guidelines on materials that aren't covered under standard specs.
- This will not be up for vote today. Dan Brayack has been working with Matthew Daly on this one and they believe they will split it into two separate MPs.

604.02.40 Inspection and Acceptance Procedures for Precast Concrete Products

- Andrew Thaxton: This MP would allow lagging to become an approved source; it provides a process for a fabricator to become an approved source
- Dale Hill said he sent out to precasters but hasn't heard any feedback; he'll resend after this meeting.
- Dan Brayack says this may be up to vote next meeting.
