#### NOTES:

- 1. NCHRP-350 Test Level 2 and 3 versions. Approved for permanent (when specified) applications.
- 2. NCHRP-350 Test Level 3 version. Approved for permanent (when specified) applications.
- 3. NCHRP-350 Test Level 3 version. Device is non-tapered, non-gating. Device designed to shield obstacles 24" wide and less. Approved for temporary work zone applications only.
- 4. NCHRP-350 Test Level 2 version. Device is non-tapered, non-gating. Device designed to shield obstacles 24" wide and less. Approved for temporary work zone applications only.
- 5. NCHRP-350 Test Level 3 version. Device is non-tapered, non-gating. Device designed to shield obstacles 24" wide and less. Approved for temporary work zone and permanent (when specified) applicati
- 6. NCHRP-350 Test Level 3 version. Device is non-tapered, non-gating. Device designed to shield obstacles 30" wide and less. Approved for temporary work zone and permanent (when specified) applicati
- 7. NCHRP-350 Test Level 2 version. Device is non-tapered, non-gating. Device designed to shield obstacles 24" wide and less. Approved for temporary work zone and permanent (when specified) applicati
- 8. NCHRP-350 Test Level 2 version. Device is non-tapered, non-gating. Device designed to shield obstacles 30" wide and less. Approved for temporary work zone and permanent (when specified) applicati
- 9. Approved for temporary work zone (as required per WVDOH Temporary Impact Attenuator specification and permanent (when specified) applications.
- 10. Approved for use only where the normal posted or statuatory speed limit is 45 MPH or less, regardless of the applicable work zone speed limit in effect.
- 11. NCHRP-350 Test Level 2 version. Device is non-tapered, non-gating. Device designed to shield obstacles 36" wide and less. Approved for temporary work zone applications only.
- 12. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 69" wide and less. Approved for permanent (when specified) applications.
- 13. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 90" wide and less. Approved for permanent (when specified) applications.
- 14. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 36" wide and less. Approved for temporary work zone applications only.
- 15. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 69" wide and less. Approved for permanent (when specified) applications.
- 16. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 90" wide and less. Approved for permanent (when specified) applications.
- 17. Device is non-tapered, non-gating. Device designed to shield obstacles 24" wide and less. Approved for permanent applications when a 70 MPH "High Speed" device is specified.
- 18. Device is non-tapered, non-gating. Device designed to shield obstacles 30" wide and less. Approved for permanent applications when a 70 MPH "High Speed" device is specified.
- 19. Device is non-tapered, non-gating. Device designed to shield obstacles 36" wide and less. Approved for permanent applications when a 70 MPH "High Speed" device is specified.
- 20. NCHRP-350 Test Level 2 version. Device is non-tapered, non-gating. Device designed to shield obstacles 30" wide and less. Approved for temporary work zone applications only.

- 21. NCHRP-350 Test Level 3 version. Device is non-tapered, non-gating. Device designed to shield obstacles 30" wide and less. Approved for temporary work zone applications only.
- 22. NCHRP-350 Test Level 2 version. Device is non-tapered, non-gating. Device designed to shield obstacles 36" wide and less. Approved for temporary work zone and permanent (when specified) applicati
- 23. NCHRP-350 Test Level 2 version. Device is non-tapered, non-gating. Device designed to shield obstacles 48" wide and less. Approved for temporary work zone and permanent (when specified) applicati
- 24. NCHRP-350 Test Level 3 version. Device is non-tapered, non-gating. Device designed to shield obstacles 36" wide and less. Approved for temporary work zone and permanent (when specified) applicati
- 25. NCHRP-350 Test Level 3 version. Device is non-tapered, non-gating. Device designed to shield obstacles 48" wide and less. Approved for temporary work zone and permanent (when specified) applicati
- 26. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 42" wide and less. Approved for permanent (when specified) applications.
- 27. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 48" wide and less. Approved for permanent (when specified) applications.
- 28. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 54" wide and less. Approved for permanent (when specified) applications.
- 29. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 60" wide and less. Approved for permanent (when specified) applications.
- 30. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 66" wide and less. Approved for permanent (when specified) applications.
- 31. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 72" wide and less. Approved for permanent (when specified) applications.
- 32. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 78" wide and less. Approved for permanent (when specified) applications.
- 33. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 84" wide and less. Approved for permanent (when specified) applications.
- 34. NCHRP-350 Test Level 2 version. Device is tapered, non-gating. Device designed to shield obstacles 96" wide and less. Approved for permanent (when specified) applications.
- 35. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 42" wide and less. Approved for permanent (when specified) applications.
- 36. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 48" wide and less. Approved for permanent (when specified) applications.
- 37. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 54" wide and less. Approved for permanent (when specified) applications.
- 38. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 60" wide and less. Approved for permanent (when specified) applications.
- 39. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 66" wide and less. Approved for permanent (when specified) applications.
- 40. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 72" wide and less. Approved for permanent (when specified) applications.
- 41. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield

obstacles 78" wide and less. Approved for permanent (when specified) applications.

- 42. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 84" wide and less. Approved for permanent (when specified) applications.
- 43. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 96" wide and less. Approved for permanent (when specified) applications.
- 44. NCHRP-350 Test Level 3 version. Device is tapered, non-gating. Device designed to shield obstacles 102" wide and less. Approved for permanent (when specified) applications.
