TED: Ted Whitmore

EGR:

Paul Farley noted that from now on, all MPs can be found on the MP page of the Materials website.

604.02.40 Inspection and Acceptance Procedures for Precast Concrete Products

- Adam Gillispie: This MP allows dry cast fabrication for box culverts. This allows more precast products that are widely accepted. He did research by speaking with other states, including Texas, Indiana, Virginia, Maryland and Ohio where this is already practiced. He also sought the input of industry folks and indicated John Susong was very helpful in Indiana, where they've used this as far back as 1994.
- After the vote, John Susong asked when this would take effect; Dan Brayack explained that before it takes effect, Federal Highways must affirm it.
